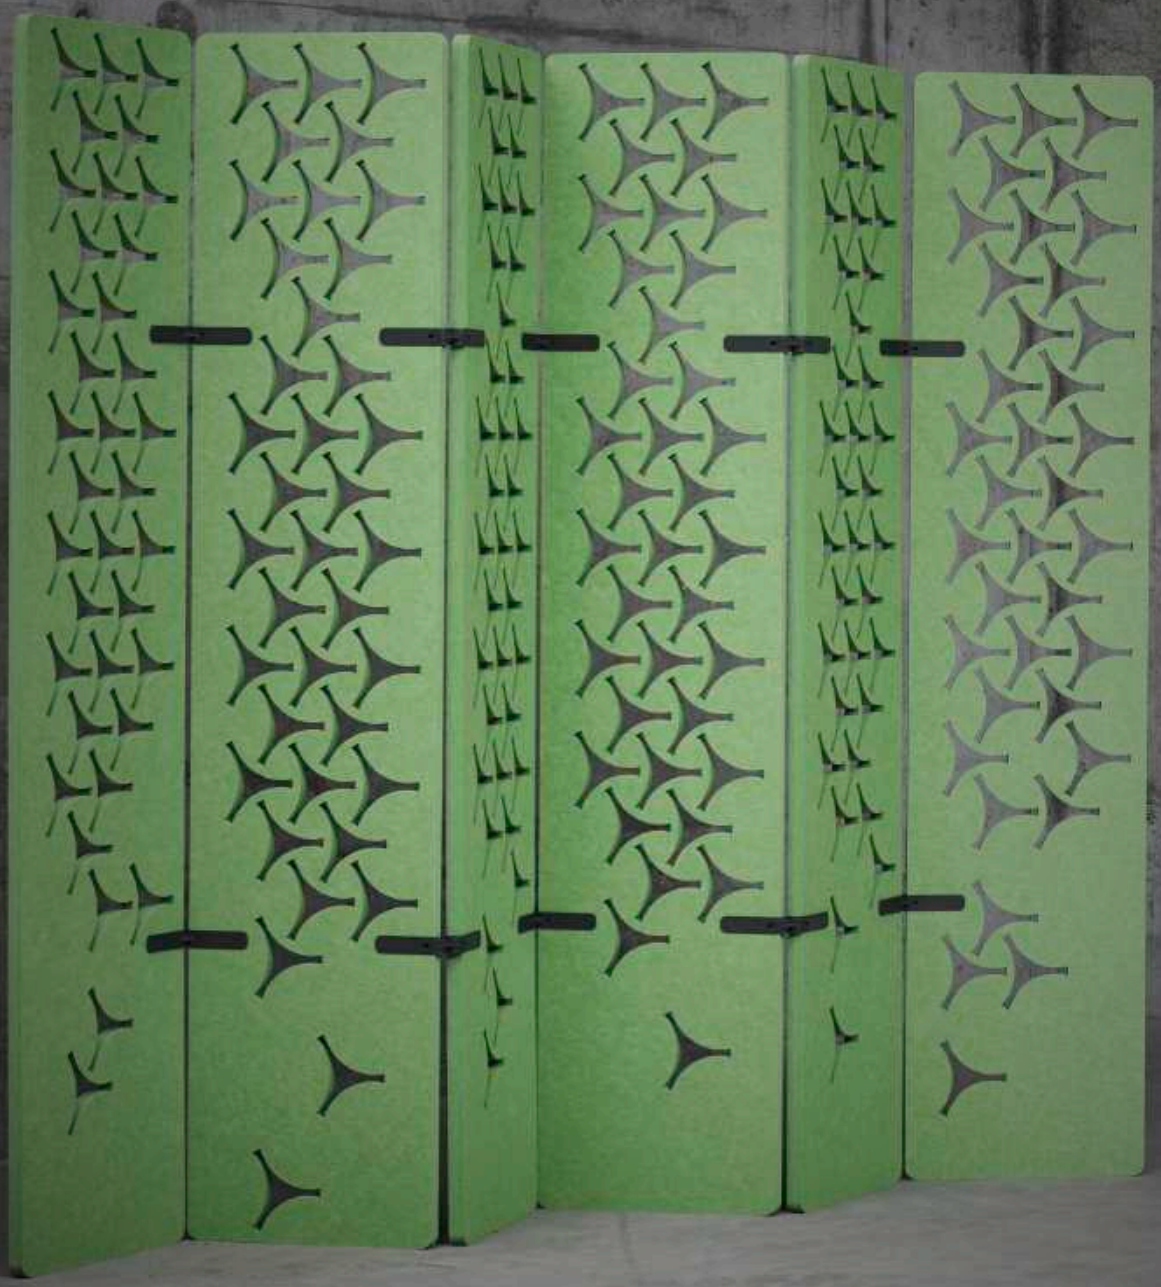
Customised high-performance sound absorbers for a noticeable improvement in well-being and room quality. ECHO**JAZZ** EchoBoards® are made from recycled PET bottles. 100% Swiss design, 100% zero waste.



COMPANY PROFILE

ACOUSTIC INSPIRATION

Ecological, robust and flexible high-performance sound absorbers made from recycled PET bottles, tailor-made for individual solutions to increase comfort and room quality in architecture, gastronomy, creative industries, open office spaces, school buildings, swimming pools, hotelery and your home. 100% Swiss design, 100% zero waste.

Made from 74 PET bottles per square metre, we process our ECHO**JAZZ** EchoBoards® into functional design elements. The soft, felt-like feel matches a wide range of natural materials such as stone, concrete, wood, metal and glass. ECHO**JAZZ** products are fire protection certified and available in up to 34 colours. Staged as a real eye-catcher or cleverly concealed - ECHO**JAZZ** improves the feeling of space in a noticeably pleasant way and with a lasting effect.

ECHO**CURTAIN®**

ECHO**TOWER®**

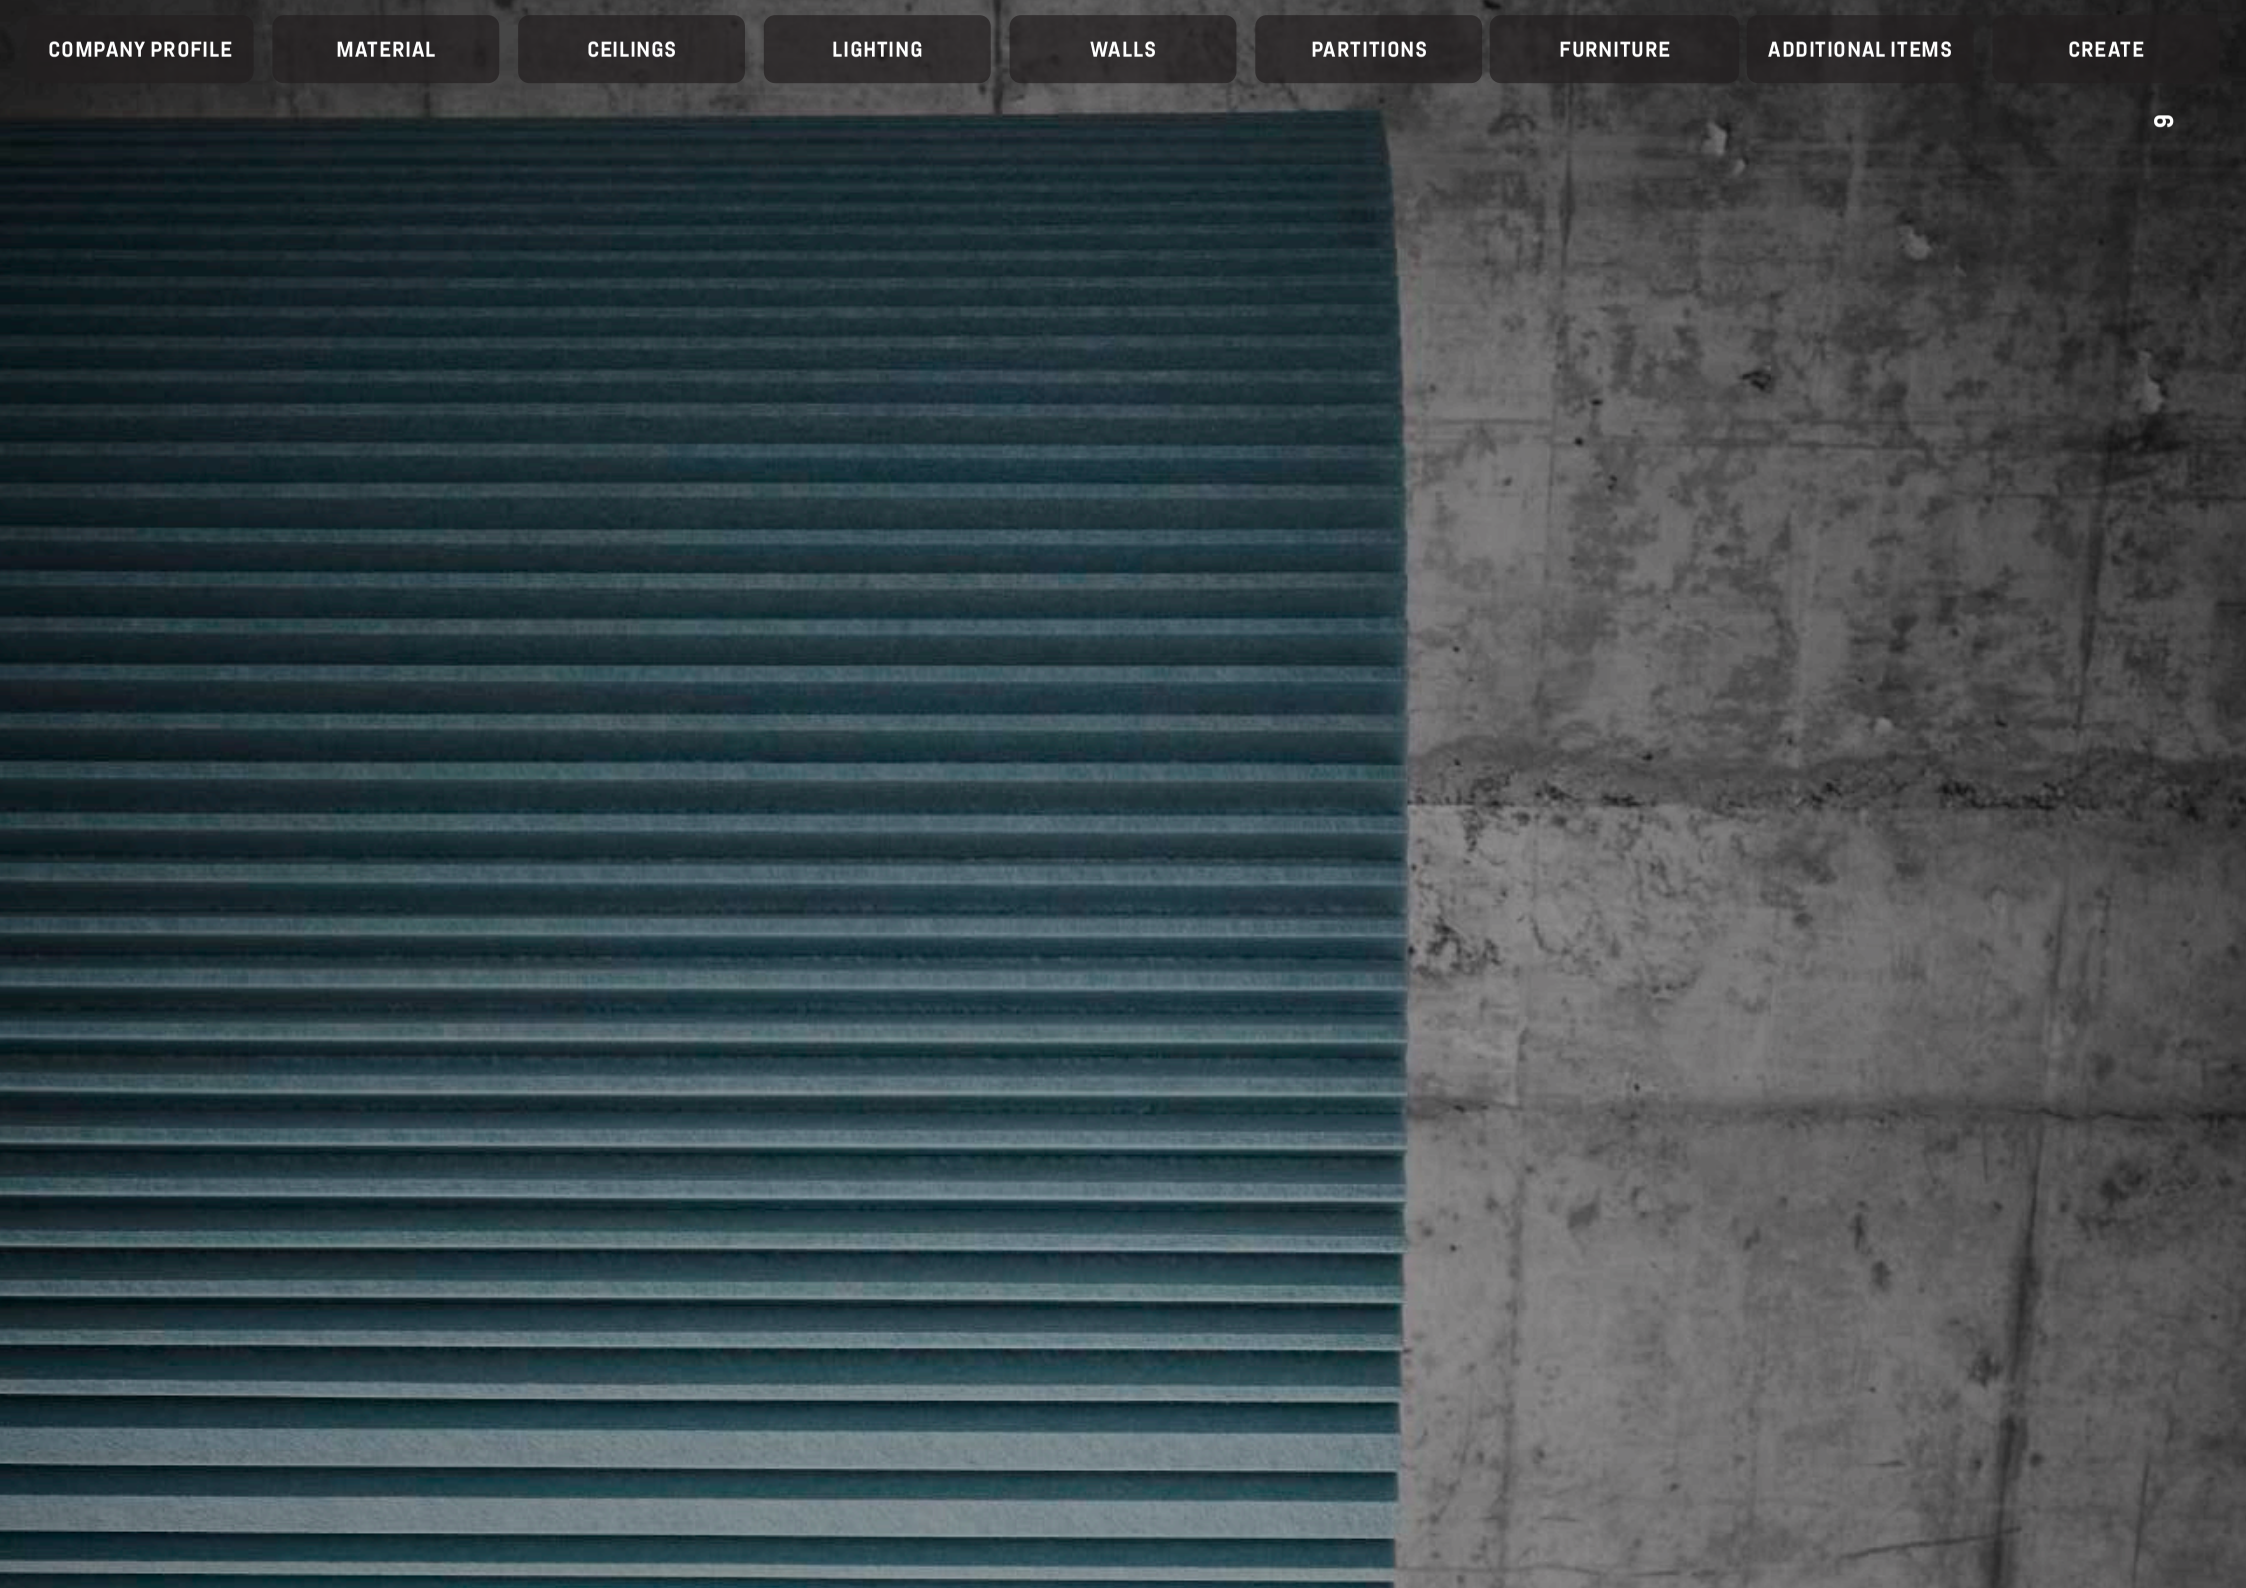
SUSTAINABILITY BY DESIGN

To noticeably improve well-being and room quality, we create high-performance sound absorbers for architecture, gastronomy, creative industries, open office spaces and your home. Our ready-made products are designed for you in Kriens and have the highest standards of design and simplicity.

More ecological, more robust and more flexible in use than any other comparable product: all our products are based on the use of durable high-tech felt made from 100% PET. It was our upmost goal to ensure that the ECHO**JAZZ** products contain the highest possible proportion of recycled PET material and that the result is deceptively close to the beauty and properties of traditional wool.

Our product is for your project: We take care of individual and tailor-made solutions that address a wide range of projects and offer a large range of smart standard products.

And after the project is before the project: Through our stewardship programme, we can recycle 100% of used ECHO**JAZZ** products.



ACOUSTICS AND ENVIRONMENT

At ECHO**JAZZ**, we combine sustainability with the simplicity of design of highest and most vanguard standards. In order not to burden our nature, only the cycle comes into question for us: recycled raw materials, recyclable products, zero waste.

From disposable plastic to high-quality end products for the design industry: for our products we use 100% PET with a minimum of 50% recycled PET. Compared to the production of virgin PET, the use of recycled PET saves up to 84% of the energy. Individual products are complemented with recycled and recyclable steel

Closed loop: ECHO**JAZZ** is the only manufacturer to offer a take-back programme for all products. This means that all products can be returned for recycling at the end of their life cycle.

100% Zero Waste: We generate raw material for new products from used products and the residual material created during production.

On to the emission-free future: ECHO**JAZZ** products are already processed locally in Kriens, and we aim to have as many raw materials as possible manufactured as close to our site as possible.

HIGH PERFORMANCE

The world is changing at breakneck speed: space and tranquillity are becoming rare commodities. Whether in a creative open office, in a simple waiting room or in trendy restaurant concepts - people should feel comfortable in all rooms. We offer solutions that improve heavily frequented and acoustically stressed rooms: noticeably, audibly, sustainably.

Design without compromise: The time of carpet wallpaper and thick curtains in dim conference rooms is over. We will contain acoustic disturbance elements in every room without restricting modern design visions and architecture.

Sustainability without compromise: The construction industry is one of the biggest waste generators on our planet. This must change. We start with a product that is 100% recyclable. We achieve the UN Sustainable Development Goals (SDGs) for responsible consumption and production.

Unlimited inspiration: It is in the hands of the creative industries to reinvent flawed materials, products and business models, to model sustainability and inspire people. Let›s get started!

SOUND-ABSORBING

The open and compressed felt structure is 40% thinner than comparable high-performance absorbers.

ROBUST

Very dimensionally stable, tear-resistant and cleanable without residues.

REGULATING

Pleasant indoor climate thanks to balancing temperature and humidity.

EASY TO PROCESS

Individually cut on the CNC cutting plotter, easily customisable on site.

FIRE SAFETY

European fire protection classification: B-s1/s2, d0, hardly any smoke development and no burning dripping.

MOLD-FREE

Because the fibre does not absorb water, the EchoBoard® dries very well.

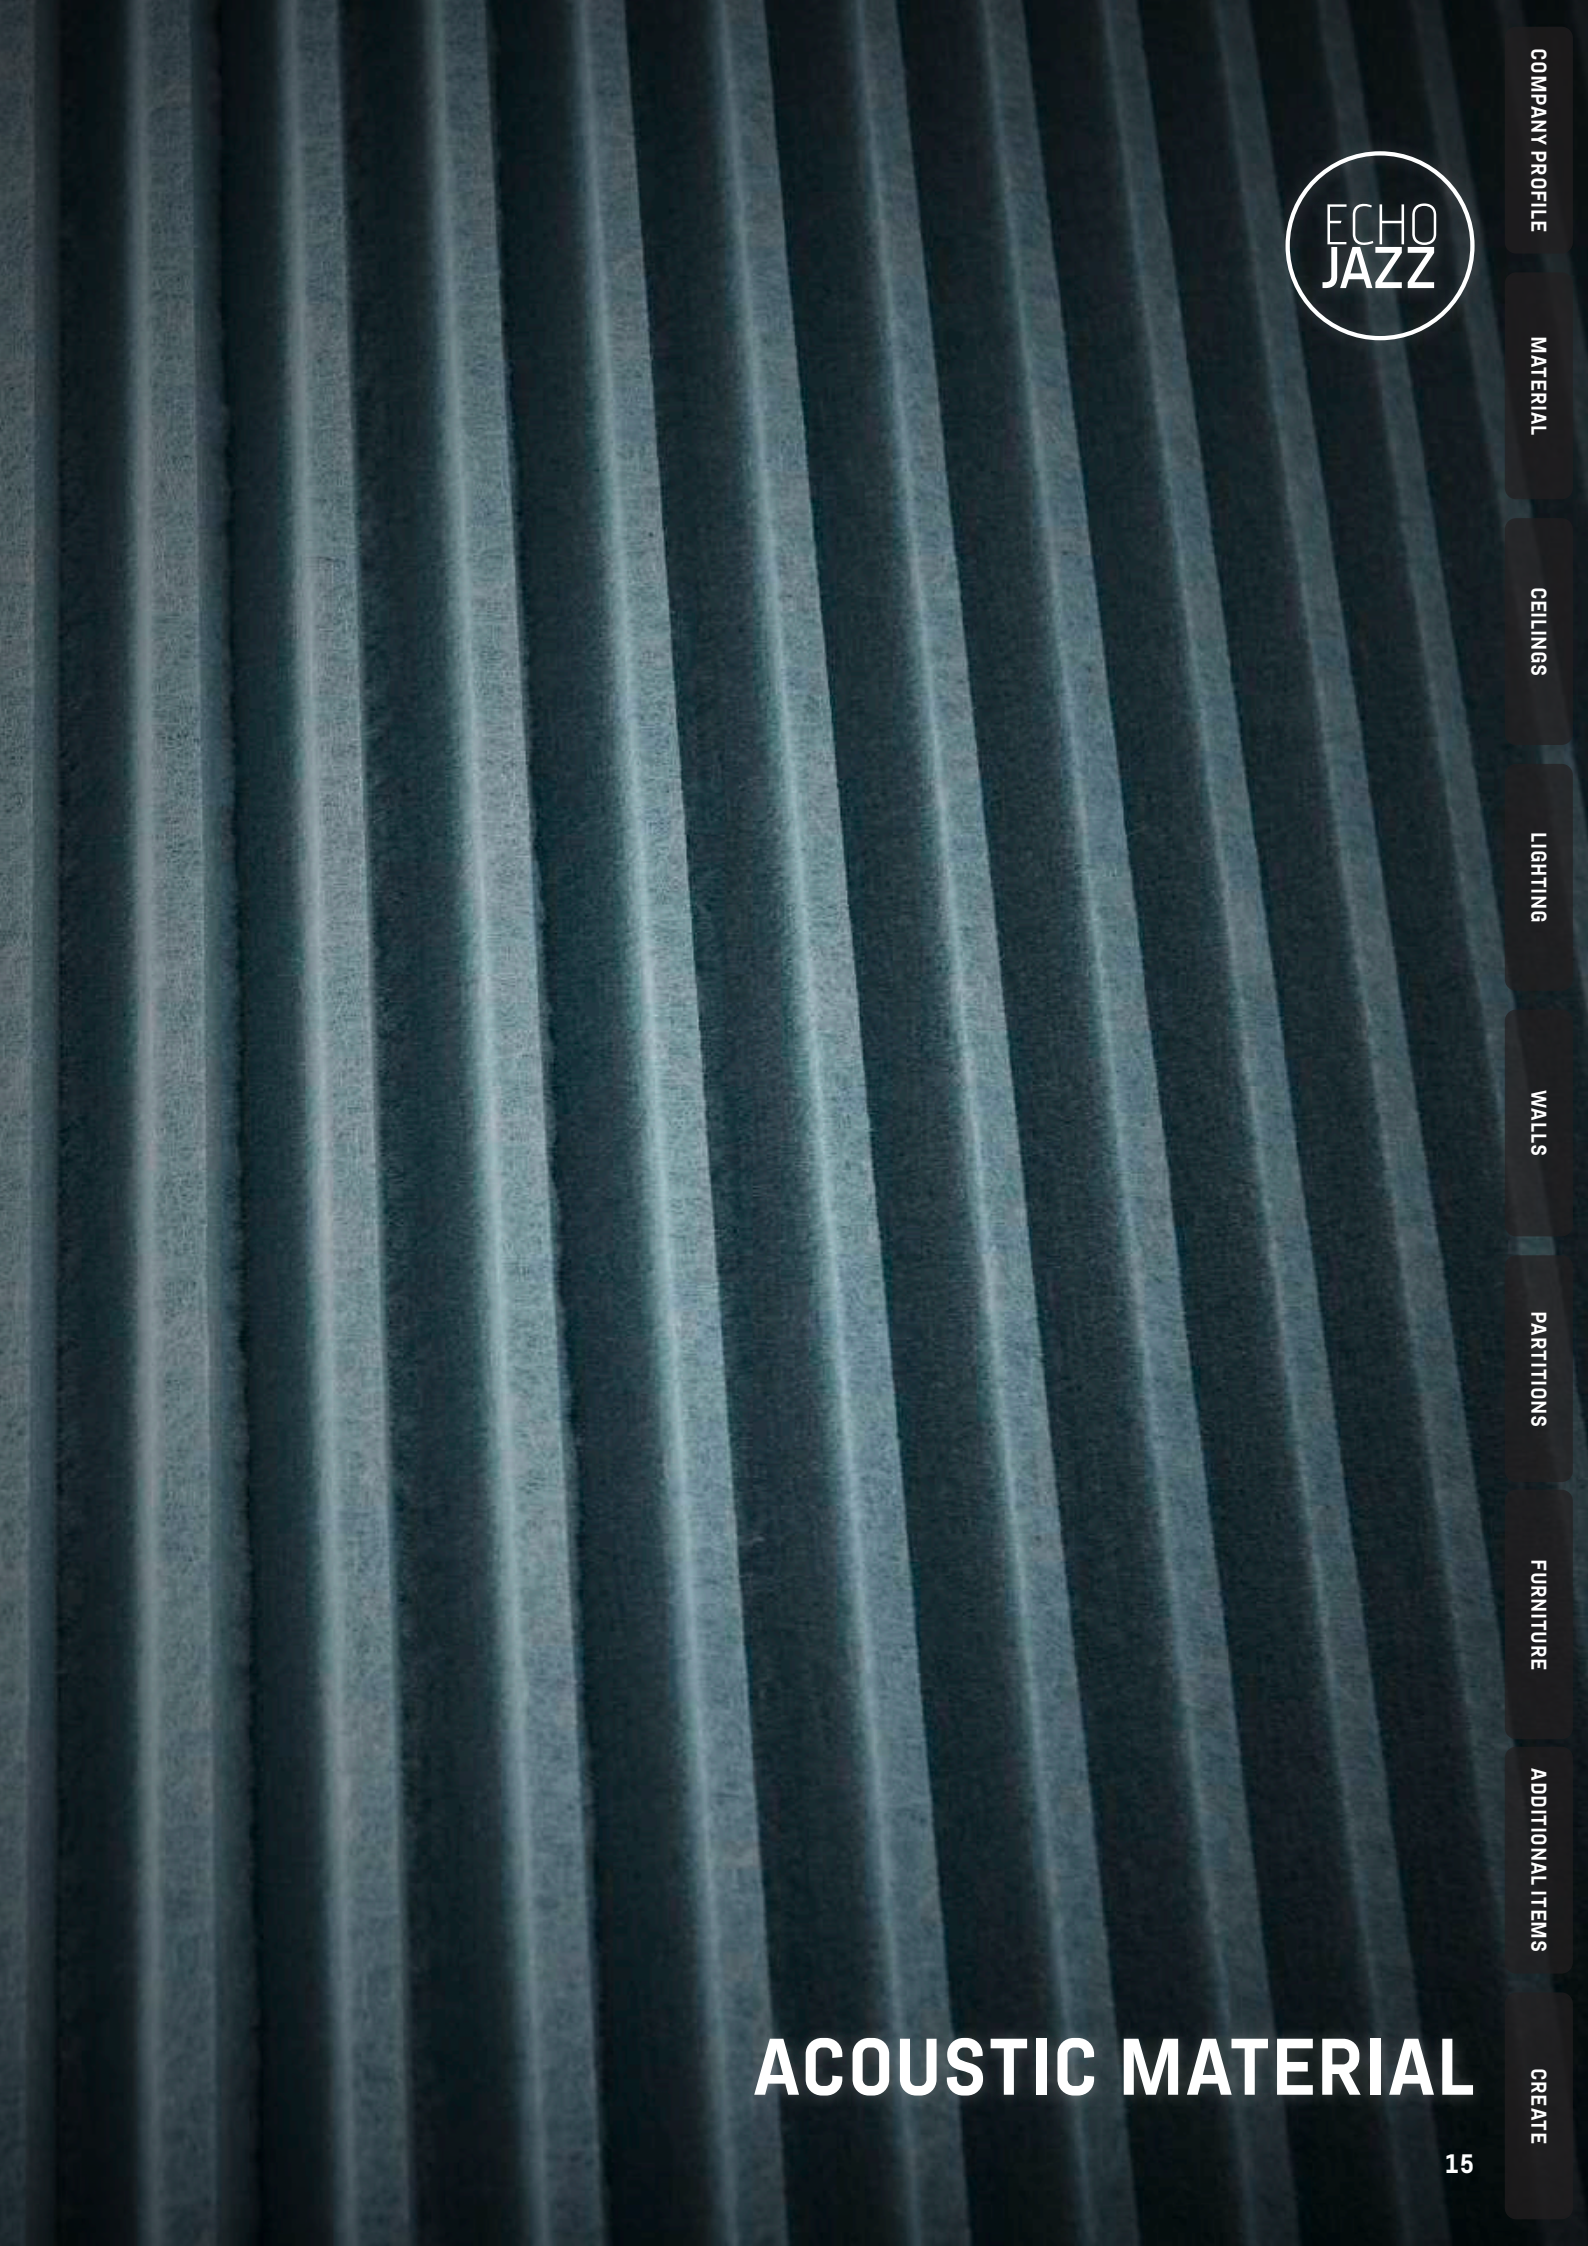
EMISSION-FREE

Does not emit hazardous fibres or paint particles.

LIGHTFASTNESS

The fibres are dyed in the liquid state and do not fade.

The robust and easy-care basic elements EchoBoard® and EchoCoustic® can be used for a large number of individual design ideas and allow creative wishes regarding shapes, colours, perforation and areas of application.

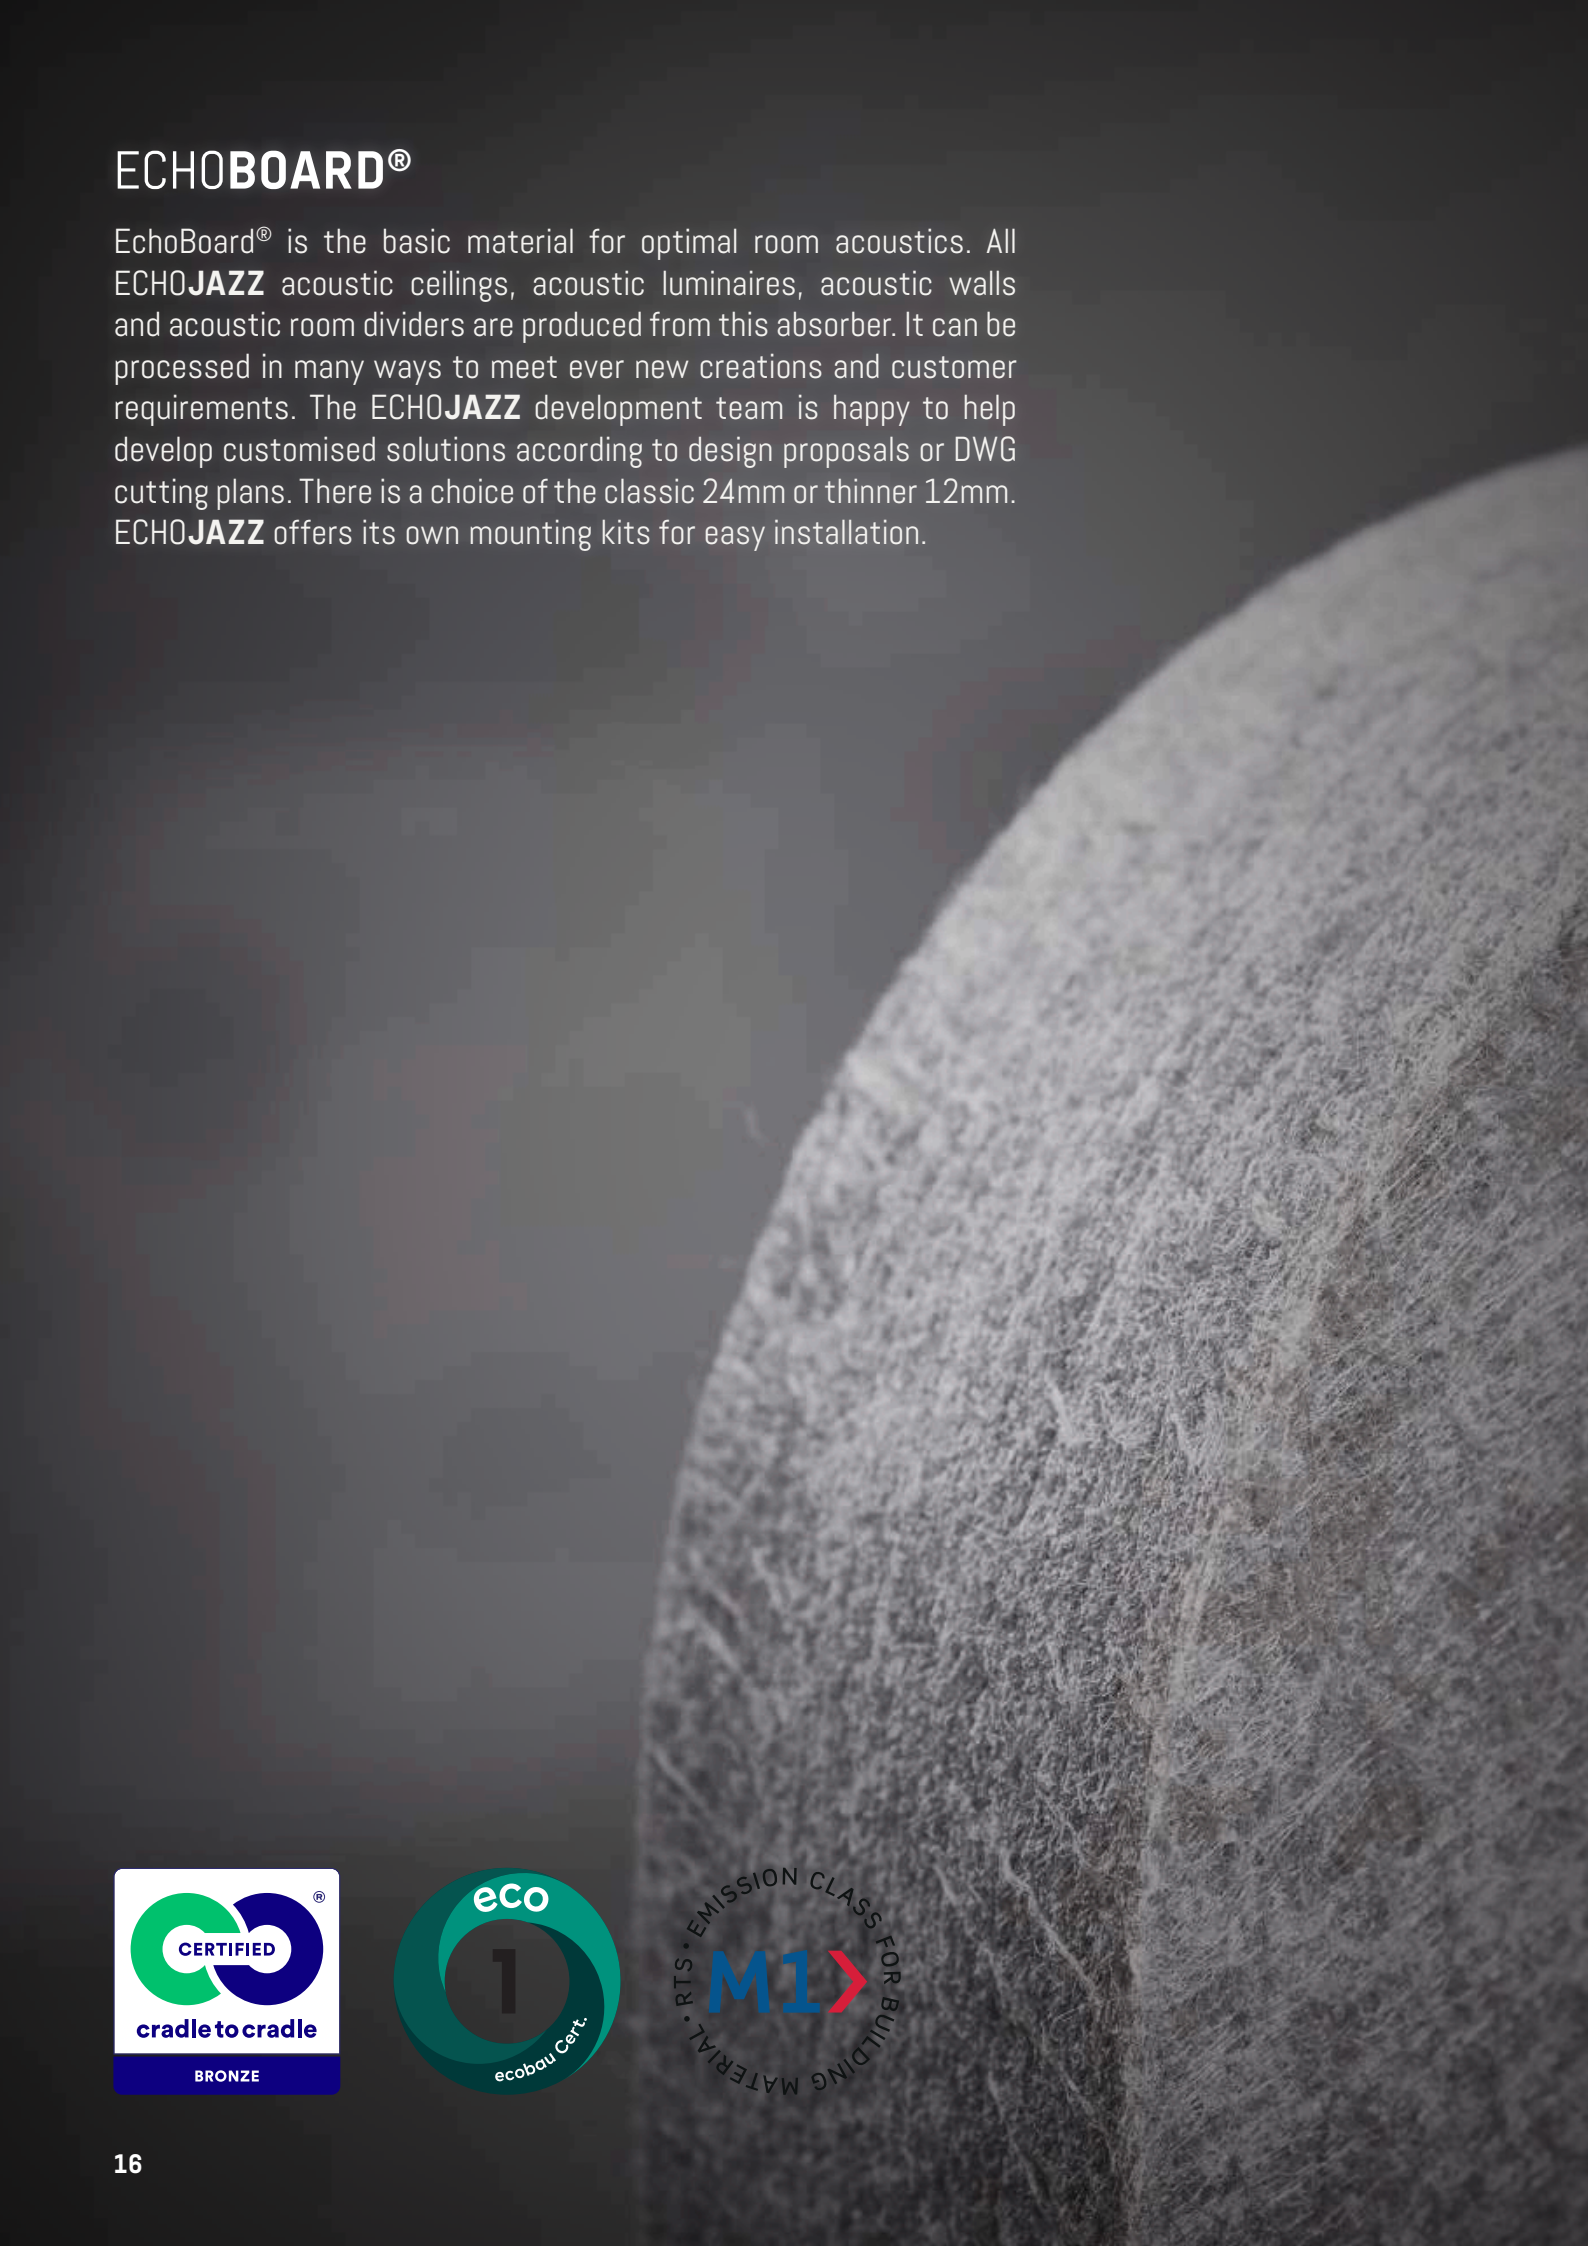


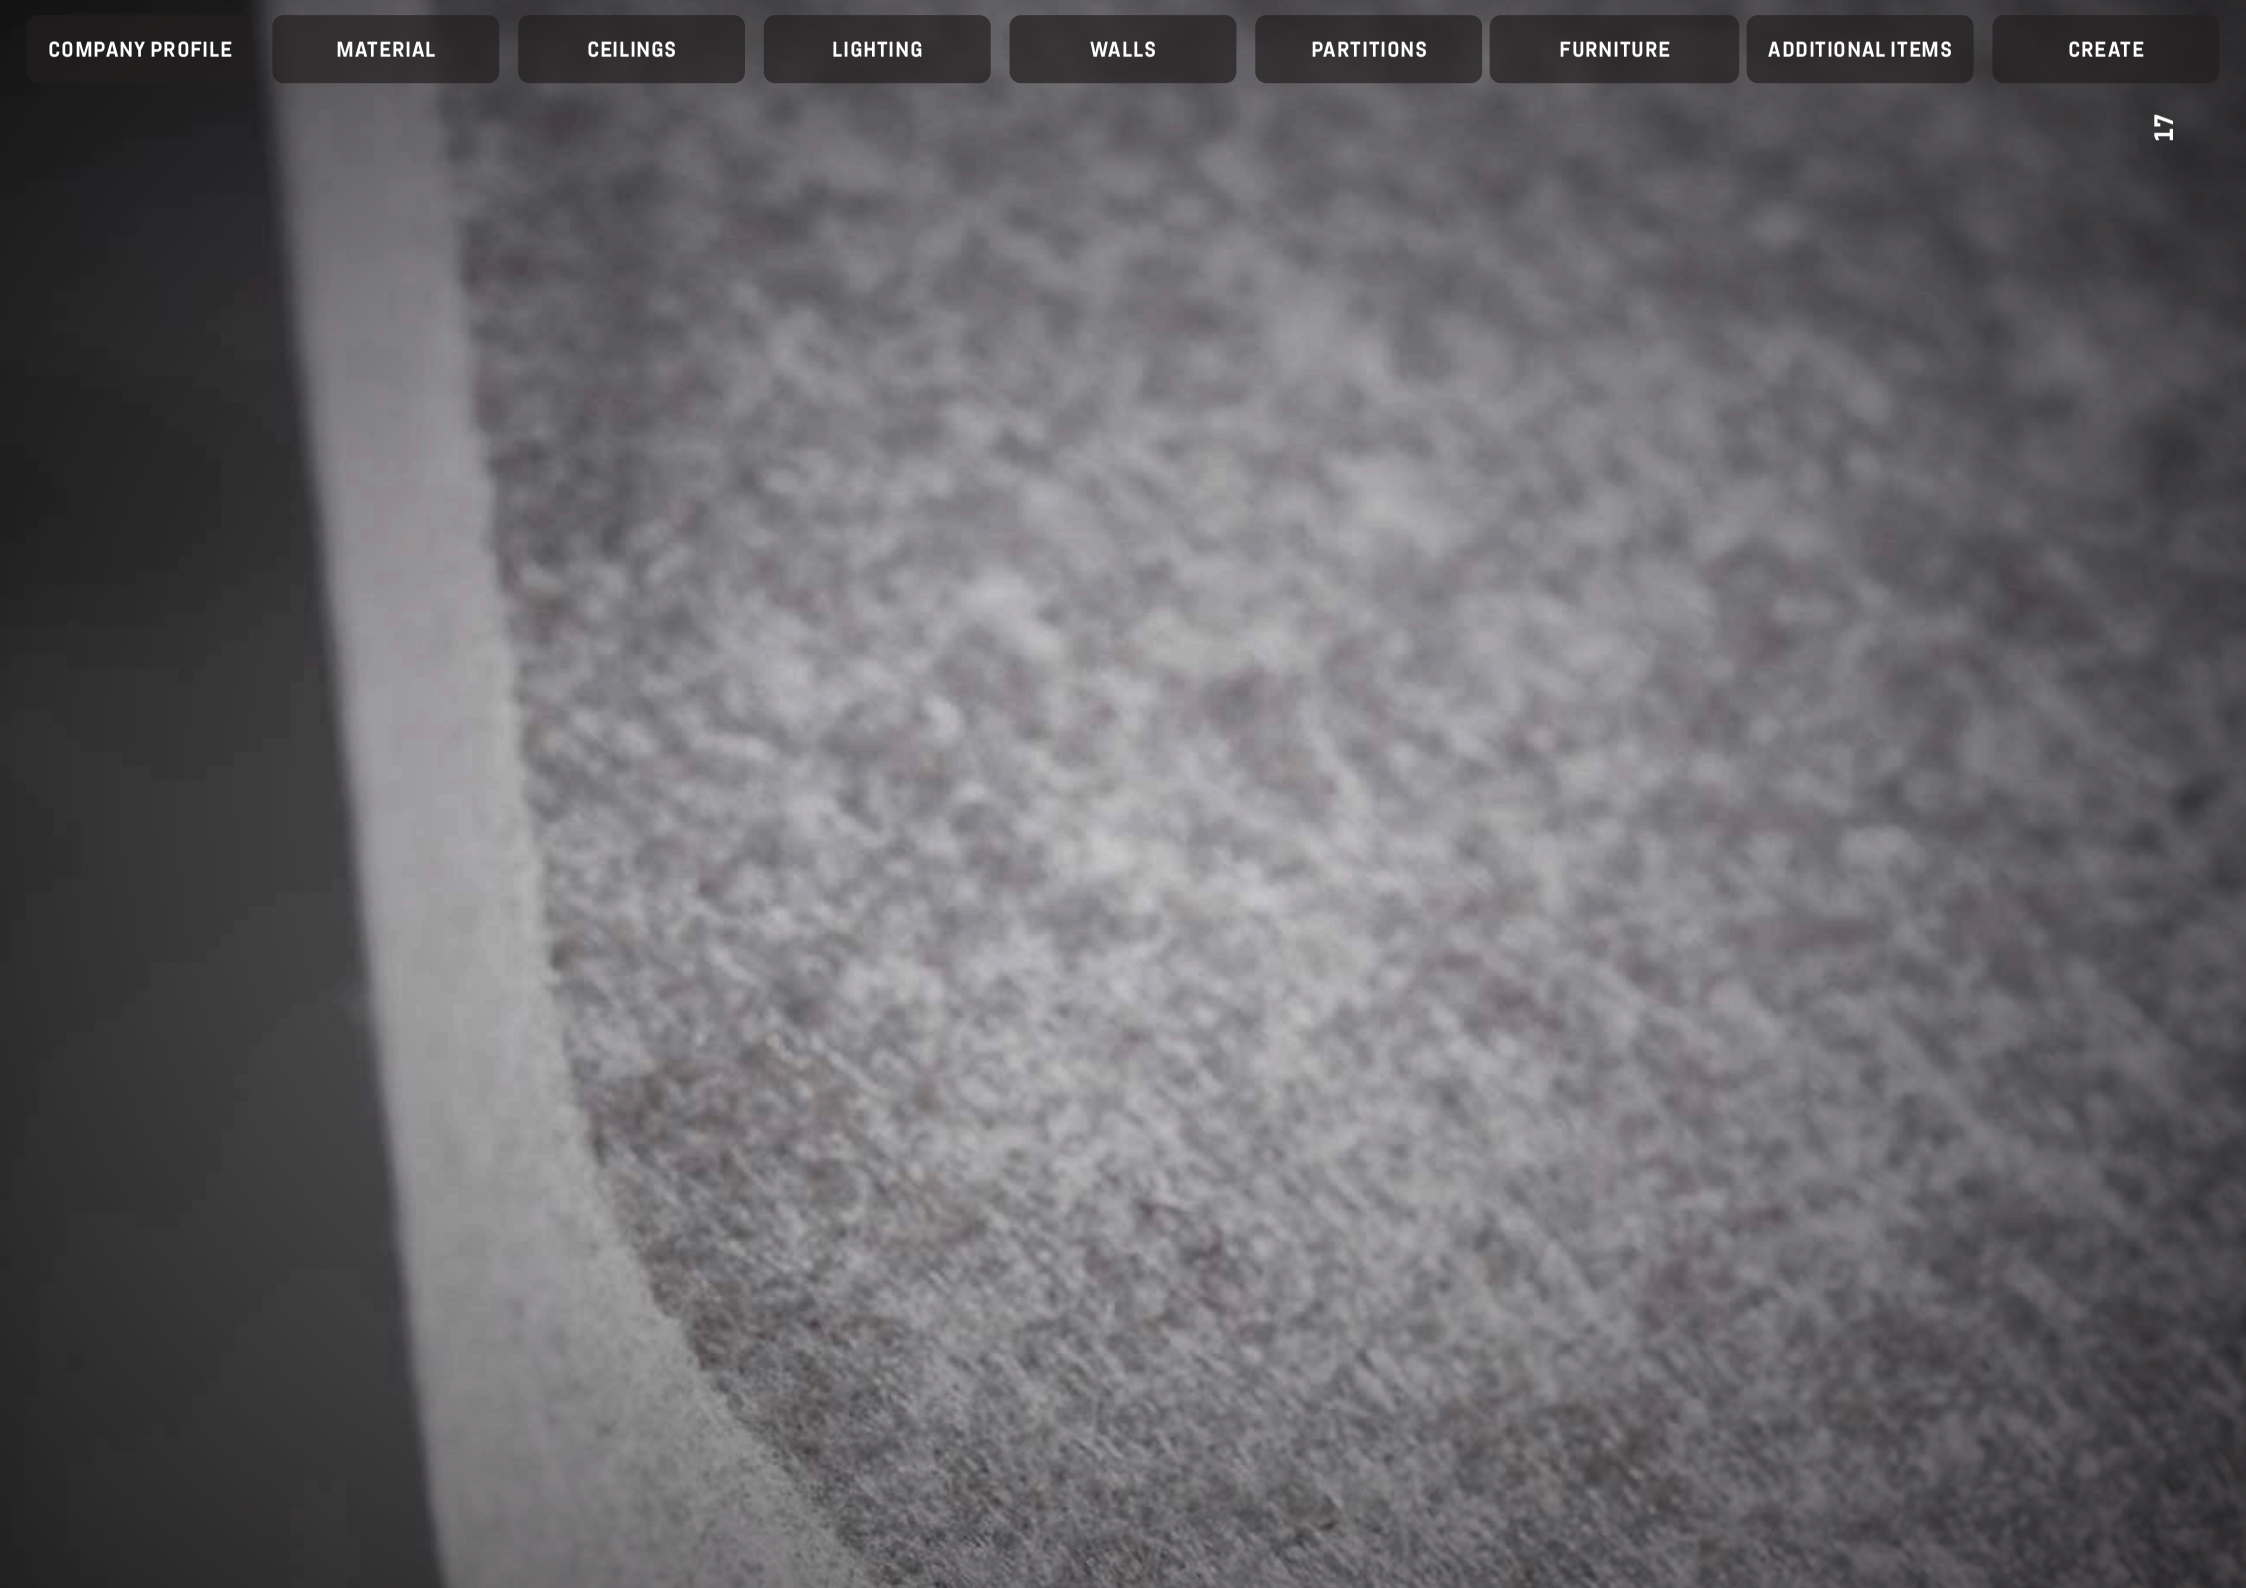
ECHO JAZZ

ACOUSTIC MATERIAL

ECHO**BOARD®**

EchoBoard® is the basic material for optimal room acoustics. All ECHO**JAZZ** acoustic ceilings, acoustic luminaires, acoustic walls and acoustic room dividers are produced from this absorber. It can be processed in many ways to meet ever new creations and customer requirements. The ECHO**JAZZ** development team is happy to help develop customised solutions according to design proposals or DWG cutting plans. There is a choice of the classic 24mm or thinner 12mm. ECHO**JAZZ** offers its own mounting kits for easy installation.





ECHO**BOARD® 12MM**

EchoBoard® 12mm is a high-quality sound absorber with an aw of up to 0.90 and a NRC of up to 0.85, which can be used for ceilings, walls, on tables or freely in space.
Absorption coefficient: aw 0.90, class A

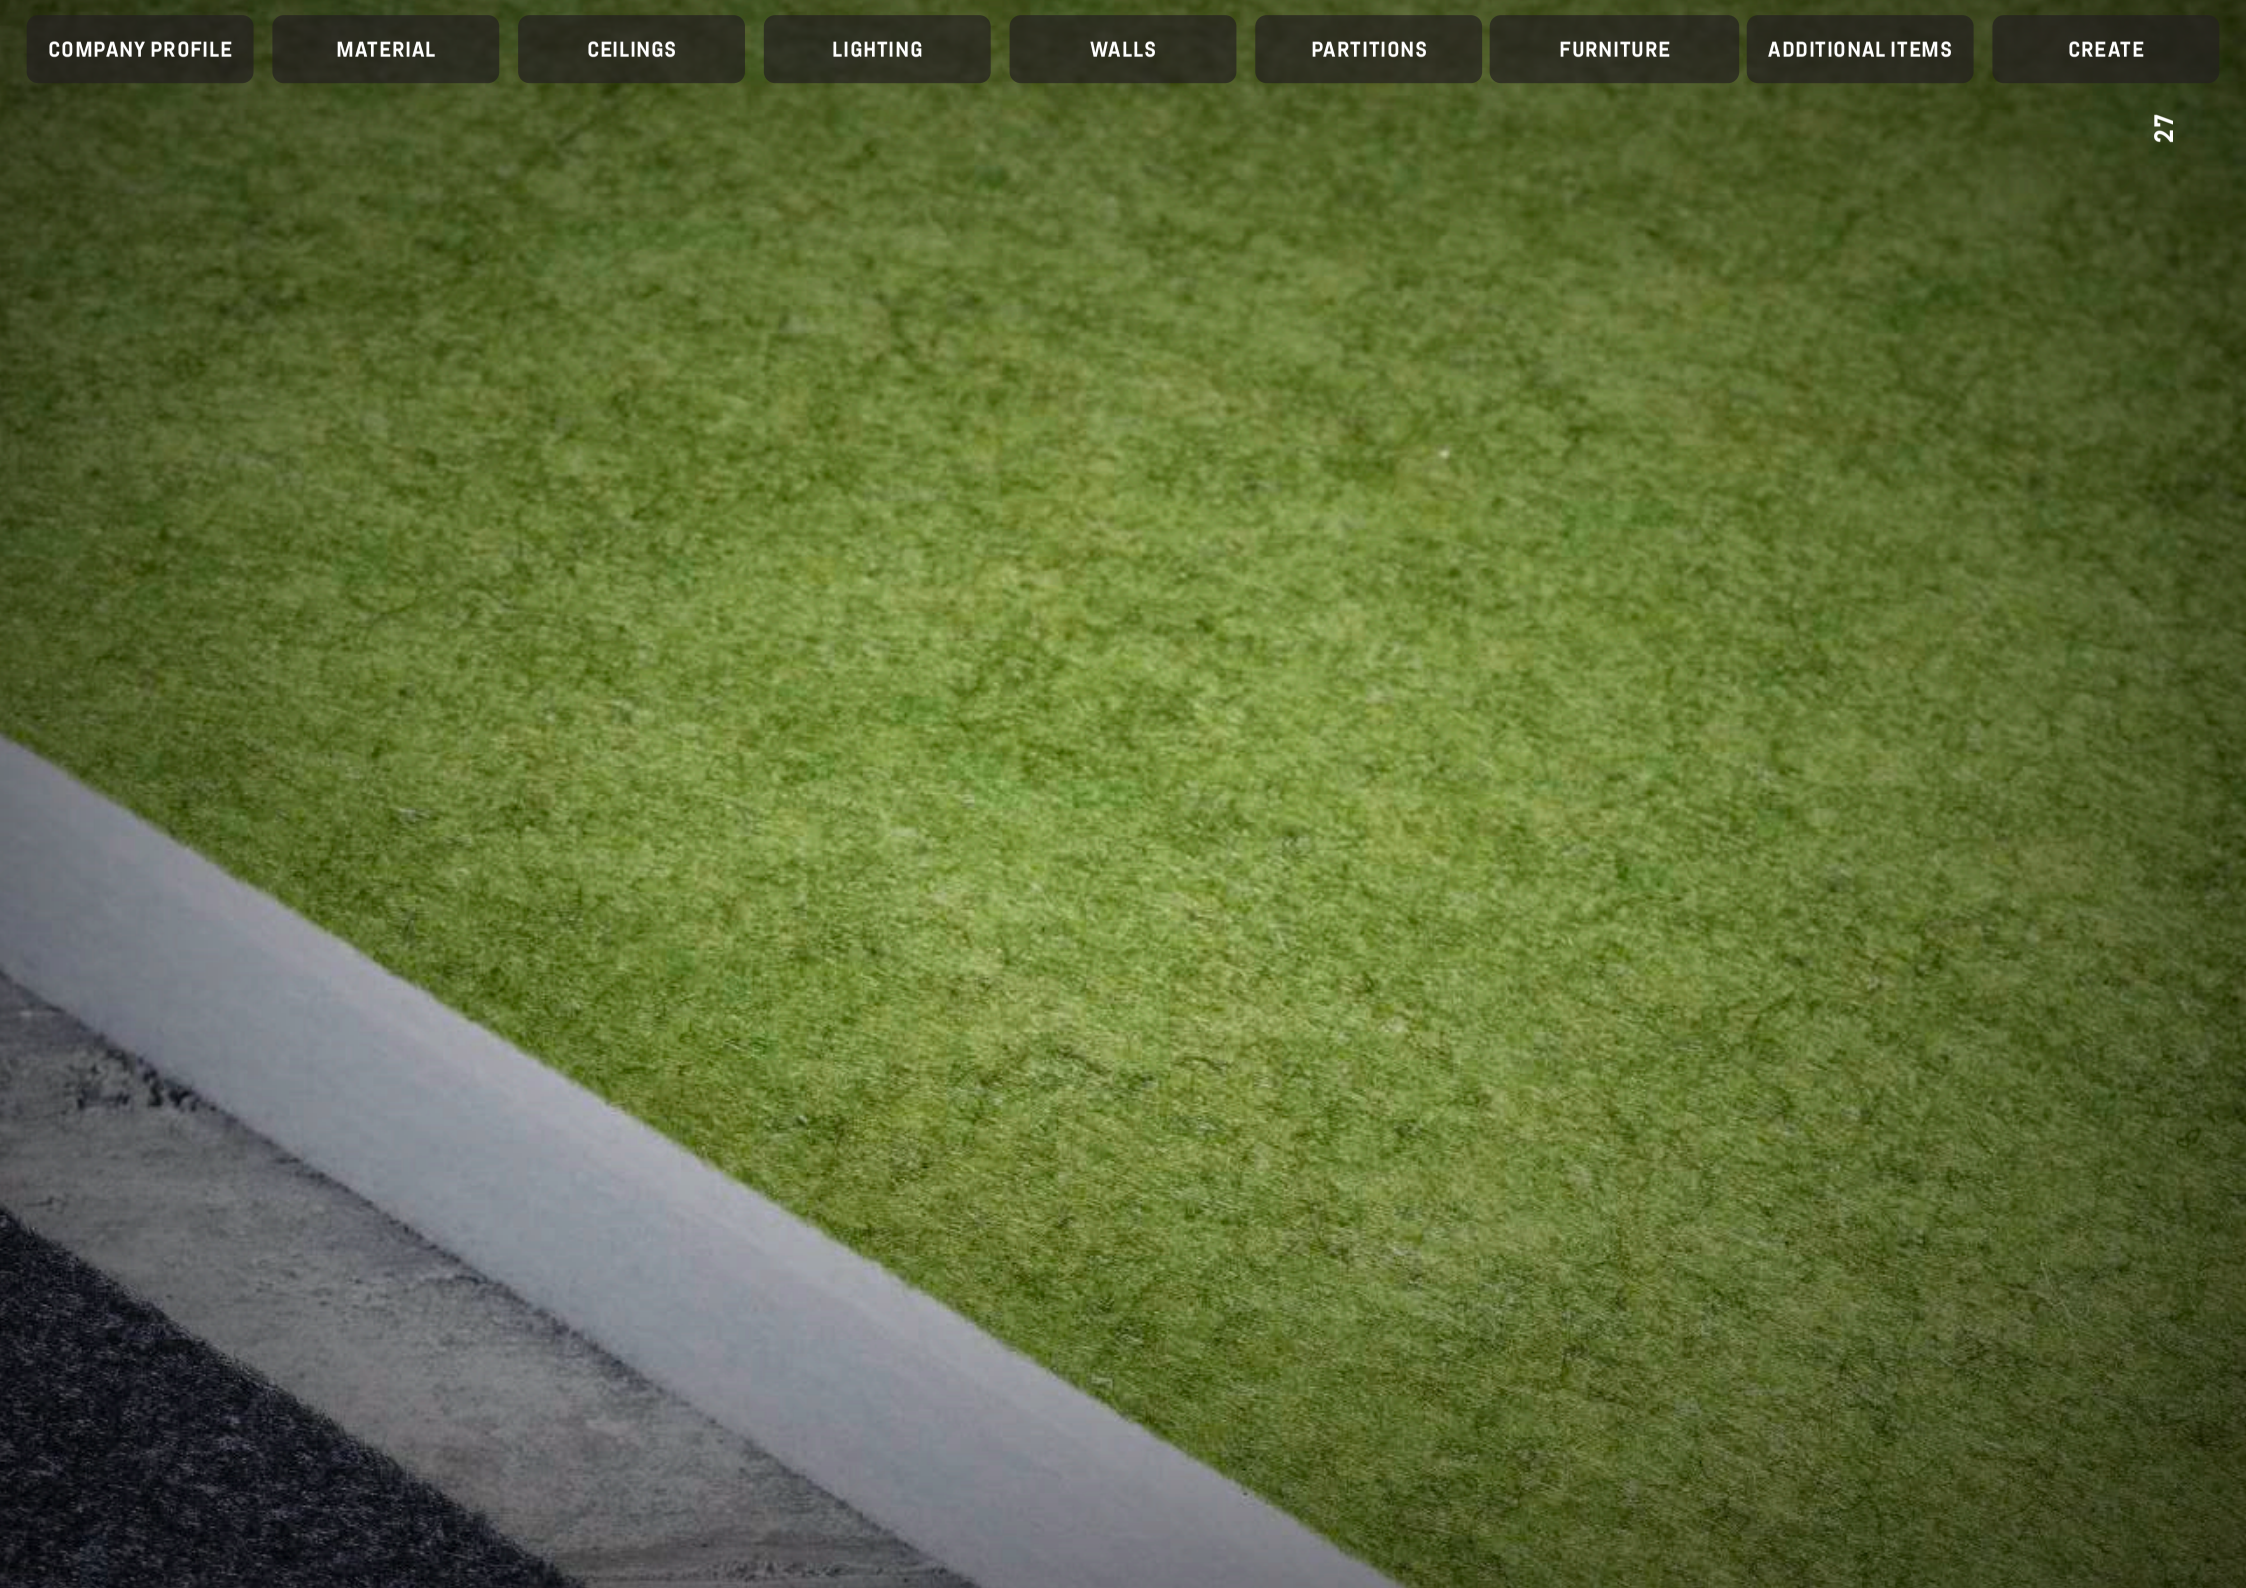
ECHO**COUSTIC®**

The special EchoCoustic® absorber is the ideal material for direct mounting on walls or ceilings without spacing or substructure. The 3-layer EchoCoustic® achieves an excellent absorption levels of aw 0.80 and NRW 0.85 with a thickness of only 25mm. EchoCoustic® can be easily applied with spray adhesive, the white core material remains intentionally visible or concealed by a profile frame. EchoCoustic® is available in 34 colours, as an additional design element a two-colour effect can be created by spacing the panels.



ECHO**COUSTIC® 25MM**

EchoCoustic® 25mm is a high quality sound absorber with an aw of up to 0.90 and a NRC of up to 0.90, which can be mounted on walls and ceilings without spacing.
Absorption coefficient: aw 0.90, class A

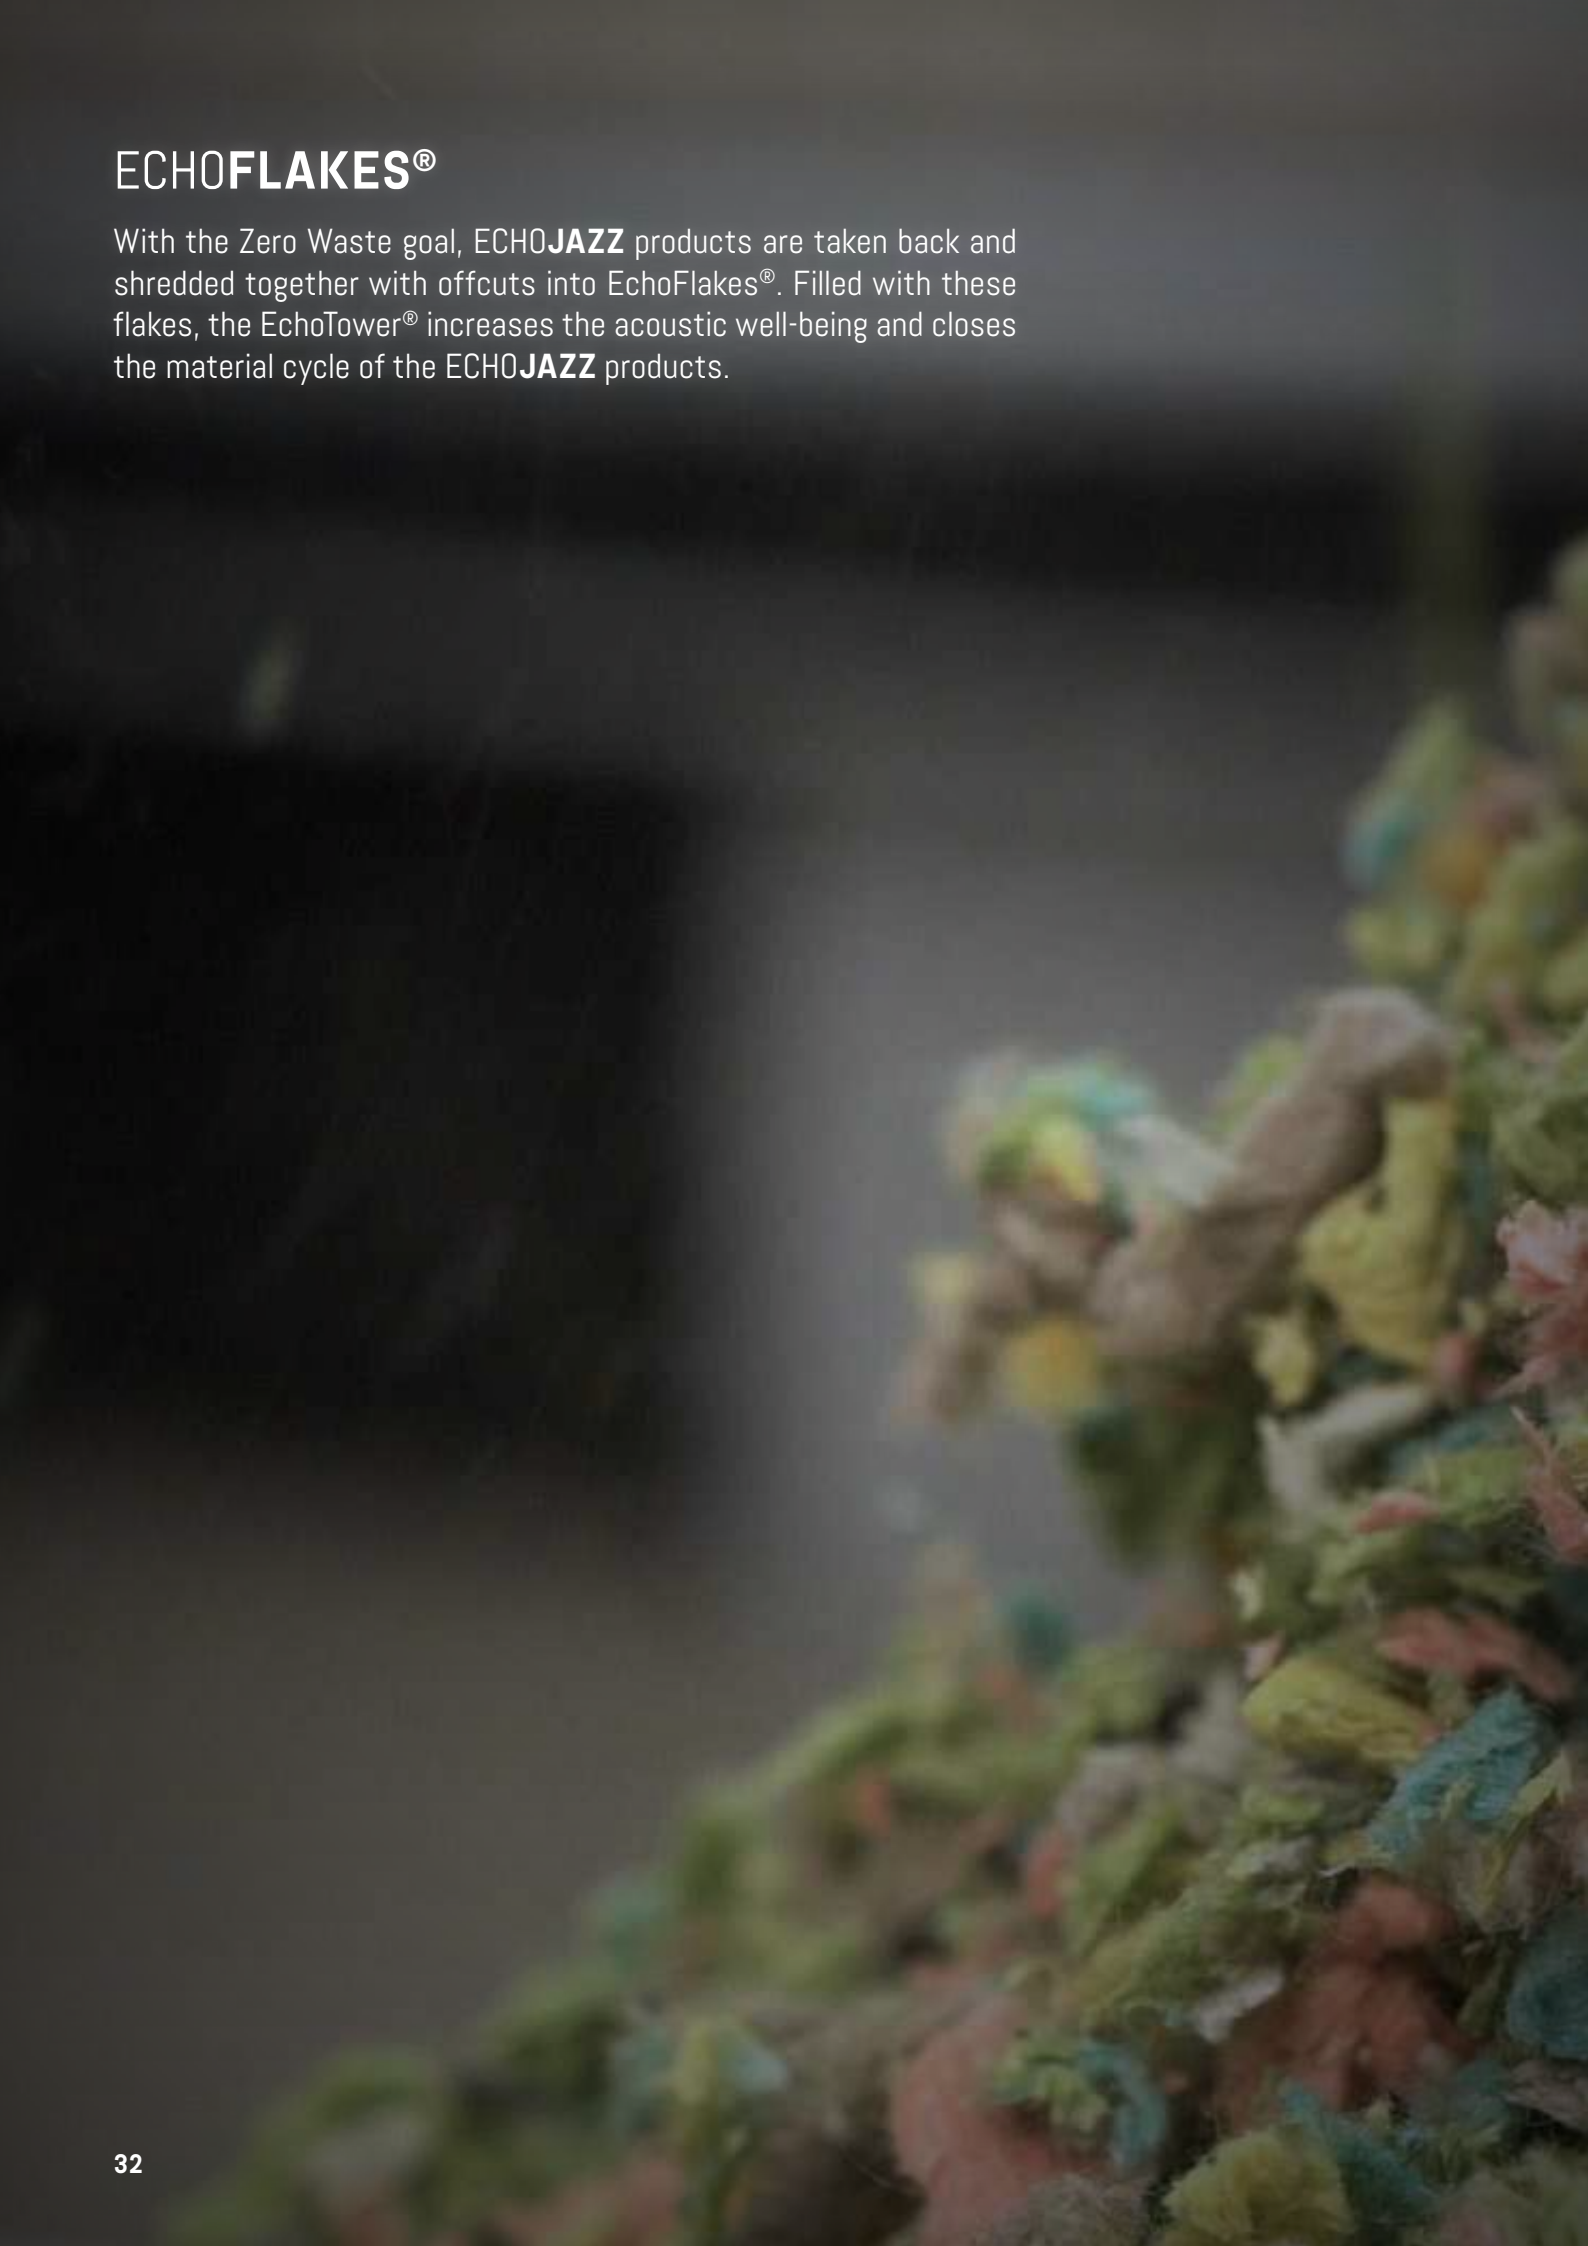
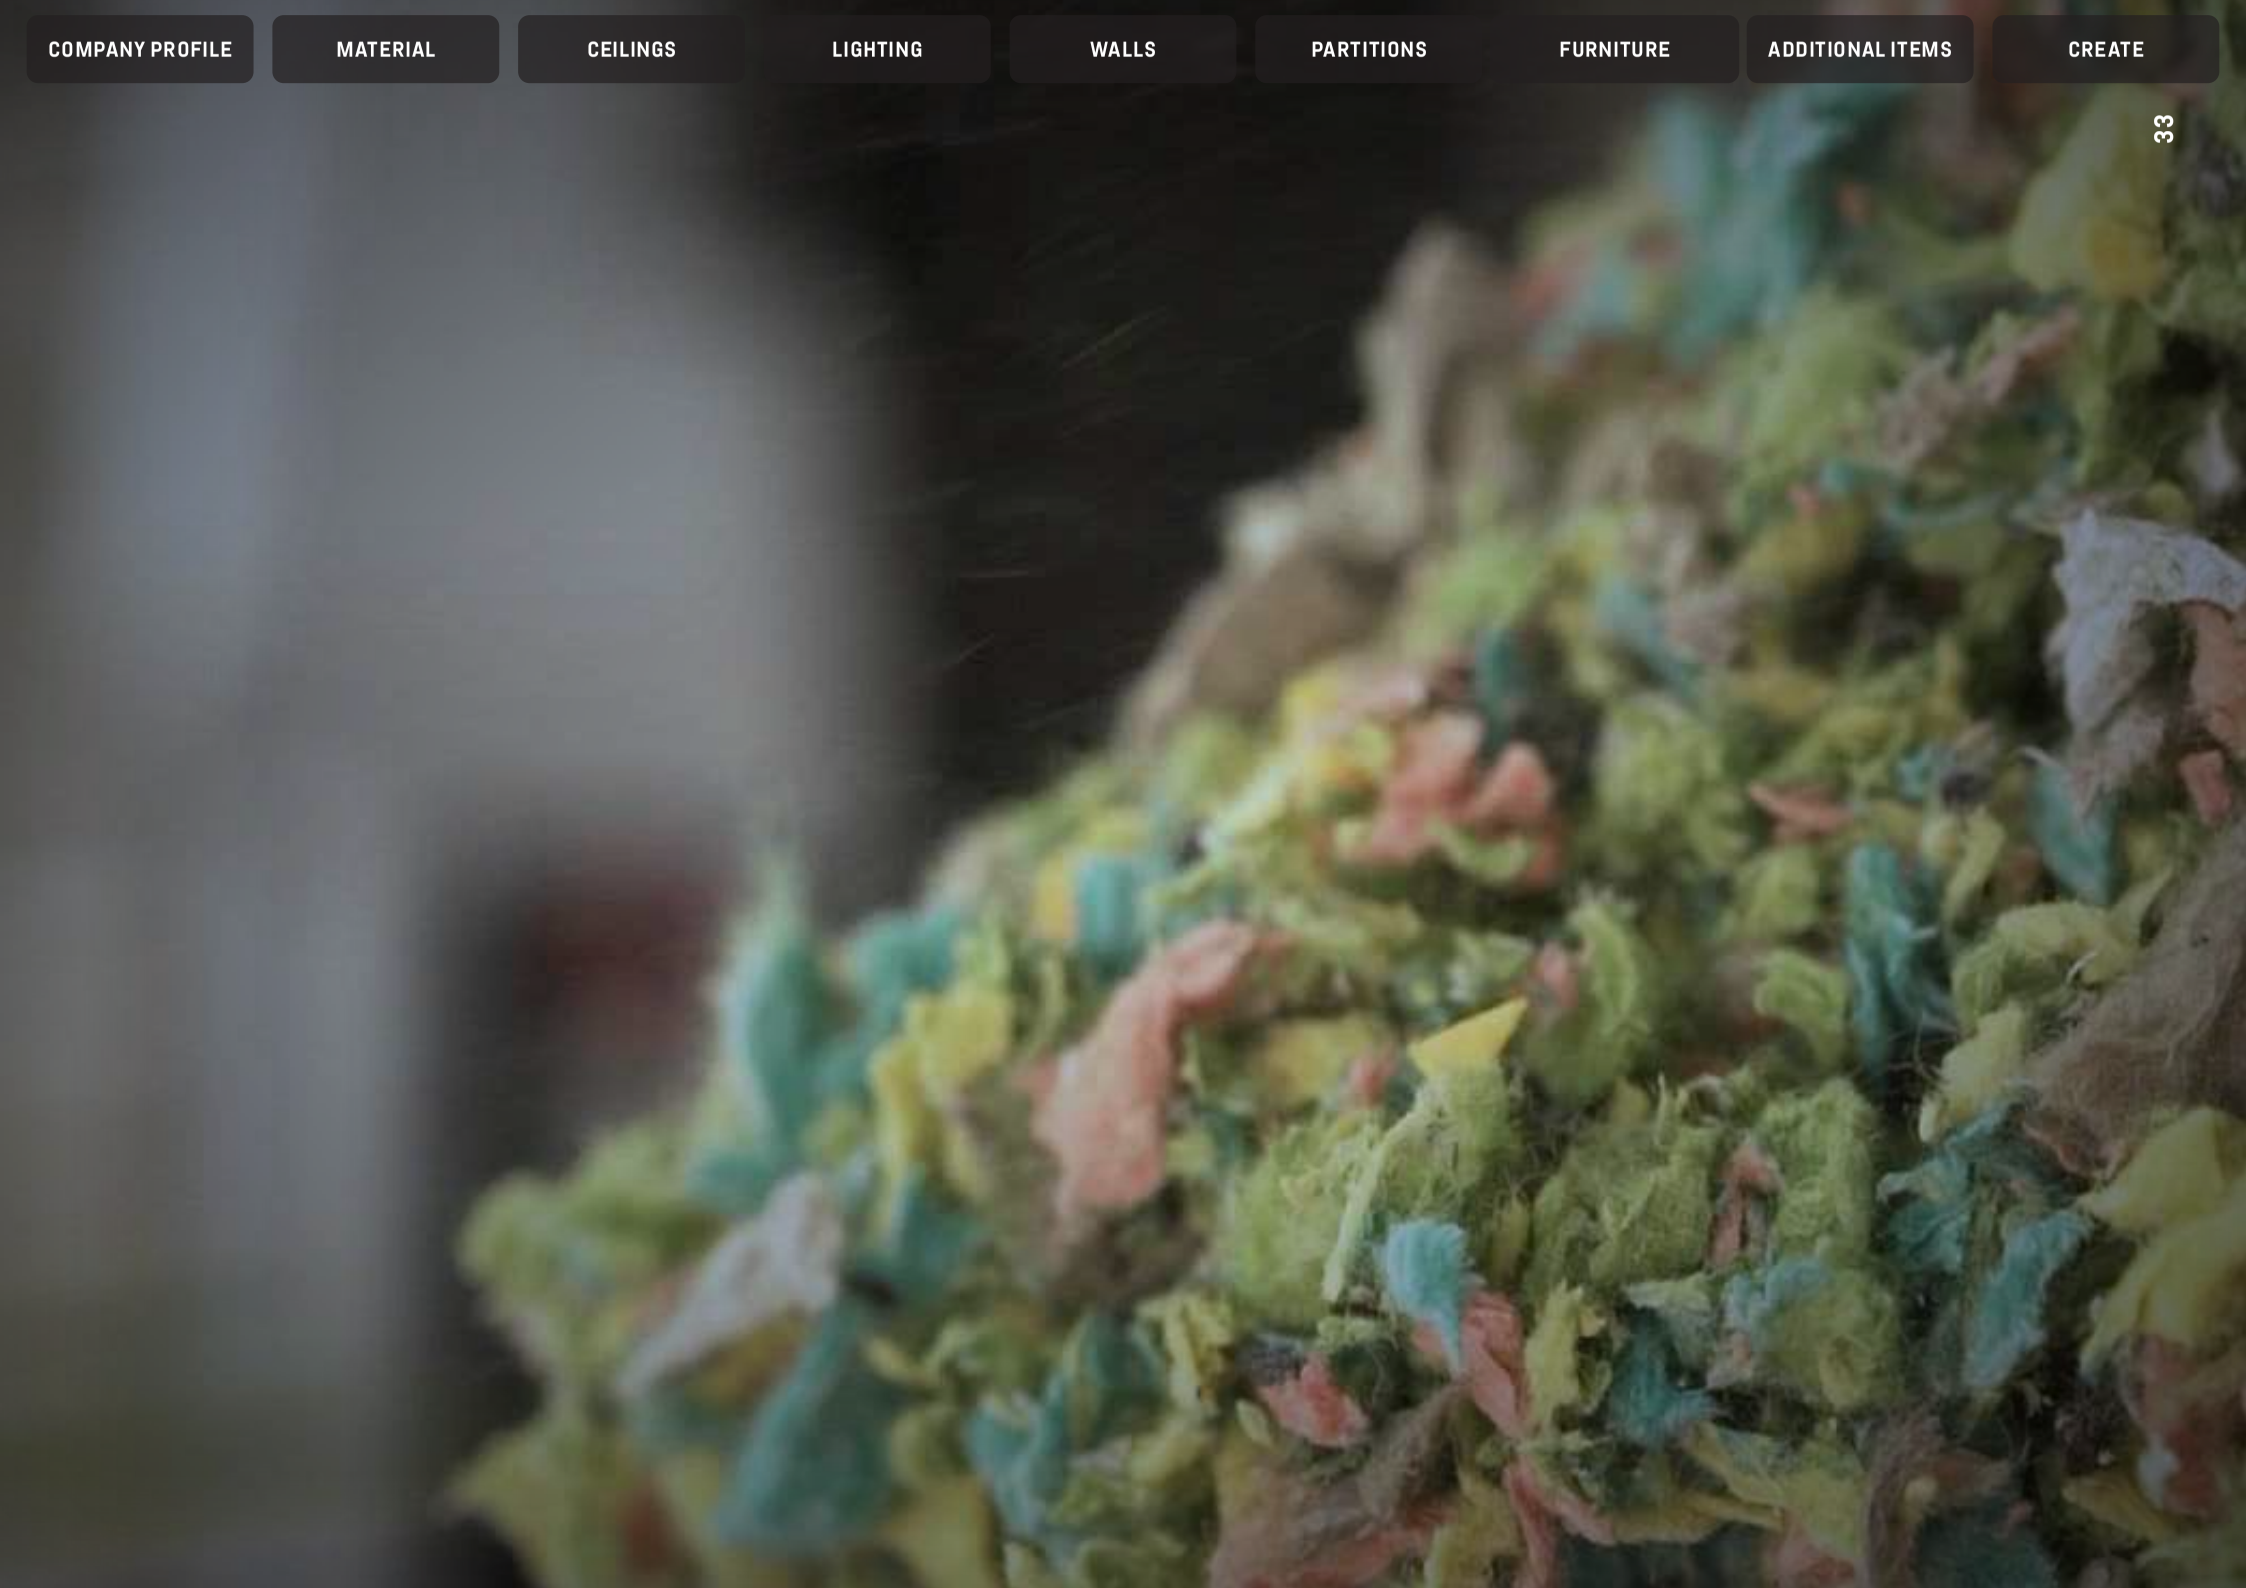
ECHO**FLAKES®**

With the Zero Waste goal, ECHO**JAZZ** products are taken back and shredded together with offcuts into EchoFlakes®. Filled with these flakes, the EchoTower® increases the acoustic well-being and closes the material cycle of the ECHO**JAZZ** products.

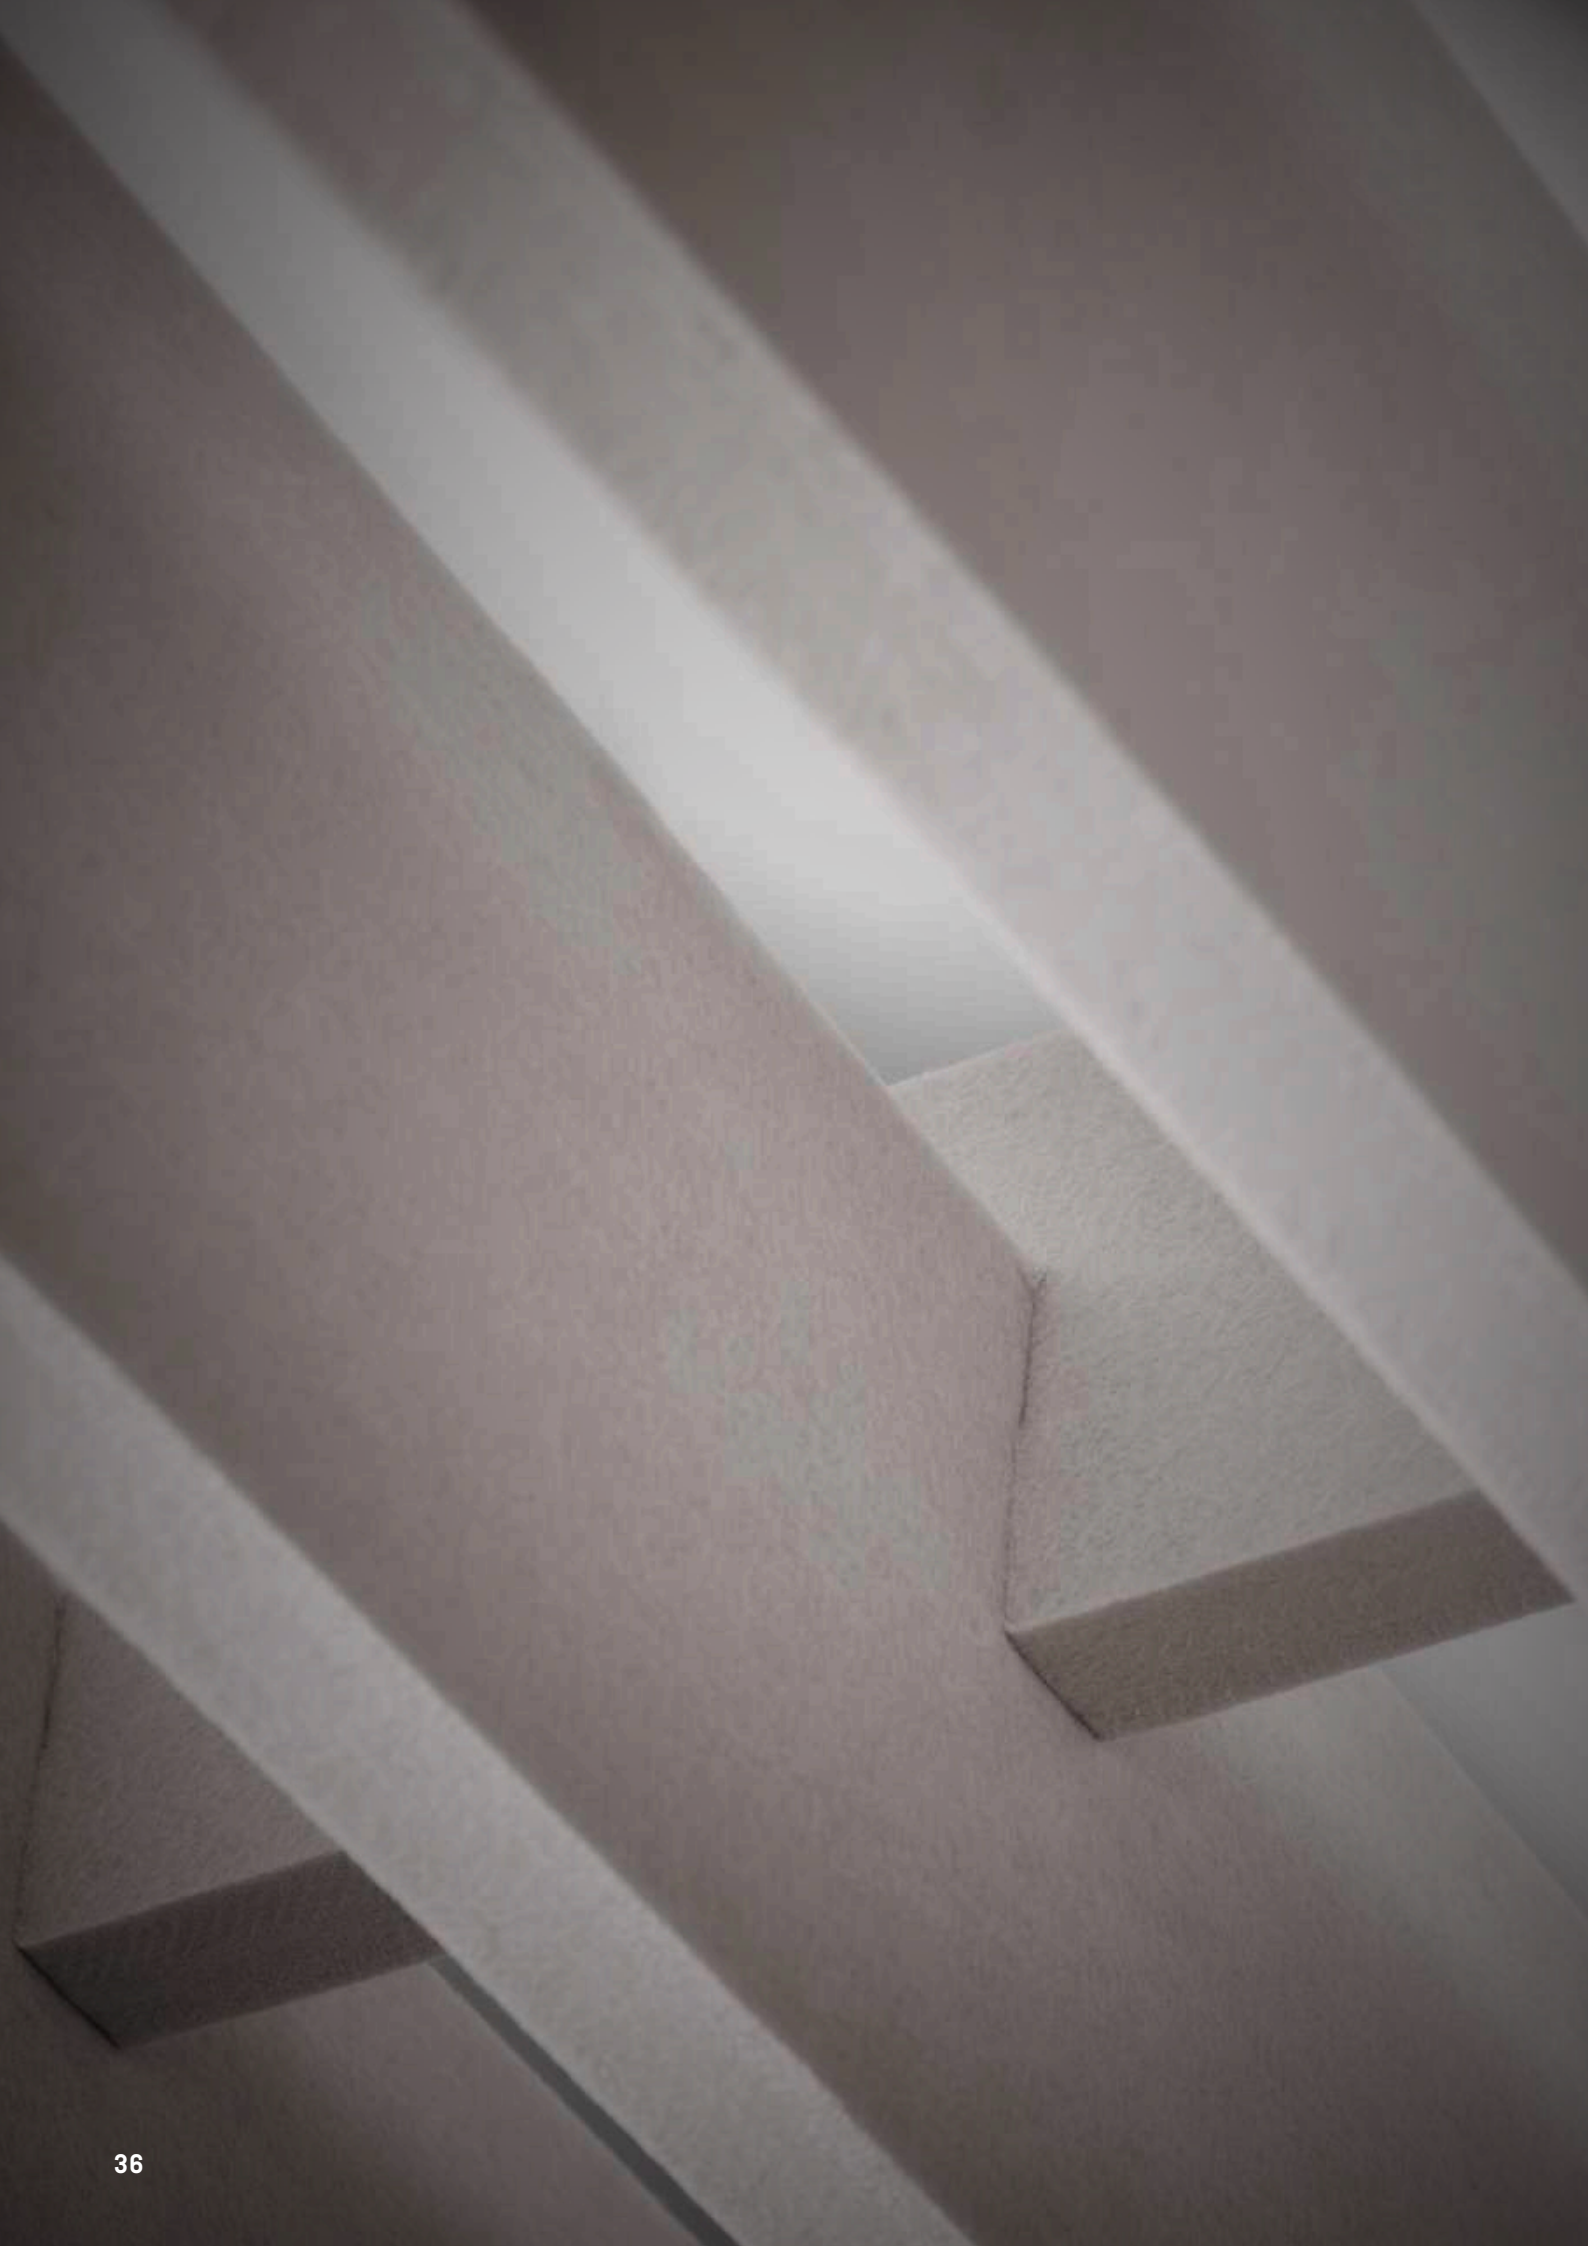




Customised high-performance sound absorbers for a noticeable improvement in well-being and room quality. ECHO**JAZZ** products are made from recycled PET bottles. 100% Swiss design, 100% zero waste.

ECHO JAZZ

ACOUSTIC PRODUCTS



ACOUSTIC-CEILINGS

Ceilings of rooms often offer the most space for optimising room acoustics. ECHO**JAZZ** acoustic ceilings allow sound absorption for the highest demands, are adapted to the millimetre and can be optimally integrated into any room architecture.

ECHO**ORBIT®**

The EchoOrbit® ceiling sail is the perfect solution to acoustical calm noisy rooms. Three-dimensional diamond facets dampen the noise level and act as a diffuser for sound waves. Additional elements can be added seamlessly thanks to the hexagonal shape, allowing for stunning ceiling designs with spectacular arrangements and colour combinations. Installation is efficient thanks to only one height-adjustable suspension per element and supplied fasteners.

Say goodbye to unwanted noise and immerse yourself in a heavenly, futuristic silence with EchoOrbit®.

ECHO**ORBIT® 24MM**

Acoustic absorber for ceilings with textile surface made from 100% PET. EchoOrbit® is suspended with safety hooks.
Please specify suspension type when ordering.
Absorption coefficien: aw 1.00, class A

ECHO**ORBIT® 24MM**
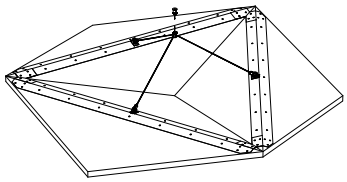
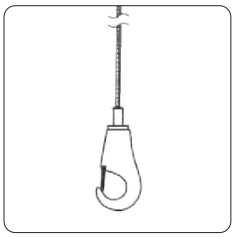
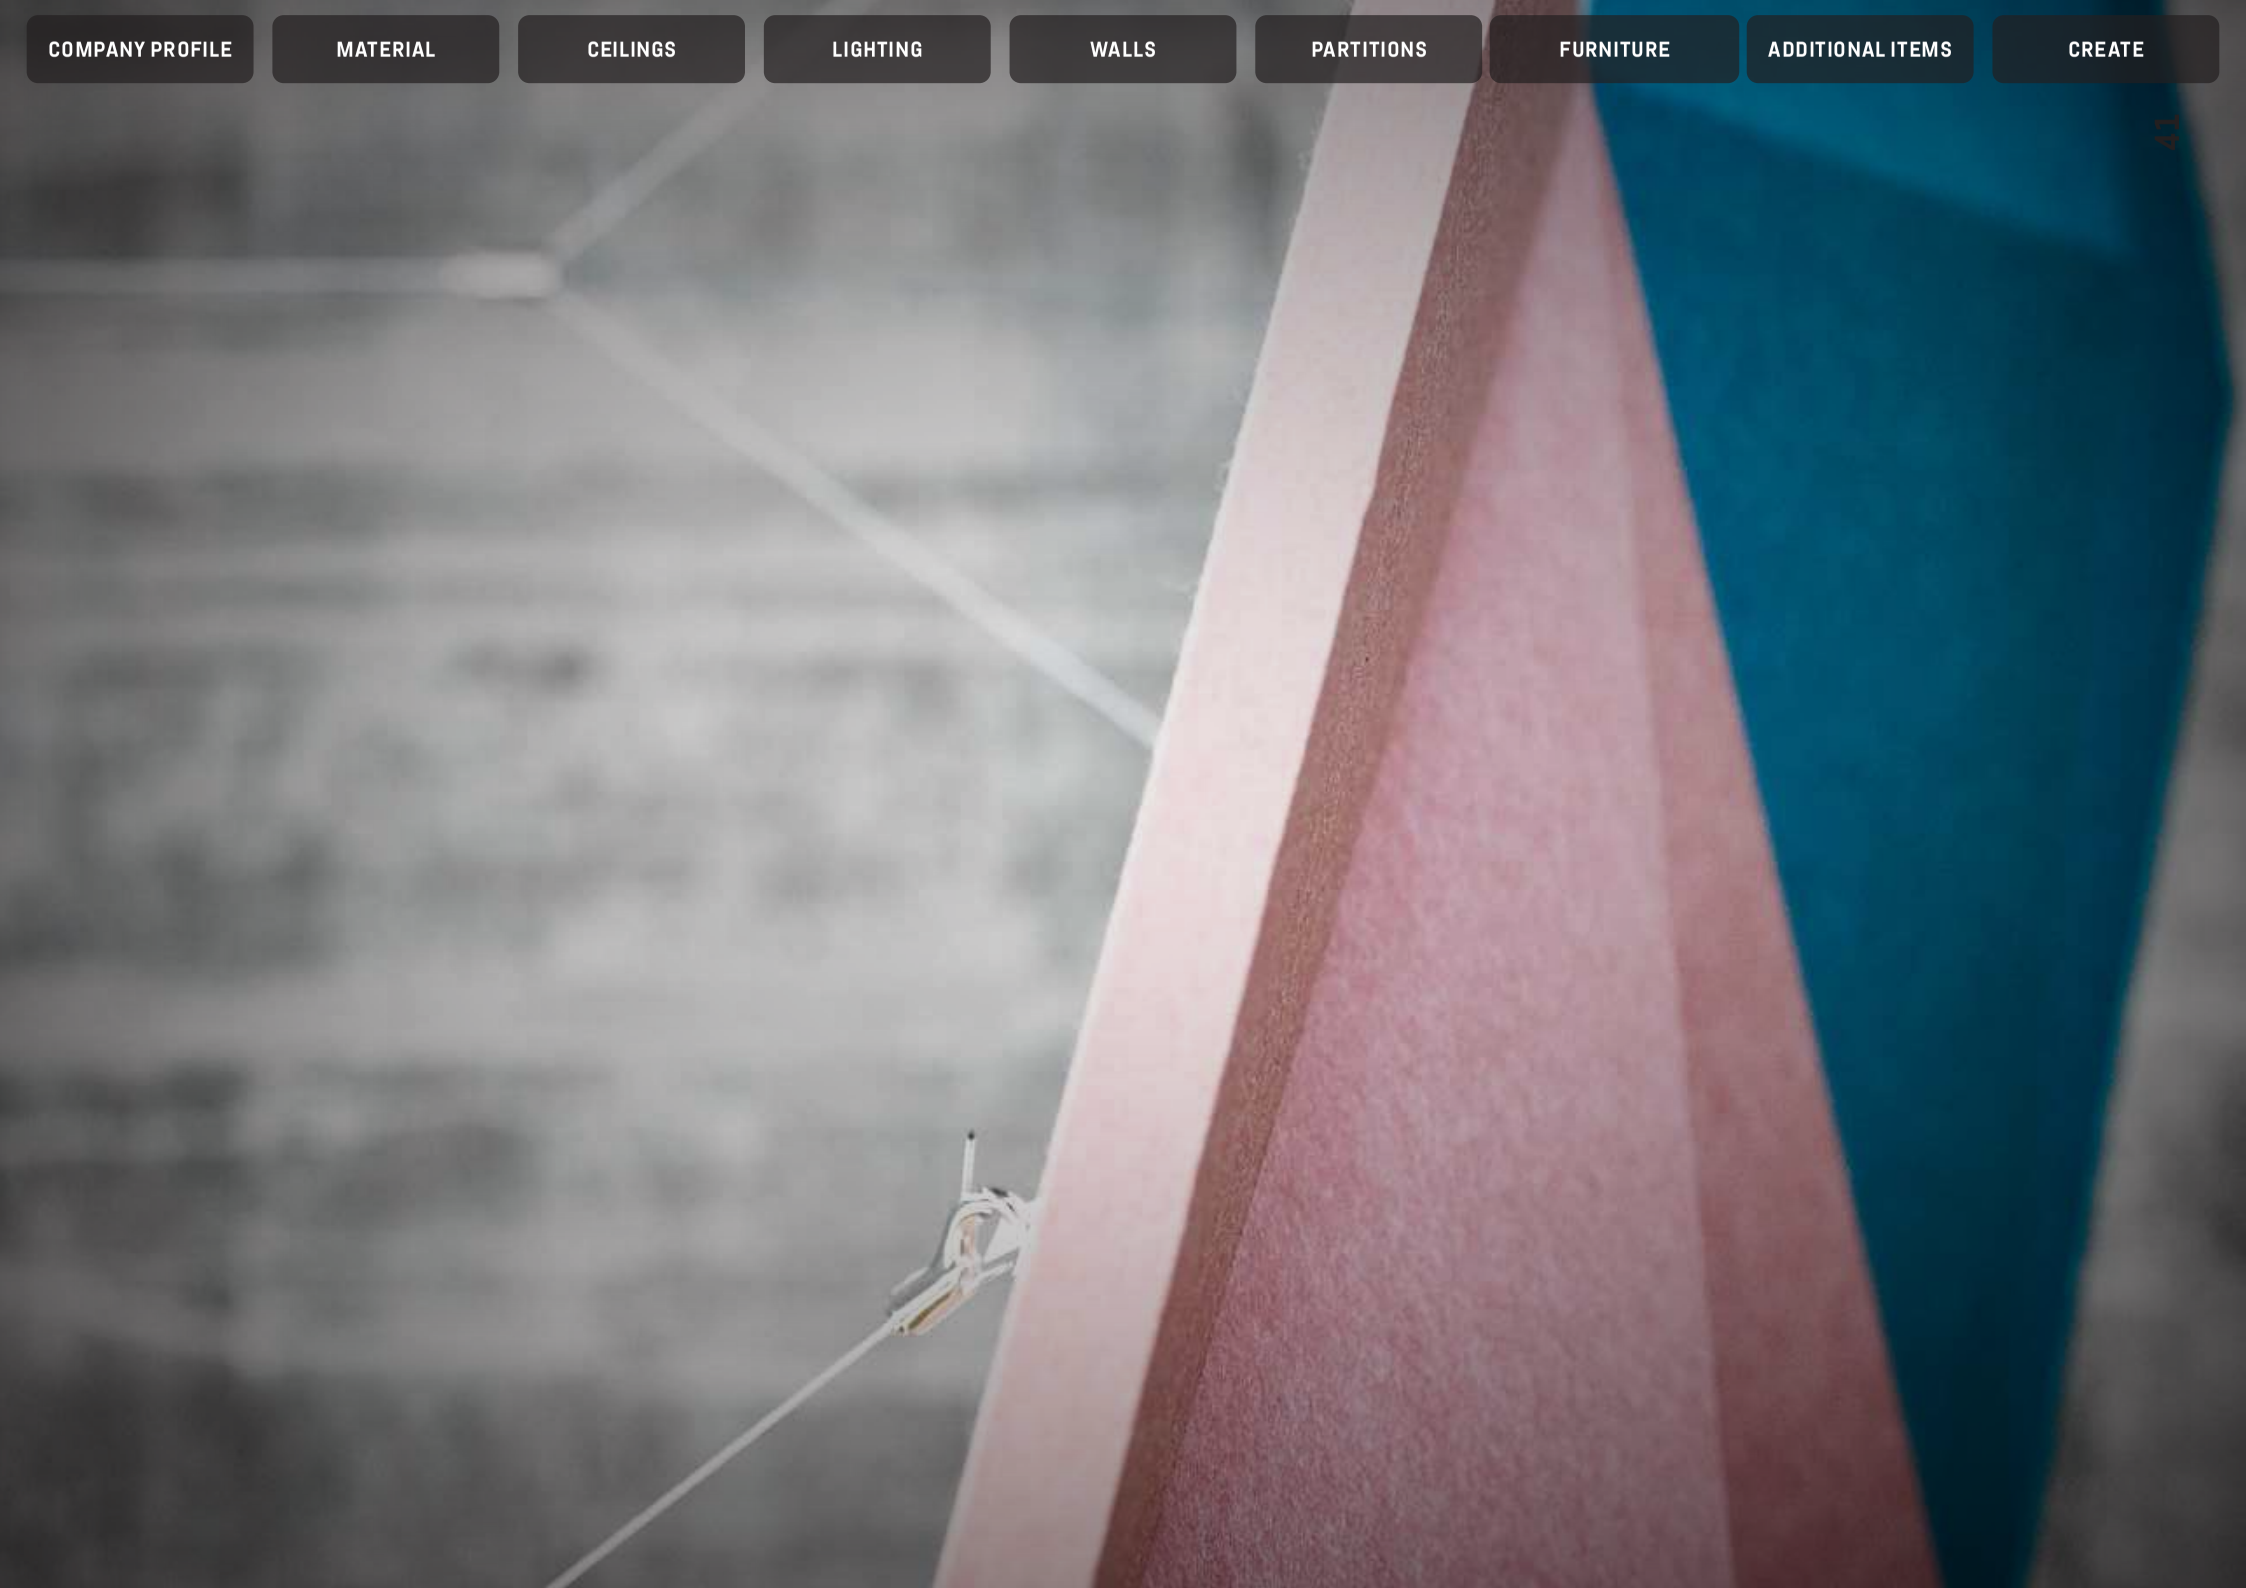
ONE SUSPENSION POINT



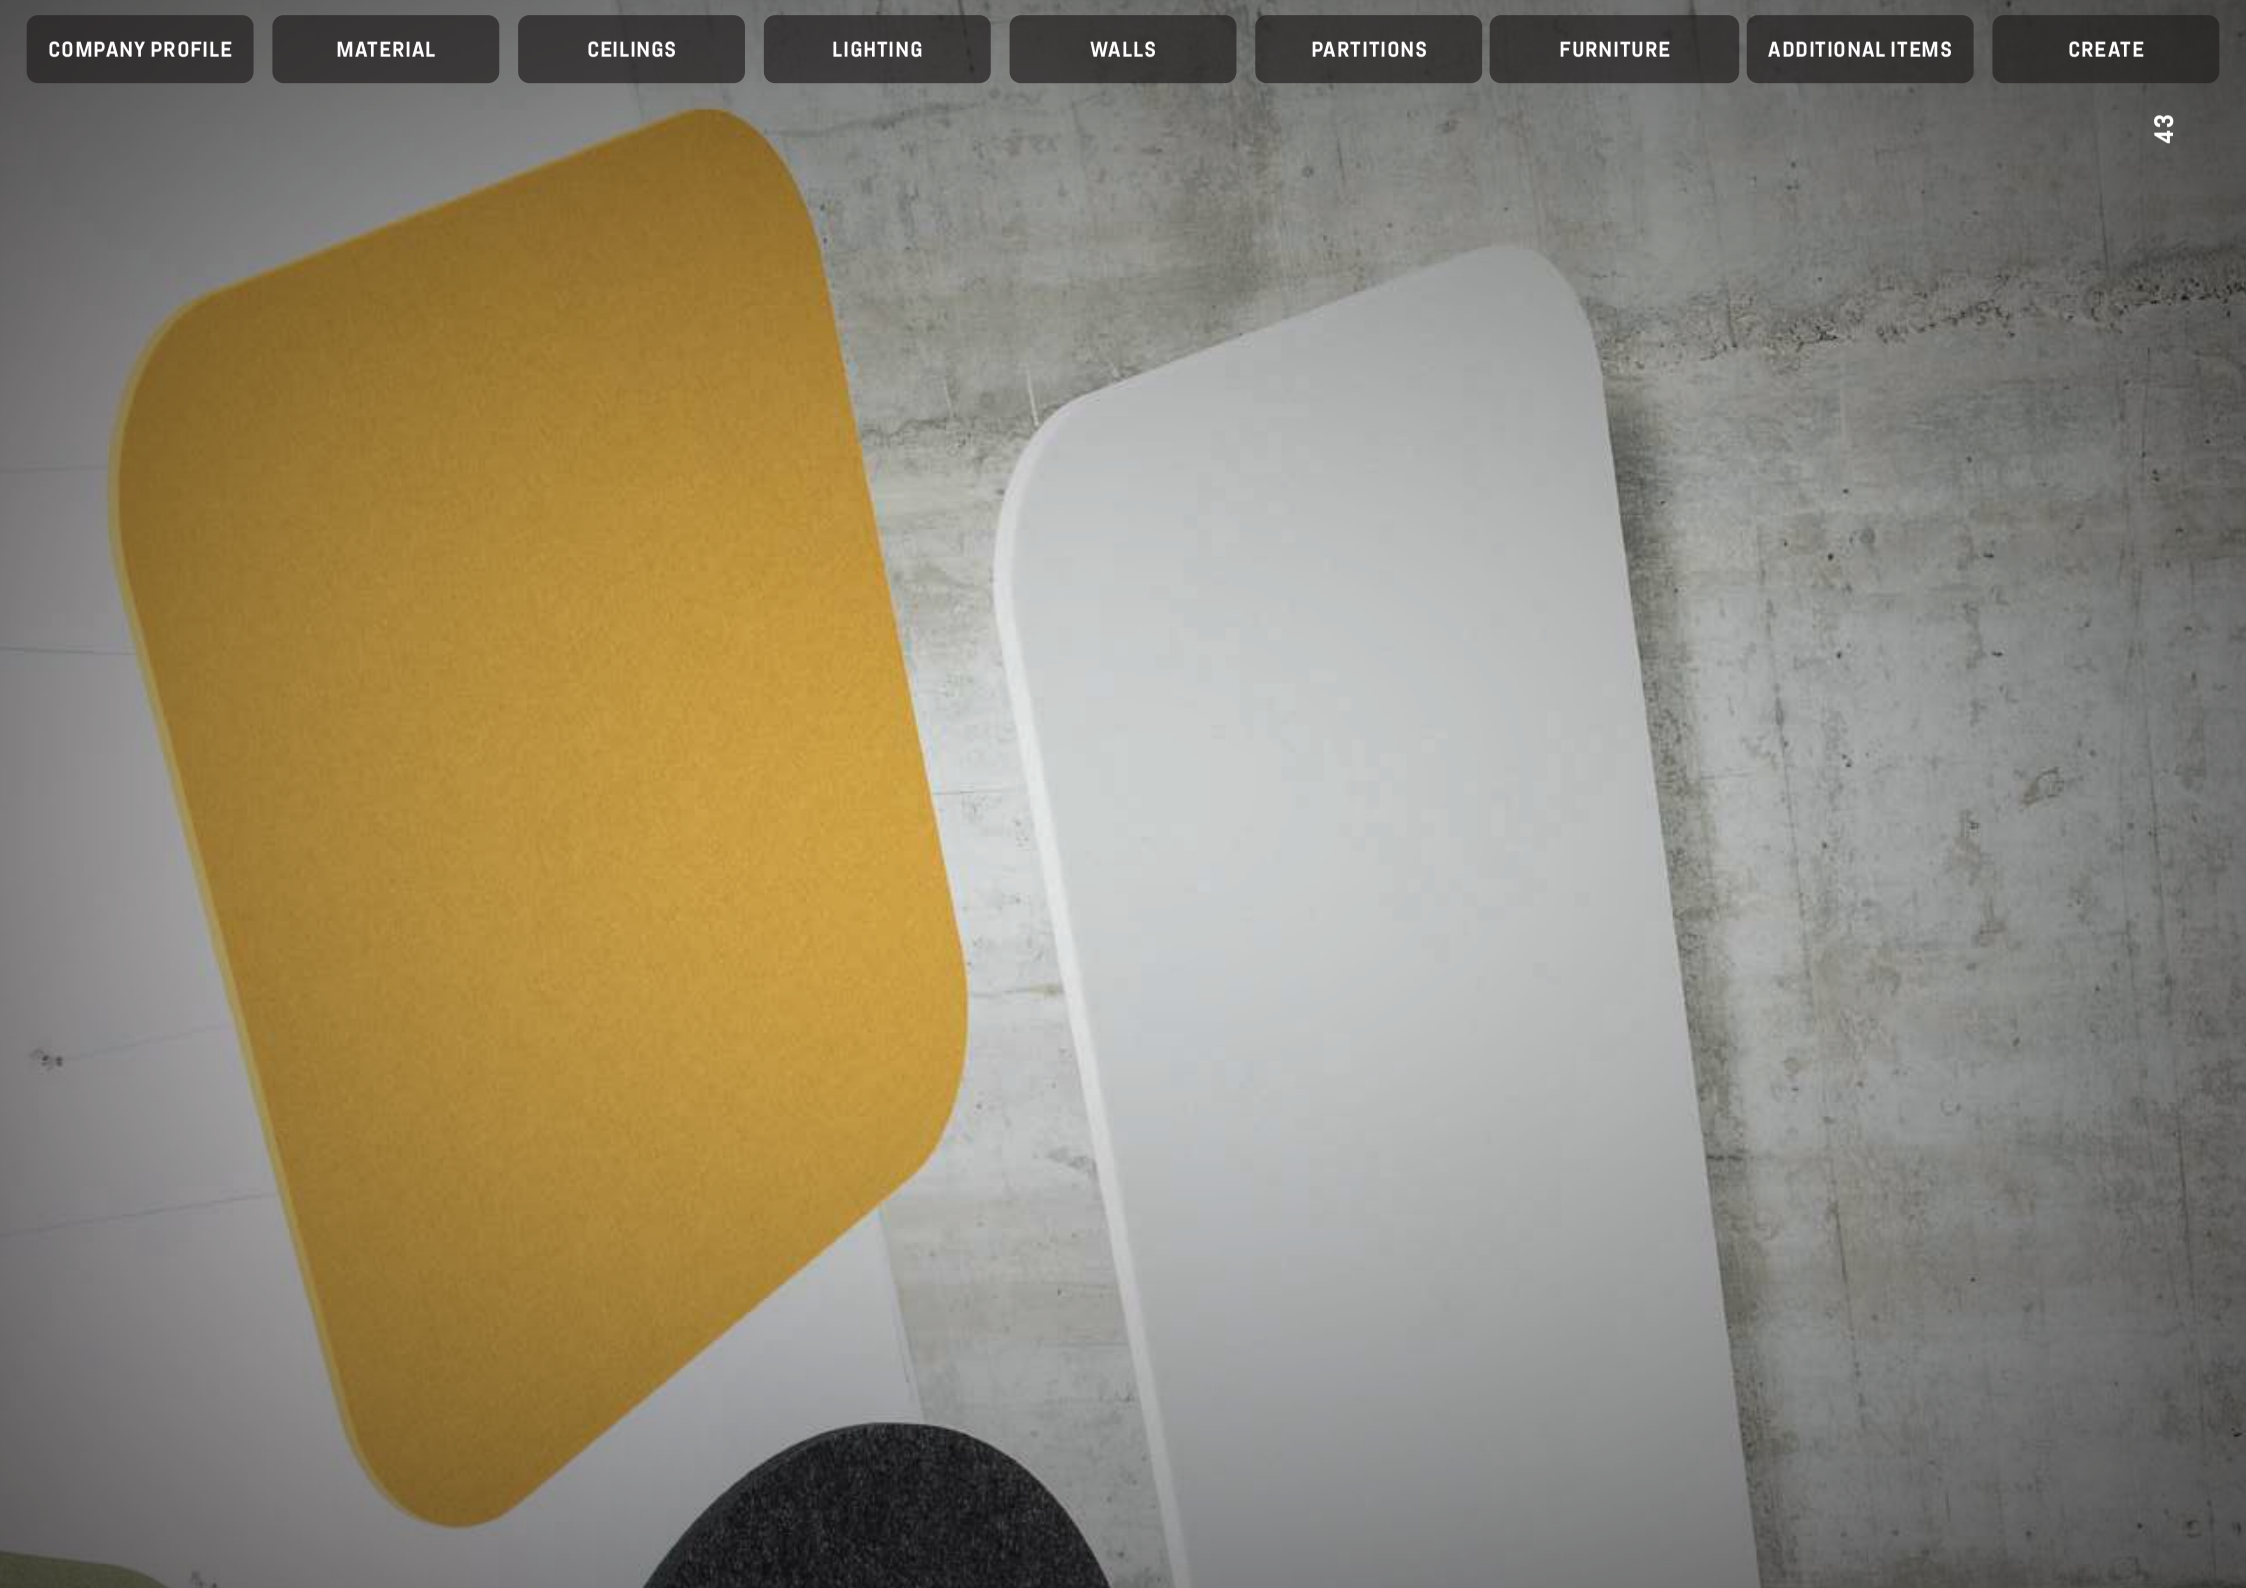


SAFETY HOOK



ECHO**SAIL®**

Acoustic sails are the key to defining room design and improving acoustics over large areas without affecting the layout of the room. The lightweight and maintenance-free elements can be cut to any shape and angle. The EchoSail® is screwed directly and suspended horizontally up to a length of 1000 mm; larger panels are suspended with frames and safety hooks.



ECHO**SAIL® 12MM**

Acoustic sails in various shapes and surface designs incl. suspension system up to 1500mm. The EchoSail® is suspended directly with screws up to a length of 1000mm. For all shapes over 1000mm long, the EchoSail® is suspended with a frame and safety hooks. The frame is white as standard and can be supplied in other colours to order.
Absorption coefficient: aw 0.90, class A

ECHO**BAFFLE®**

EchoBaffles® suspended vertically from the ceiling combine efficient acoustic well-being and striking design in open ceilings.It is visibly different from conventional ceilings. The open ceiling concepts also ensure the integration of the building structures in terms of climate technology while optimising the room acoustics at the same time. The inlays are plugged together on site and hooked into the grid ceiling without tools. The very light grid inlays can be easily removed, allowing easy access for maintenance of the building services.

The high acoustic performance of EchoBaffles® effectively dampens sound and “audibly” upgrades rooms with high noise levels. As a customised solution with individual design, the acoustic ceiling becomes a special eye-catcher and lends the room a lot of dynamism.

EchoBaffle® allows ceilings ranging from understated simplicity to dramatic sculptural shapes. The creations of the ECHO**JAZZ** designers are only a starting point, we are happy to work out individual designs on customer request. Complete reusability after use guaranteed – zero waste!

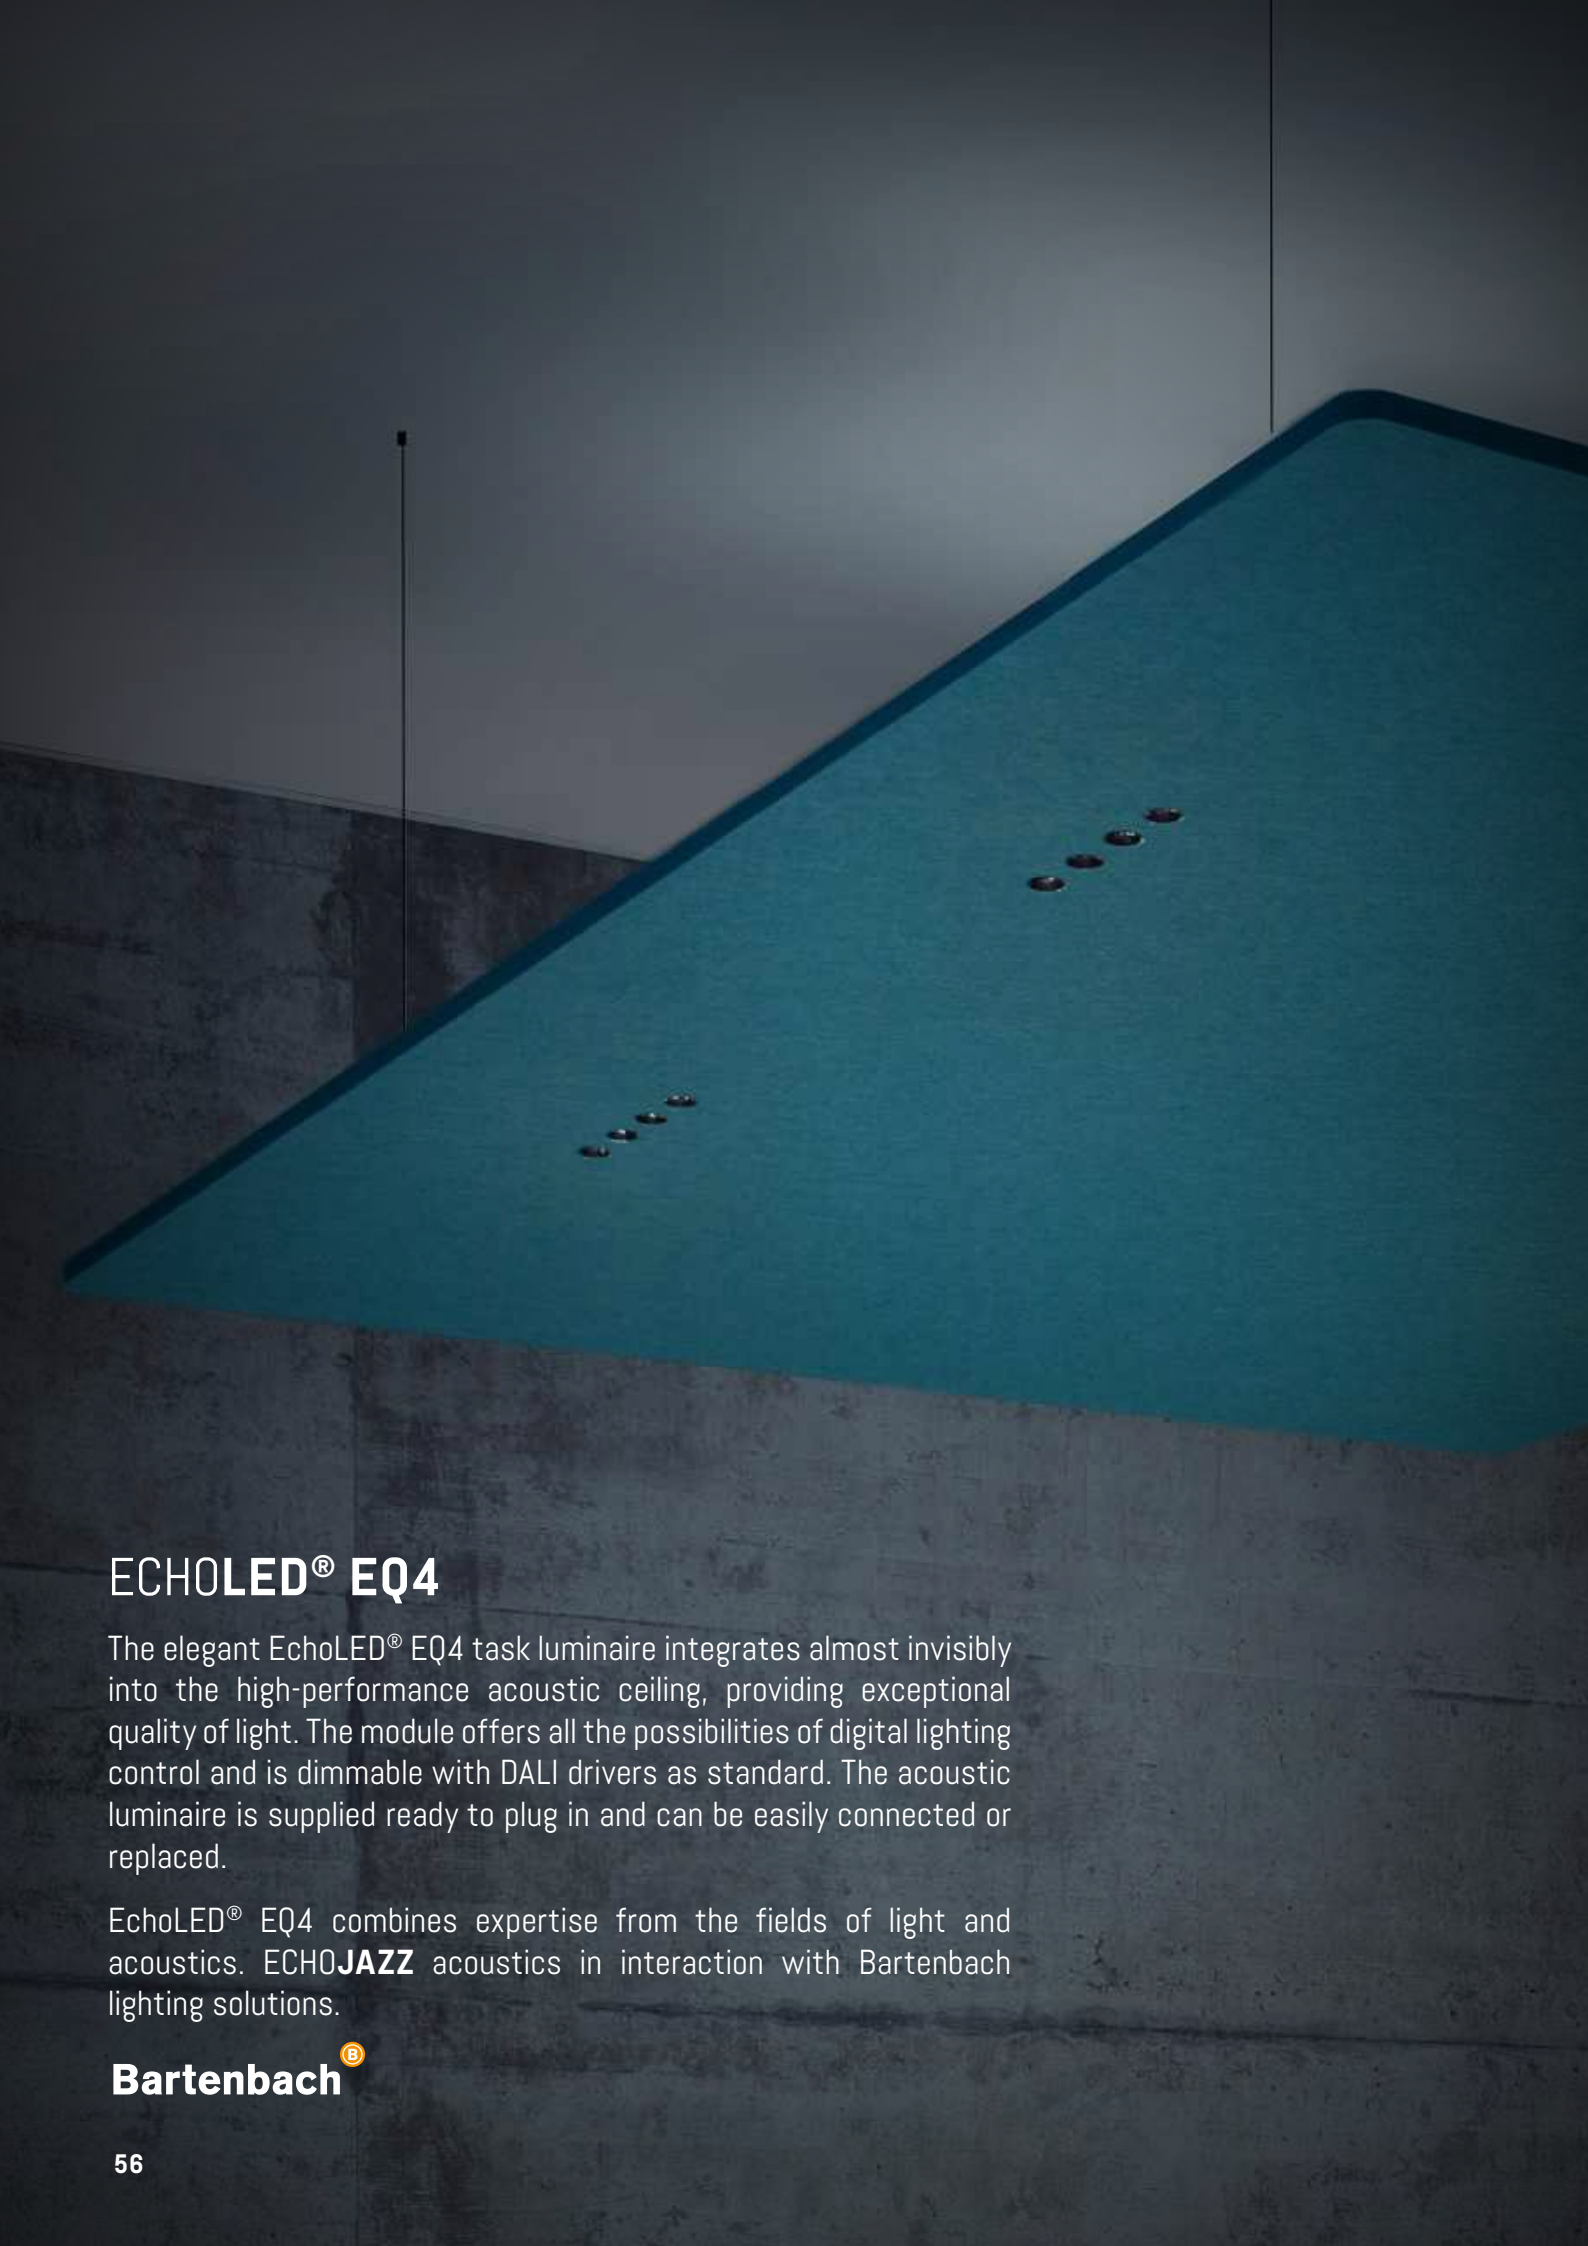
ECHO JAZZ

ACOUSTIC-LIGHTING

Lighting and room acoustics in one: sound-absorbing acoustic luminaires allow individual room design with maximum effect. The ECHO**JAZZ** range includes minimalist integrations with ceiling canopies as well as stand-alone luminaires with a striking design.

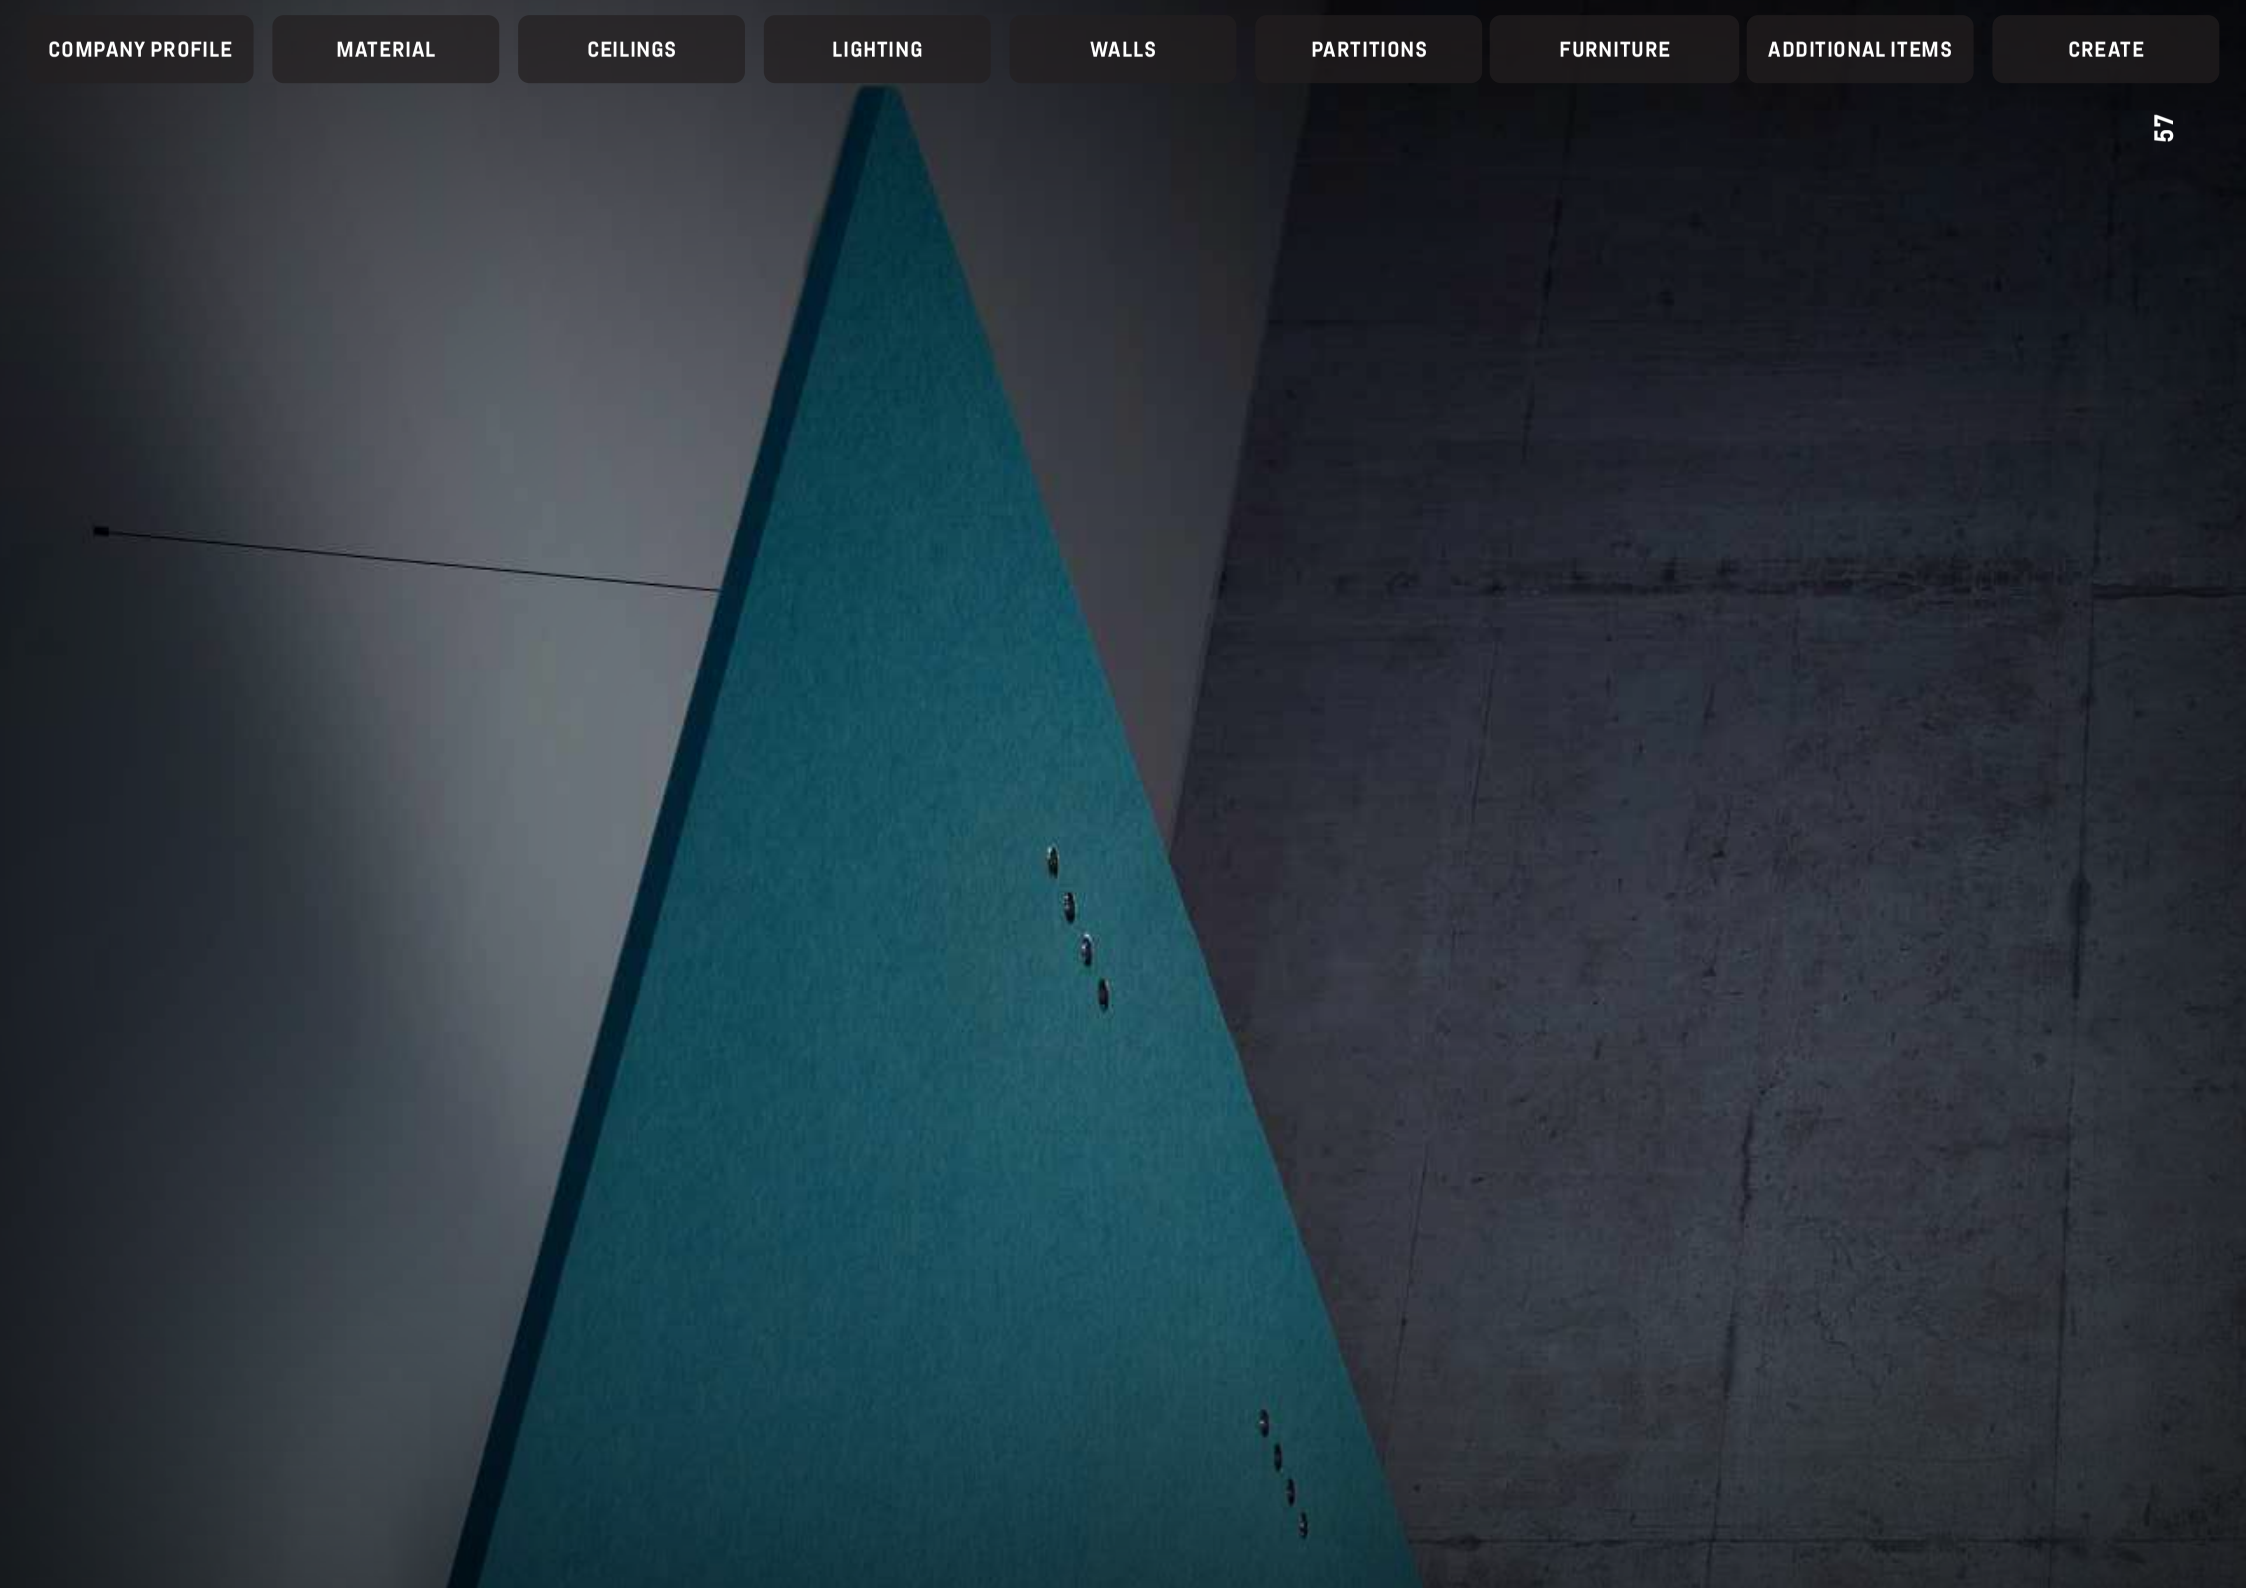


ECHO**LED® EQ4**

The elegant EchoLED® EQ4 task luminaire integrates almost invisibly into the high-performance acoustic ceiling, providing exceptional quality of light. The module offers all the possibilities of digital lighting control and is dimmable with DALI drivers as standard. The acoustic luminaire is supplied ready to plug in and can be easily connected or replaced.

EchoLED® EQ4 combines expertise from the fields of light and acoustics. ECHO**JAZZ** acoustics in interaction with Bartenbach lighting solutions.

Bartenbach



ECHO**LED® 24MM EQ4**

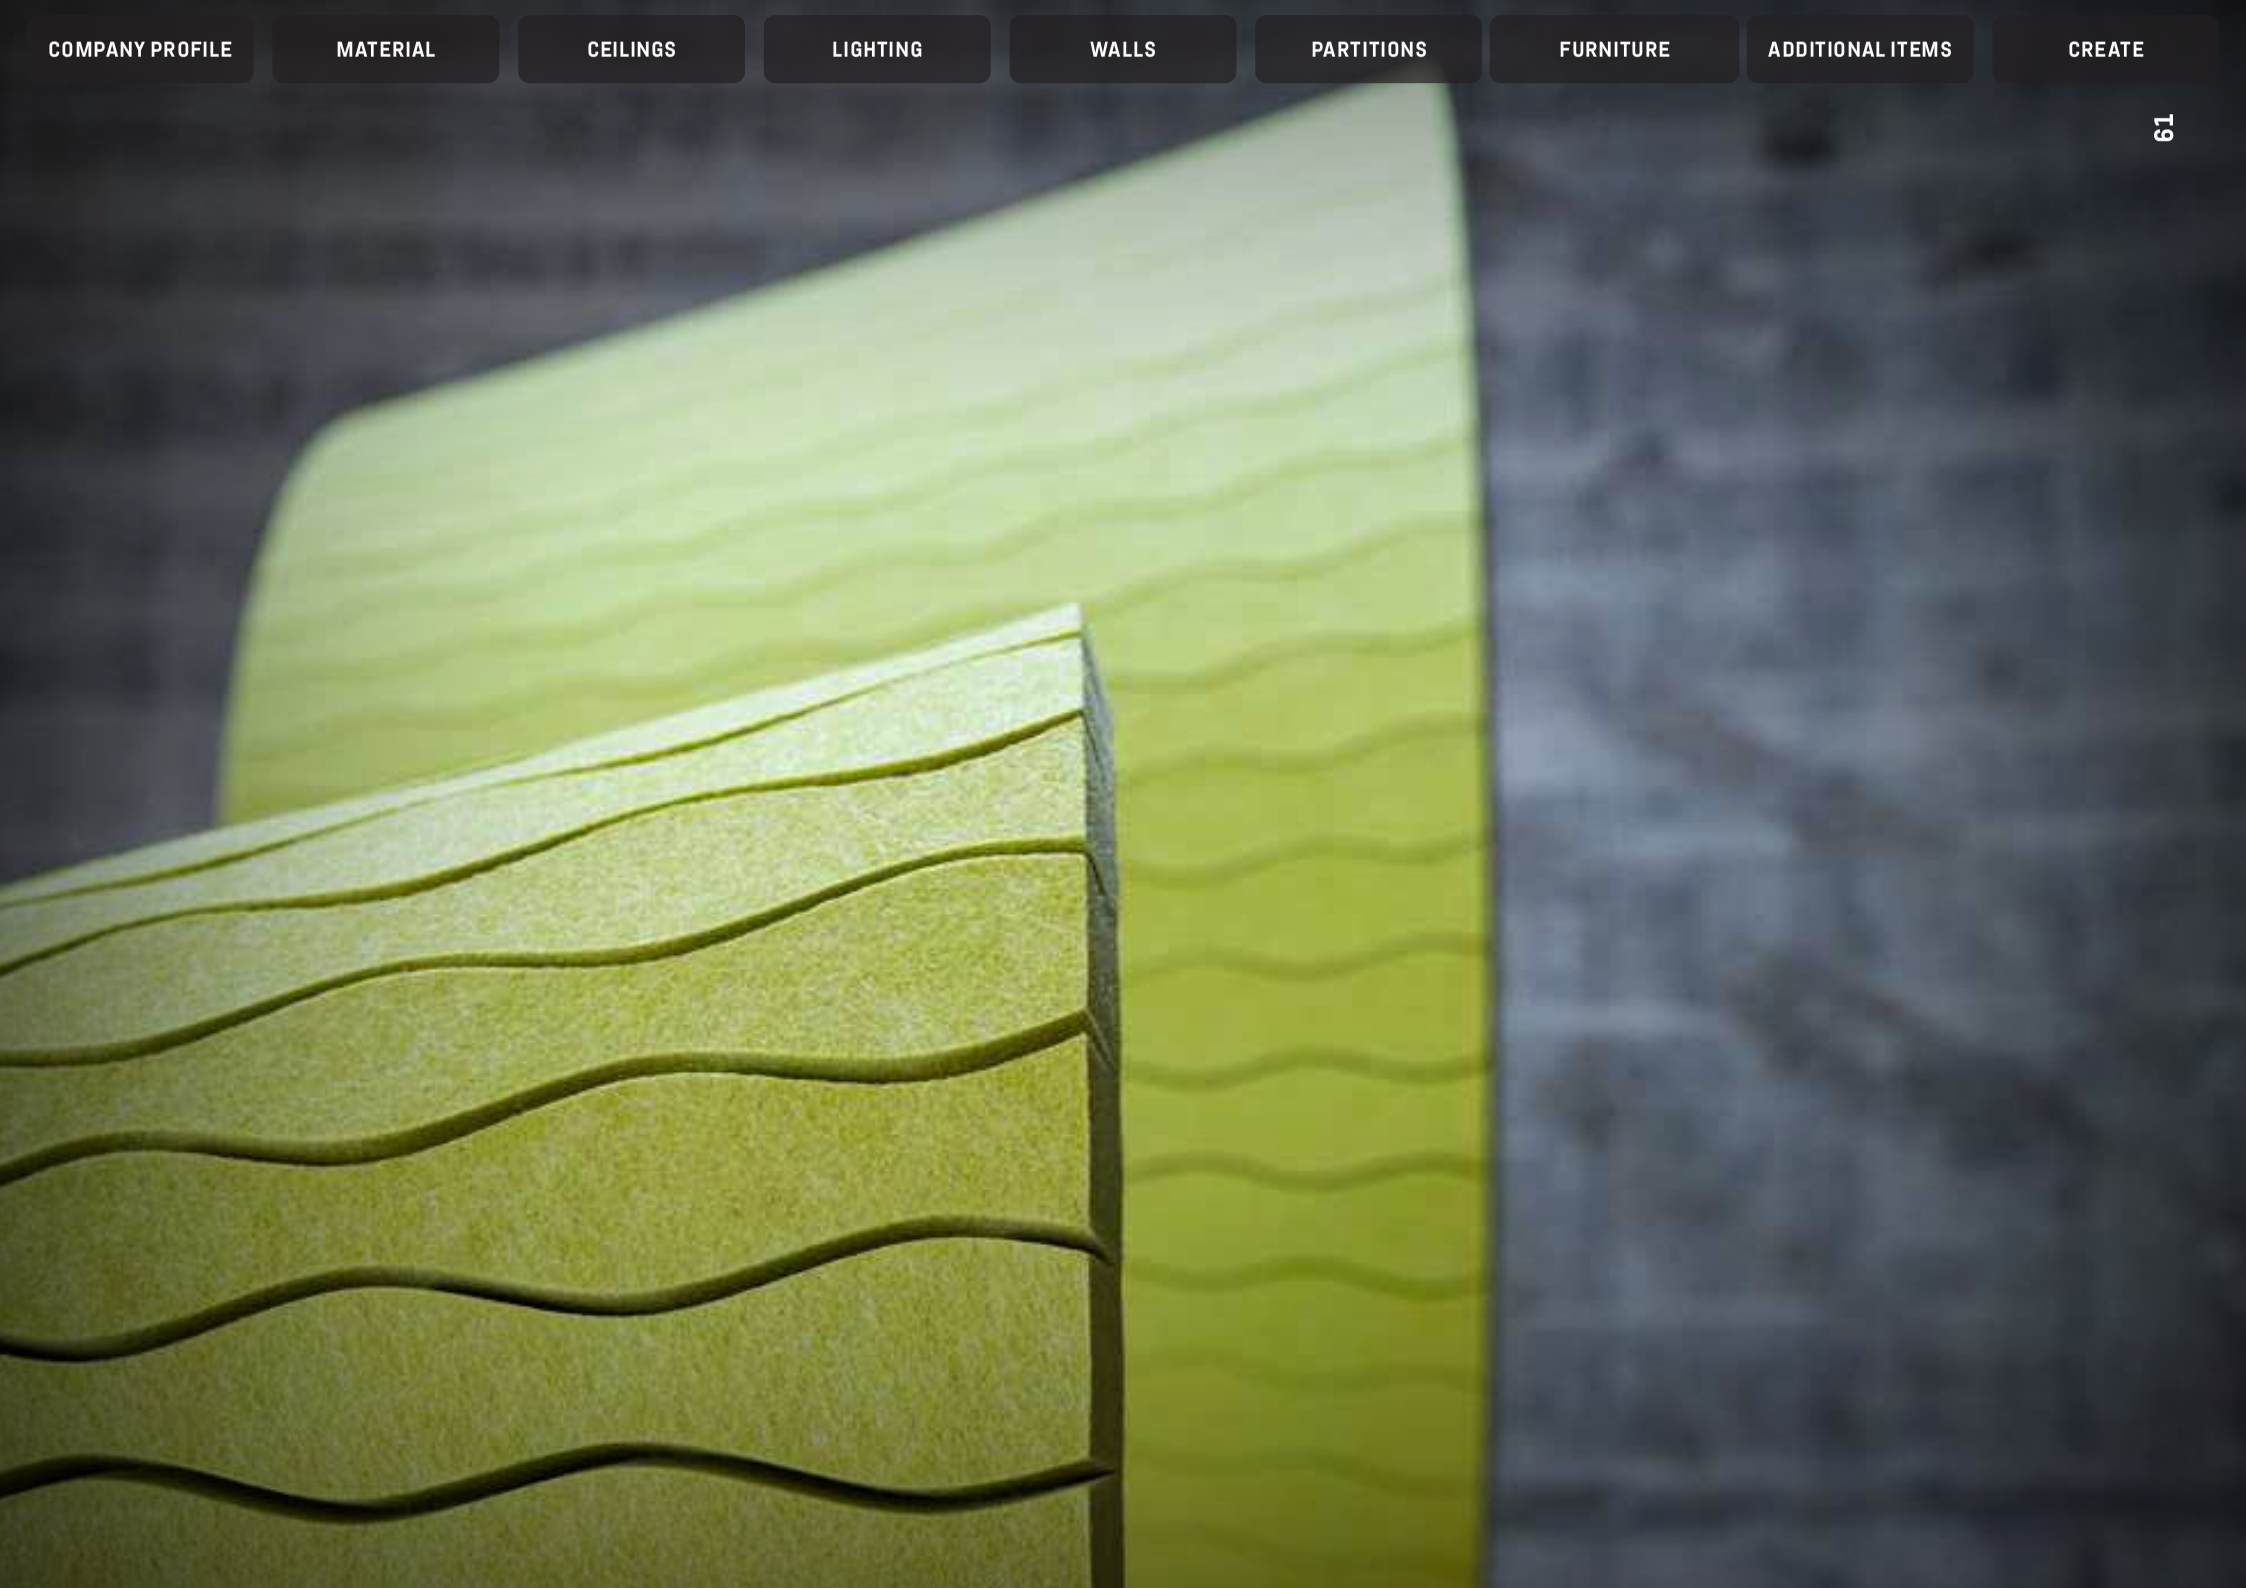
ECHO**LED® CONE**

The EchoLED® CONE acoustic pendant light is ideal for open spaces with decorative requirements. The classic cone-shaped lampshade made of EchoBoard® effectively dampens sound. The quality spotlight with black reflector achieves a brightness of minimum 1680 Lumens, with a power consumption of an energy-efficient 20 watt.

EchoLED® CONE is available in five sizes, the lampshade made of PET acoustic material contains up to 360 recycled PET bottles. The ceiling lamp is particularly appealing thanks to the different material thicknesses, the 21 expressive colours and varying designs.



ECHO**LED® 12MM CONE**

ACOUSTIC-WALLS

Sound absorbers for wall mounting are an effective alternative to acoustic ceilings, especially in small and narrow rooms: space-saving, individually designable and flexibly applicable, acoustic walls offer sophisticated solutions.

ECHO**BAFFLE® WALL**

EchoBaffle® WALL is a new type of wall absorber with three-dimensional slats that come to life as you walk by. EchoBaffle® WALL opens up a new field for acoustic wall design. With changing viewing angles, three-dimensional shapes become visible and disappear again, particularly effective on long walls or corridors.

The EchoBaffles® impress with their simple installation using a tool-free plug-in system. The open structure leaves room for building technology such as sensors, switches or sockets. In addition, individual EchoBaffles® can be removed very easily if required. Discover the new wall solution, which we offer in four designs up to 2.80 metres high.

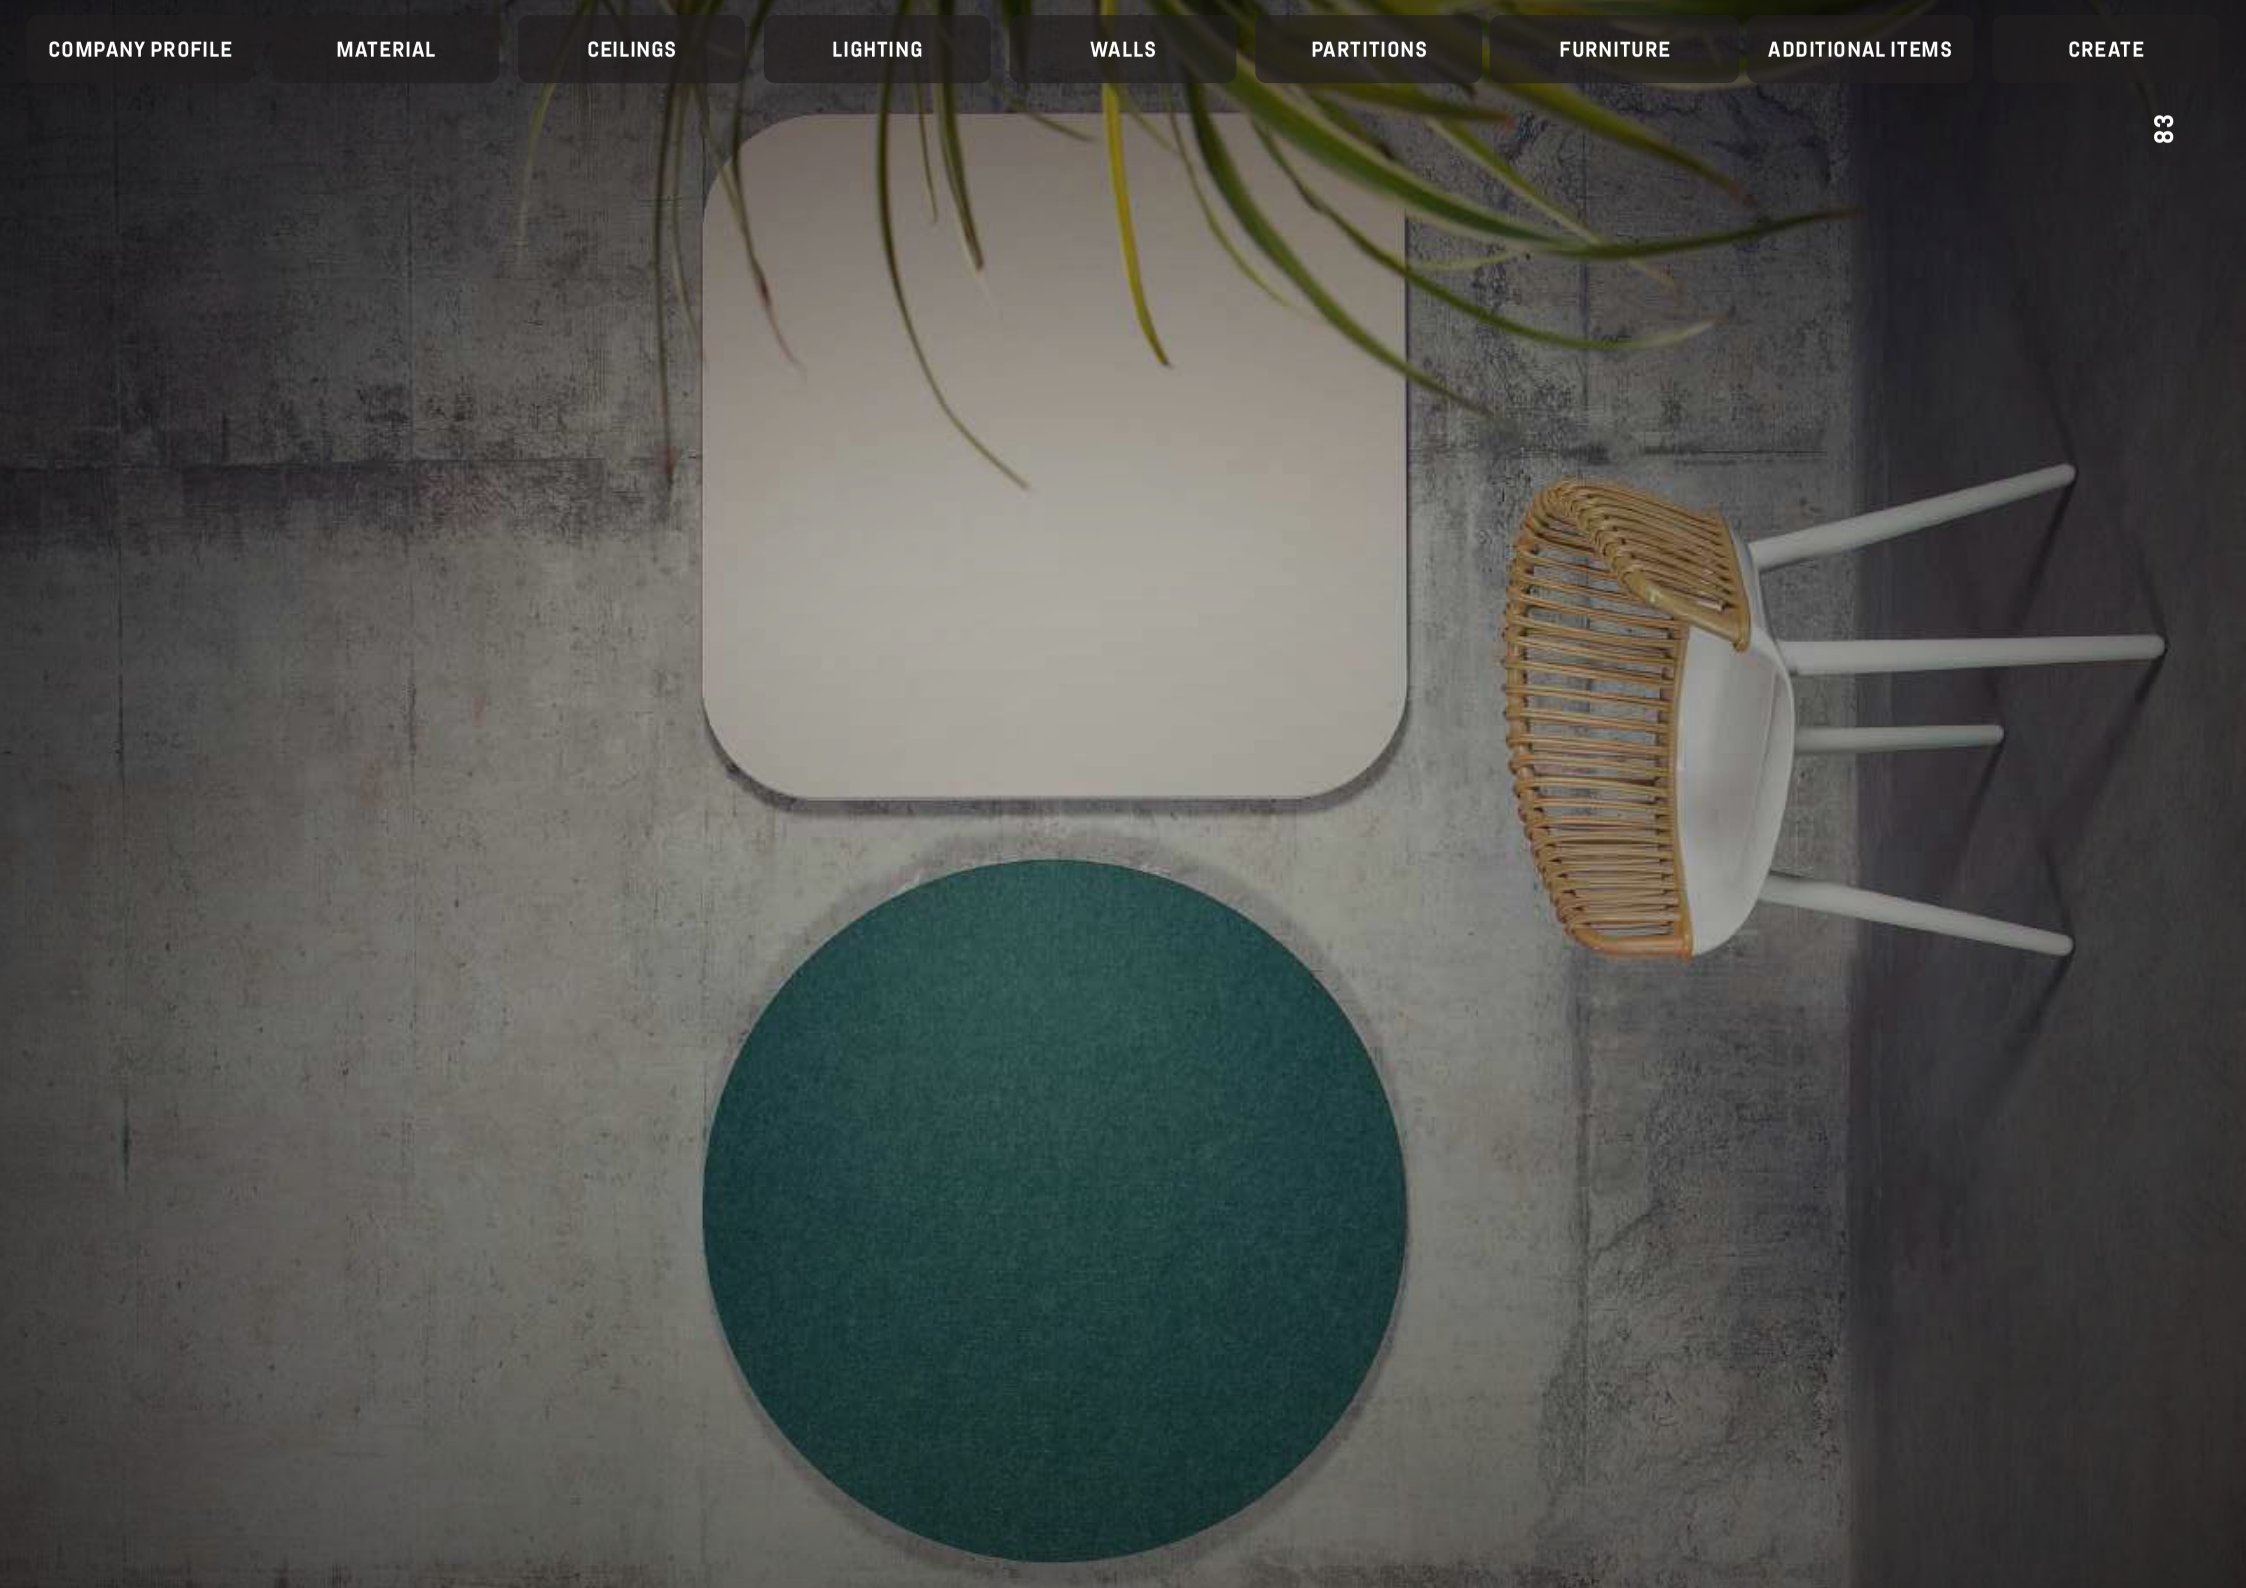
ECHO**FIELD®**

The EchoField® panels are fixed with a cavity to the wall and provide optimal acoustic performance especially in small and narrow rooms. They are an alternative to EchoSail® ceiling sails, with which they share dimensions and shapes. They are mounted using a powder-coated metal frame that is simply plugged in and suspended using a wall profile.



ECHO**FIELD® 12MM**

Acoustic panels in various shapes and surface designs incl. wall suspension
Absorption coefficient: aw 0.90, class A
Edge finish: 90°, corner radius 200mm

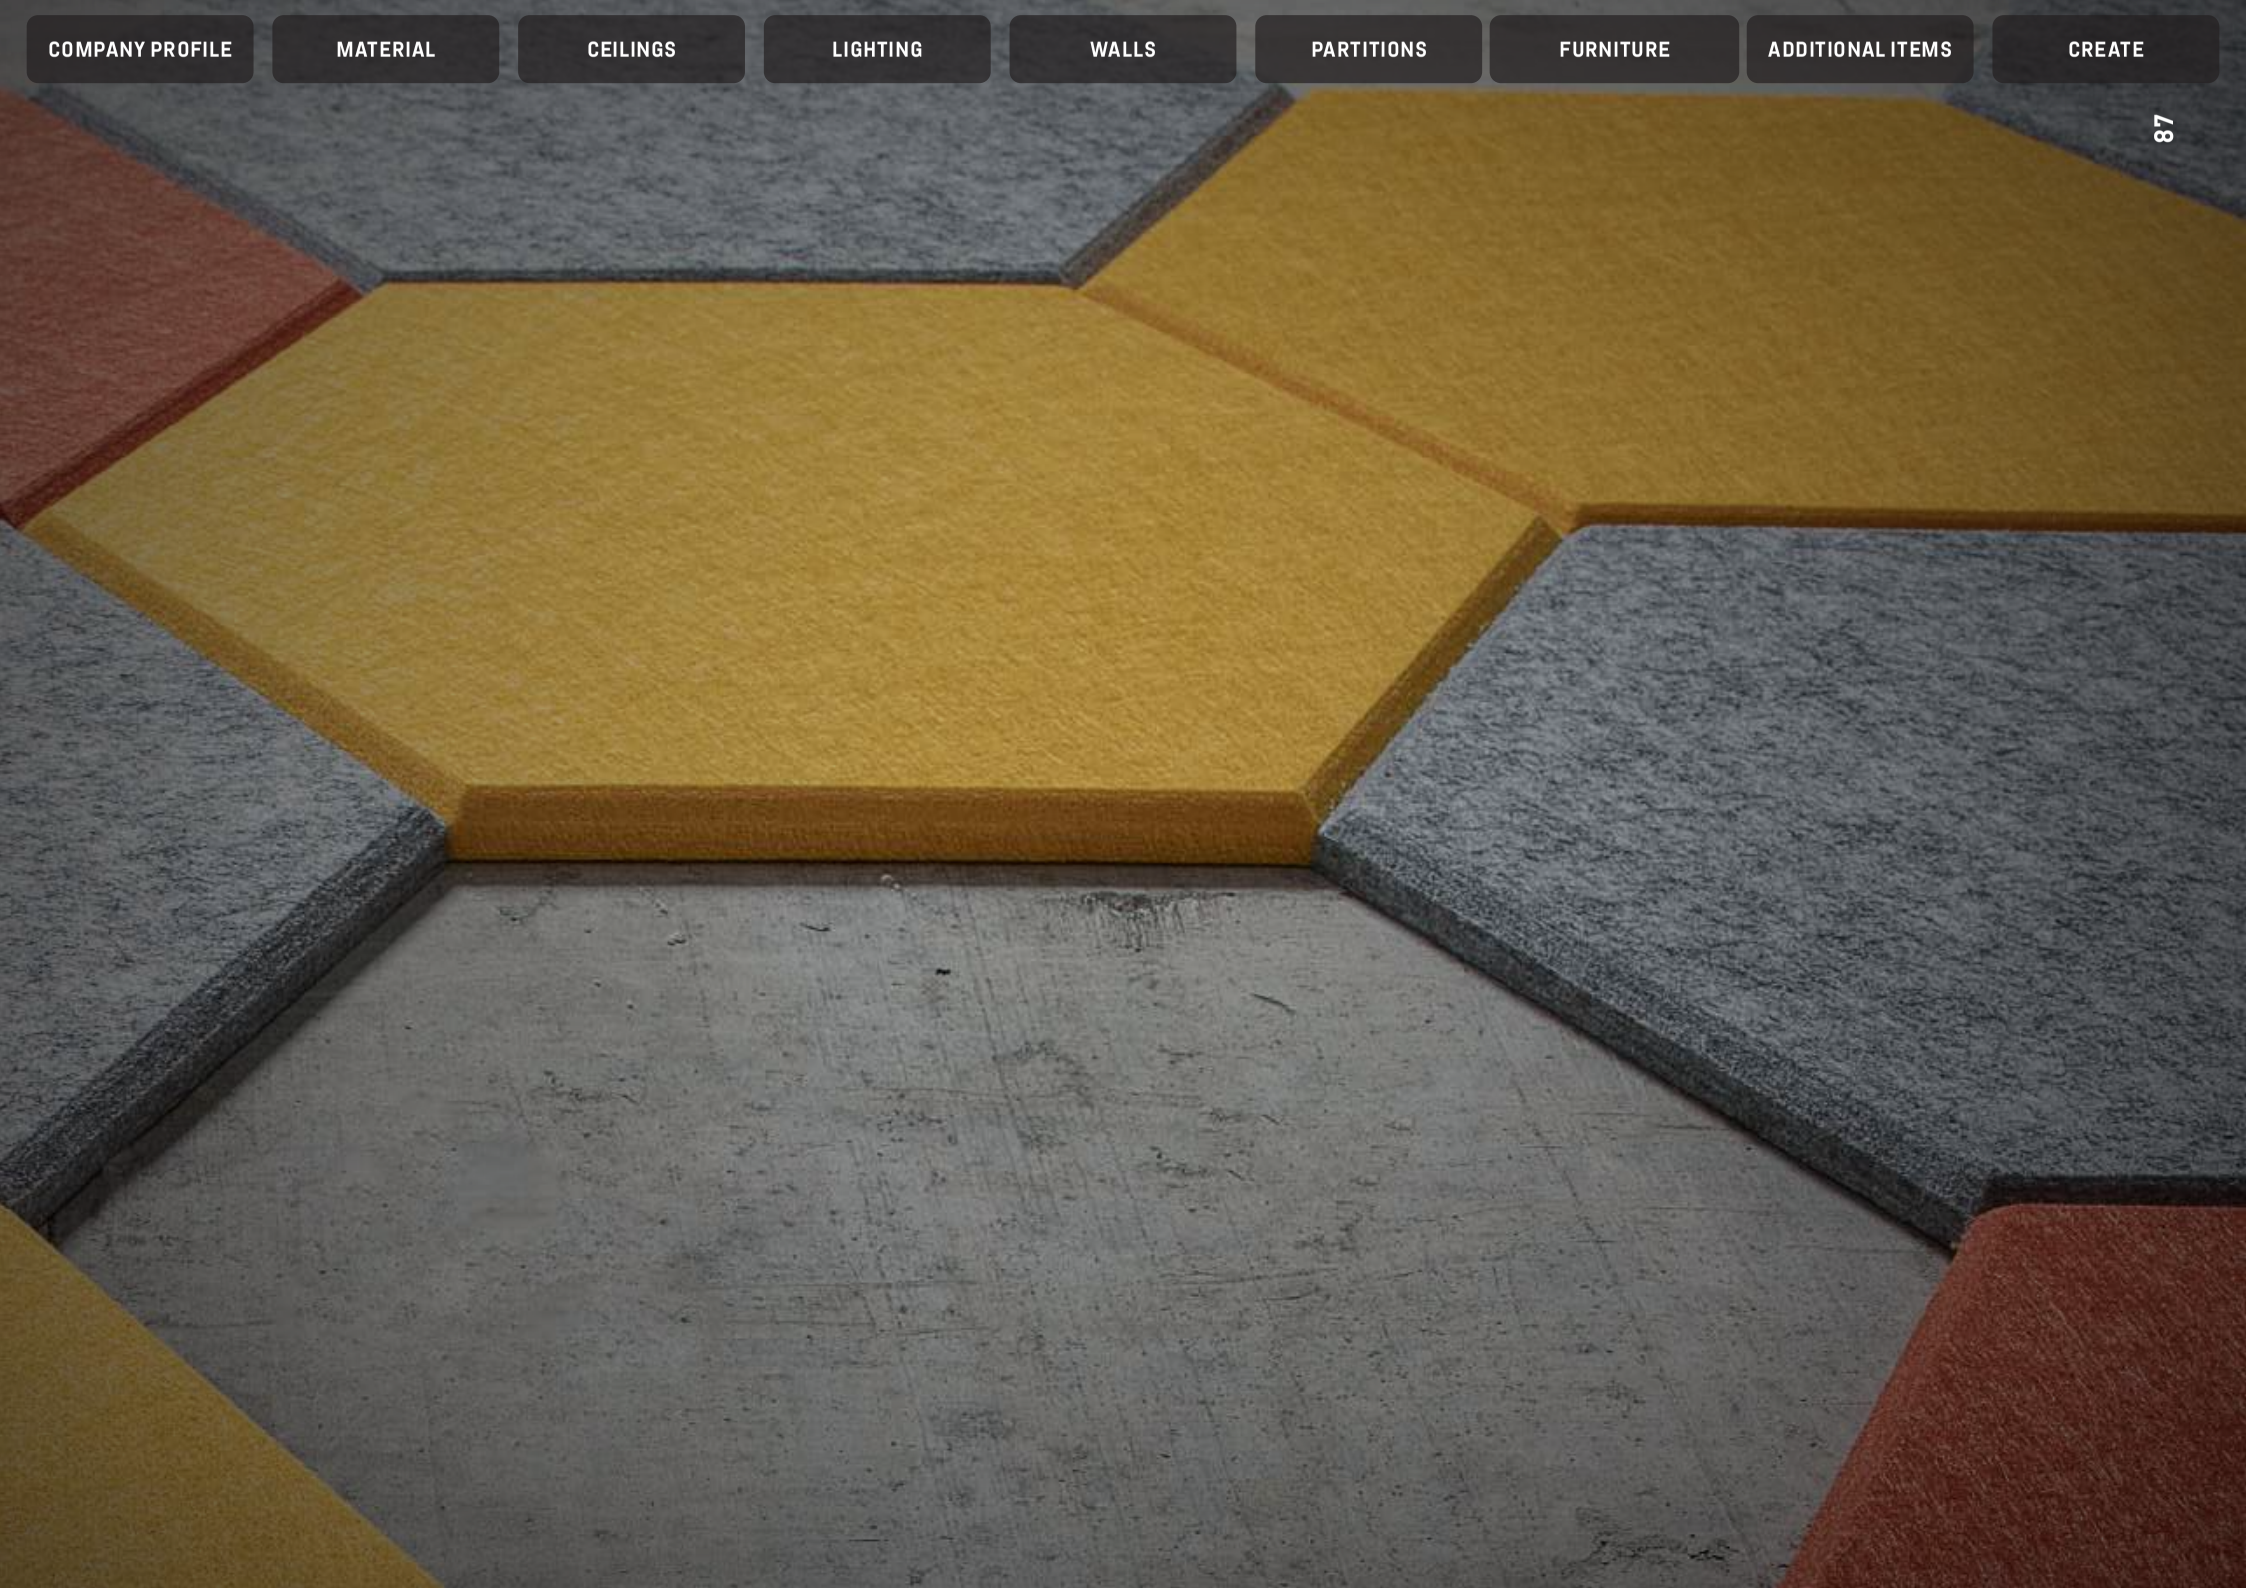
ECHO**BRICK®**

Acoustic wall absorbers offer a good alternative to ceiling elements, especially in small and medium-sized meeting rooms where ceiling absorbers are not effective due to flutter sound. Installation is done using EchoGlue® spray contact adhesive. The acoustic panels can be easily combined with each other and complemented in colour thanks to broken edges.



ECHO**BRICK® 12MM**

Acoustic wall tiles with bevelling. Installation by means of biodegradable EchoGlue® spray adhesive (included).
Absorption coefficient: aw 0.30/0.60 (0mm/50mm wall spacing)
Edge finish: 45° bevelling
Special dimensions and designs on request
The latest designs can always be found online at www.echo**jazz**.com/echobrick

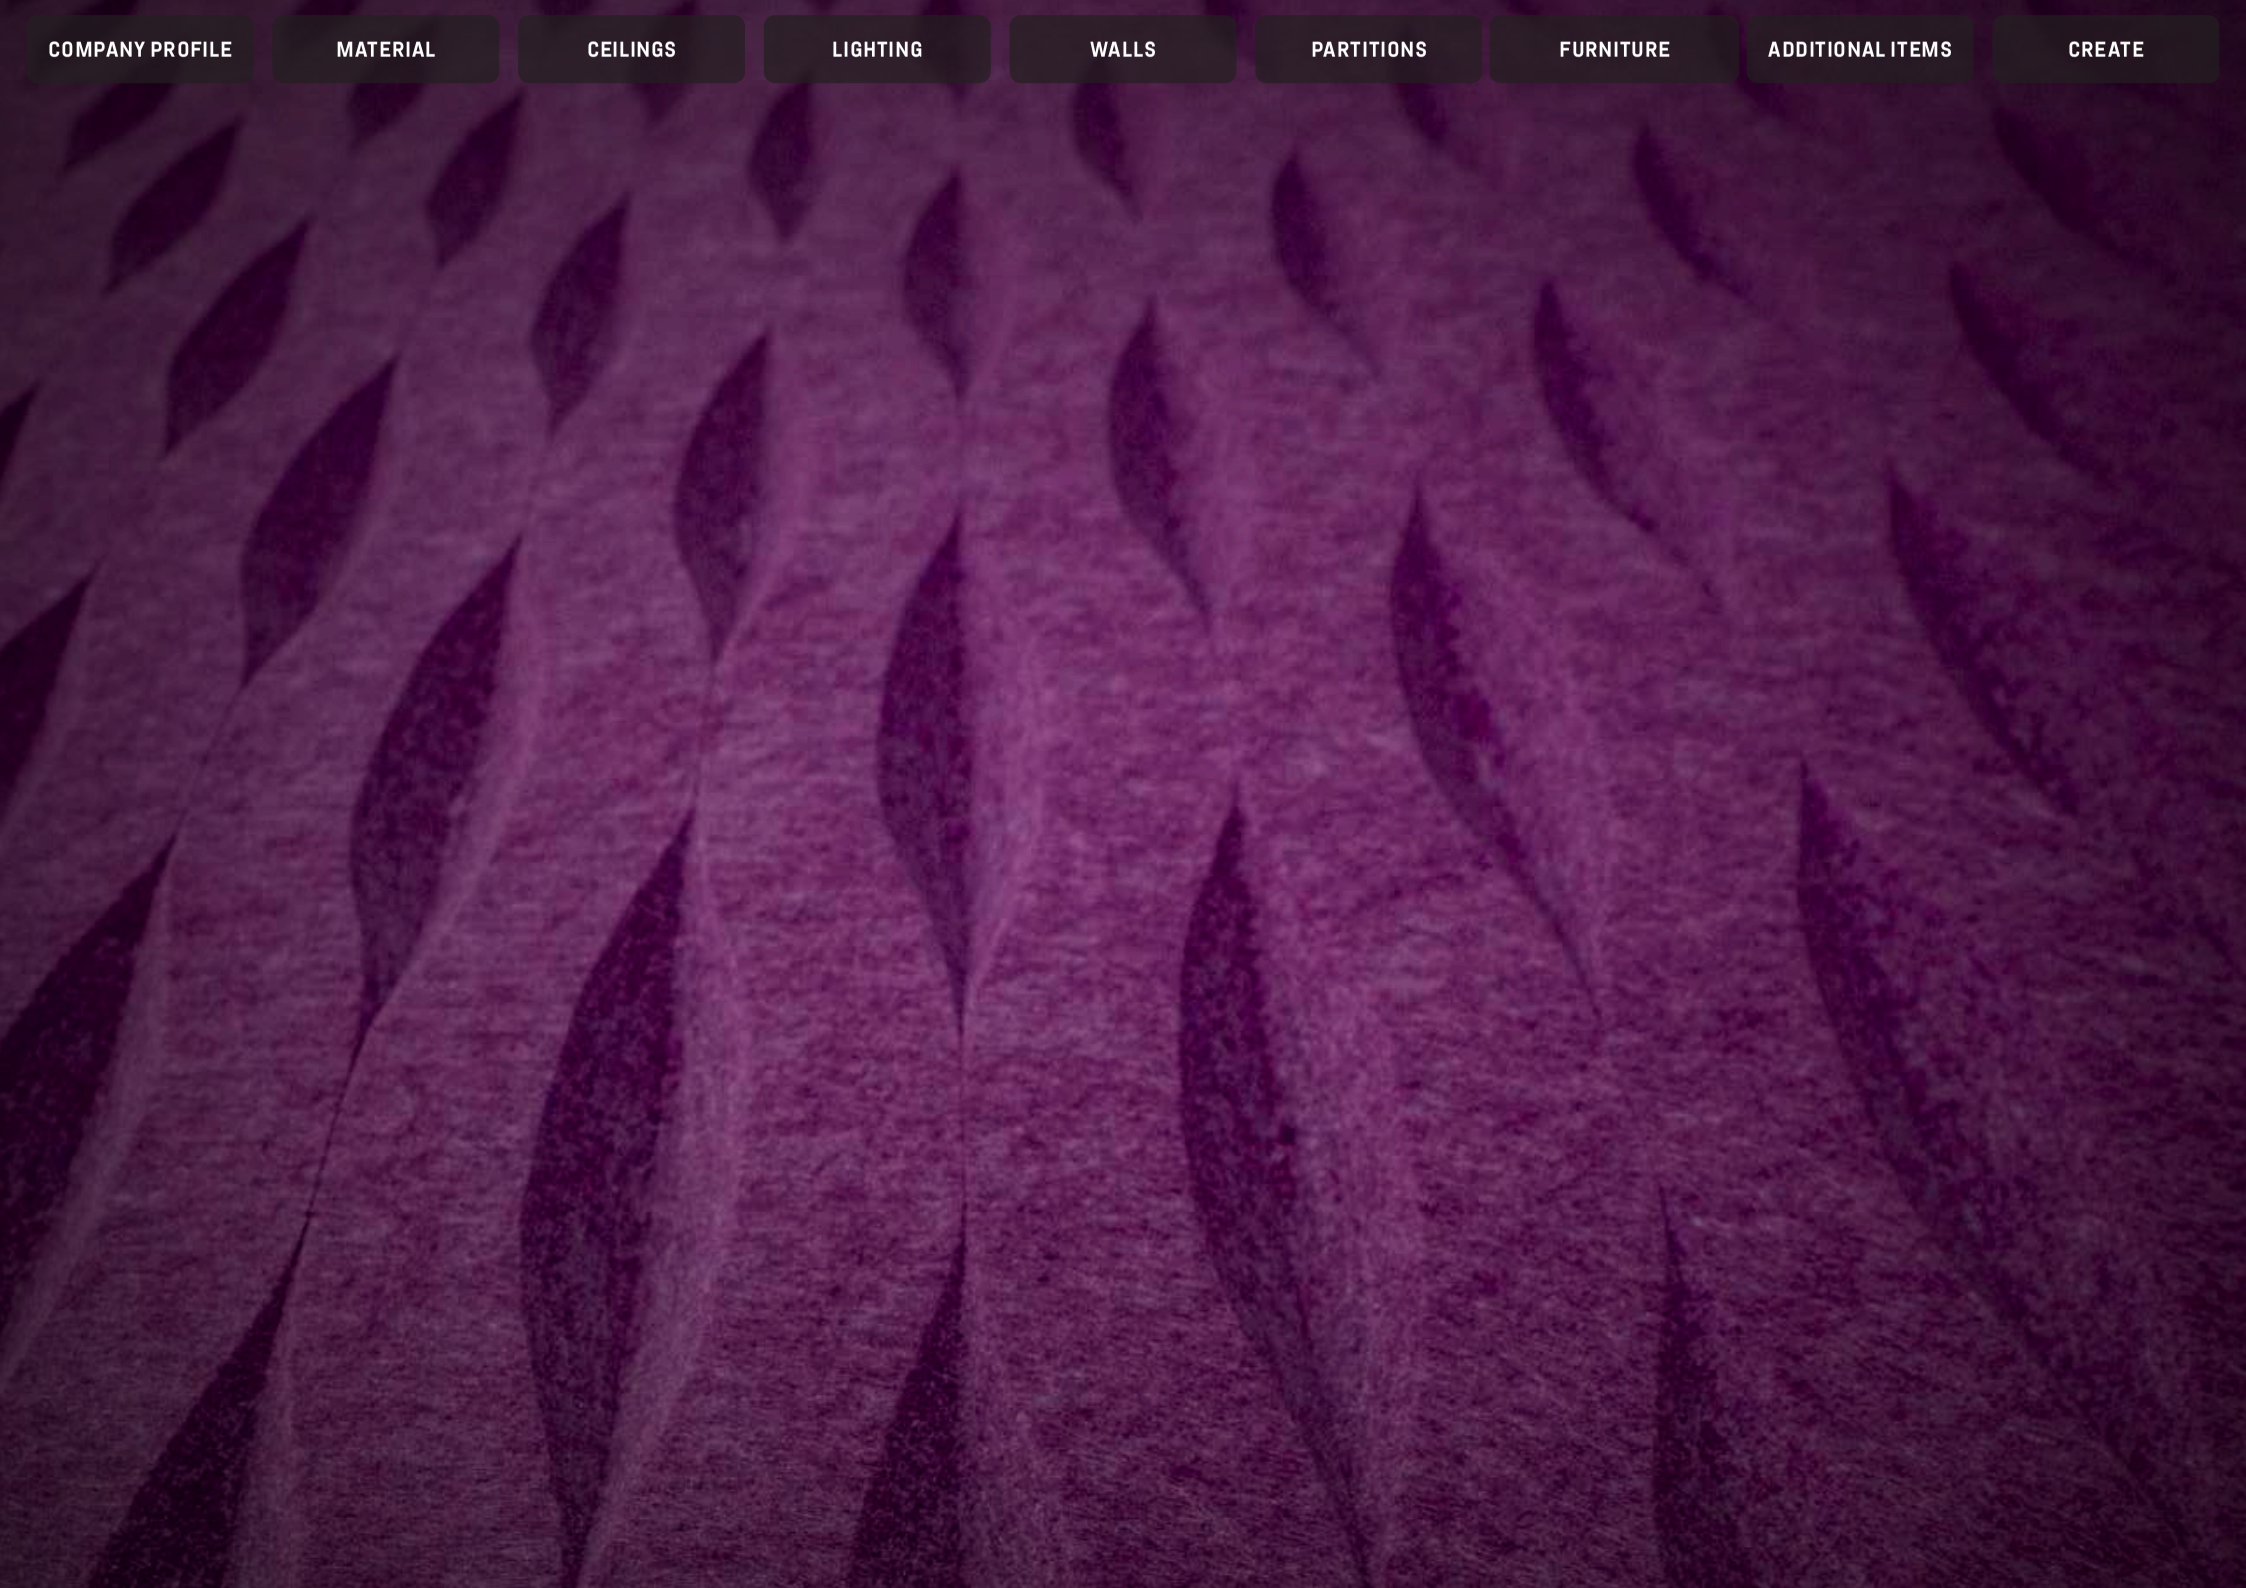
ECHO**MONOC®**

EchoMonoc® is suitable for large-area wall applications without visible joints. For improved acoustic performance, it is recommended to use the 24mm thick option. ECHO**JAZZ** absorbers made of recycled PET are extremely robust and suitable for regular cleaning and disinfection. Installation is quick and easy with EchoGlue® adhesive contact spray.

Indented carvings break up the monochrome surface. This finishing method creates an indented structure that gives each room its own character.



ECHO**MONOC® 12MM**

Acoustic wall panels with bevelling. Installation by means of biodegradable EchoGlue® spray adhesive (included).
Absorption coefficient: aw 0.30/0.60 (0mm/50mm wall distance)
Special dimensions and designs on request

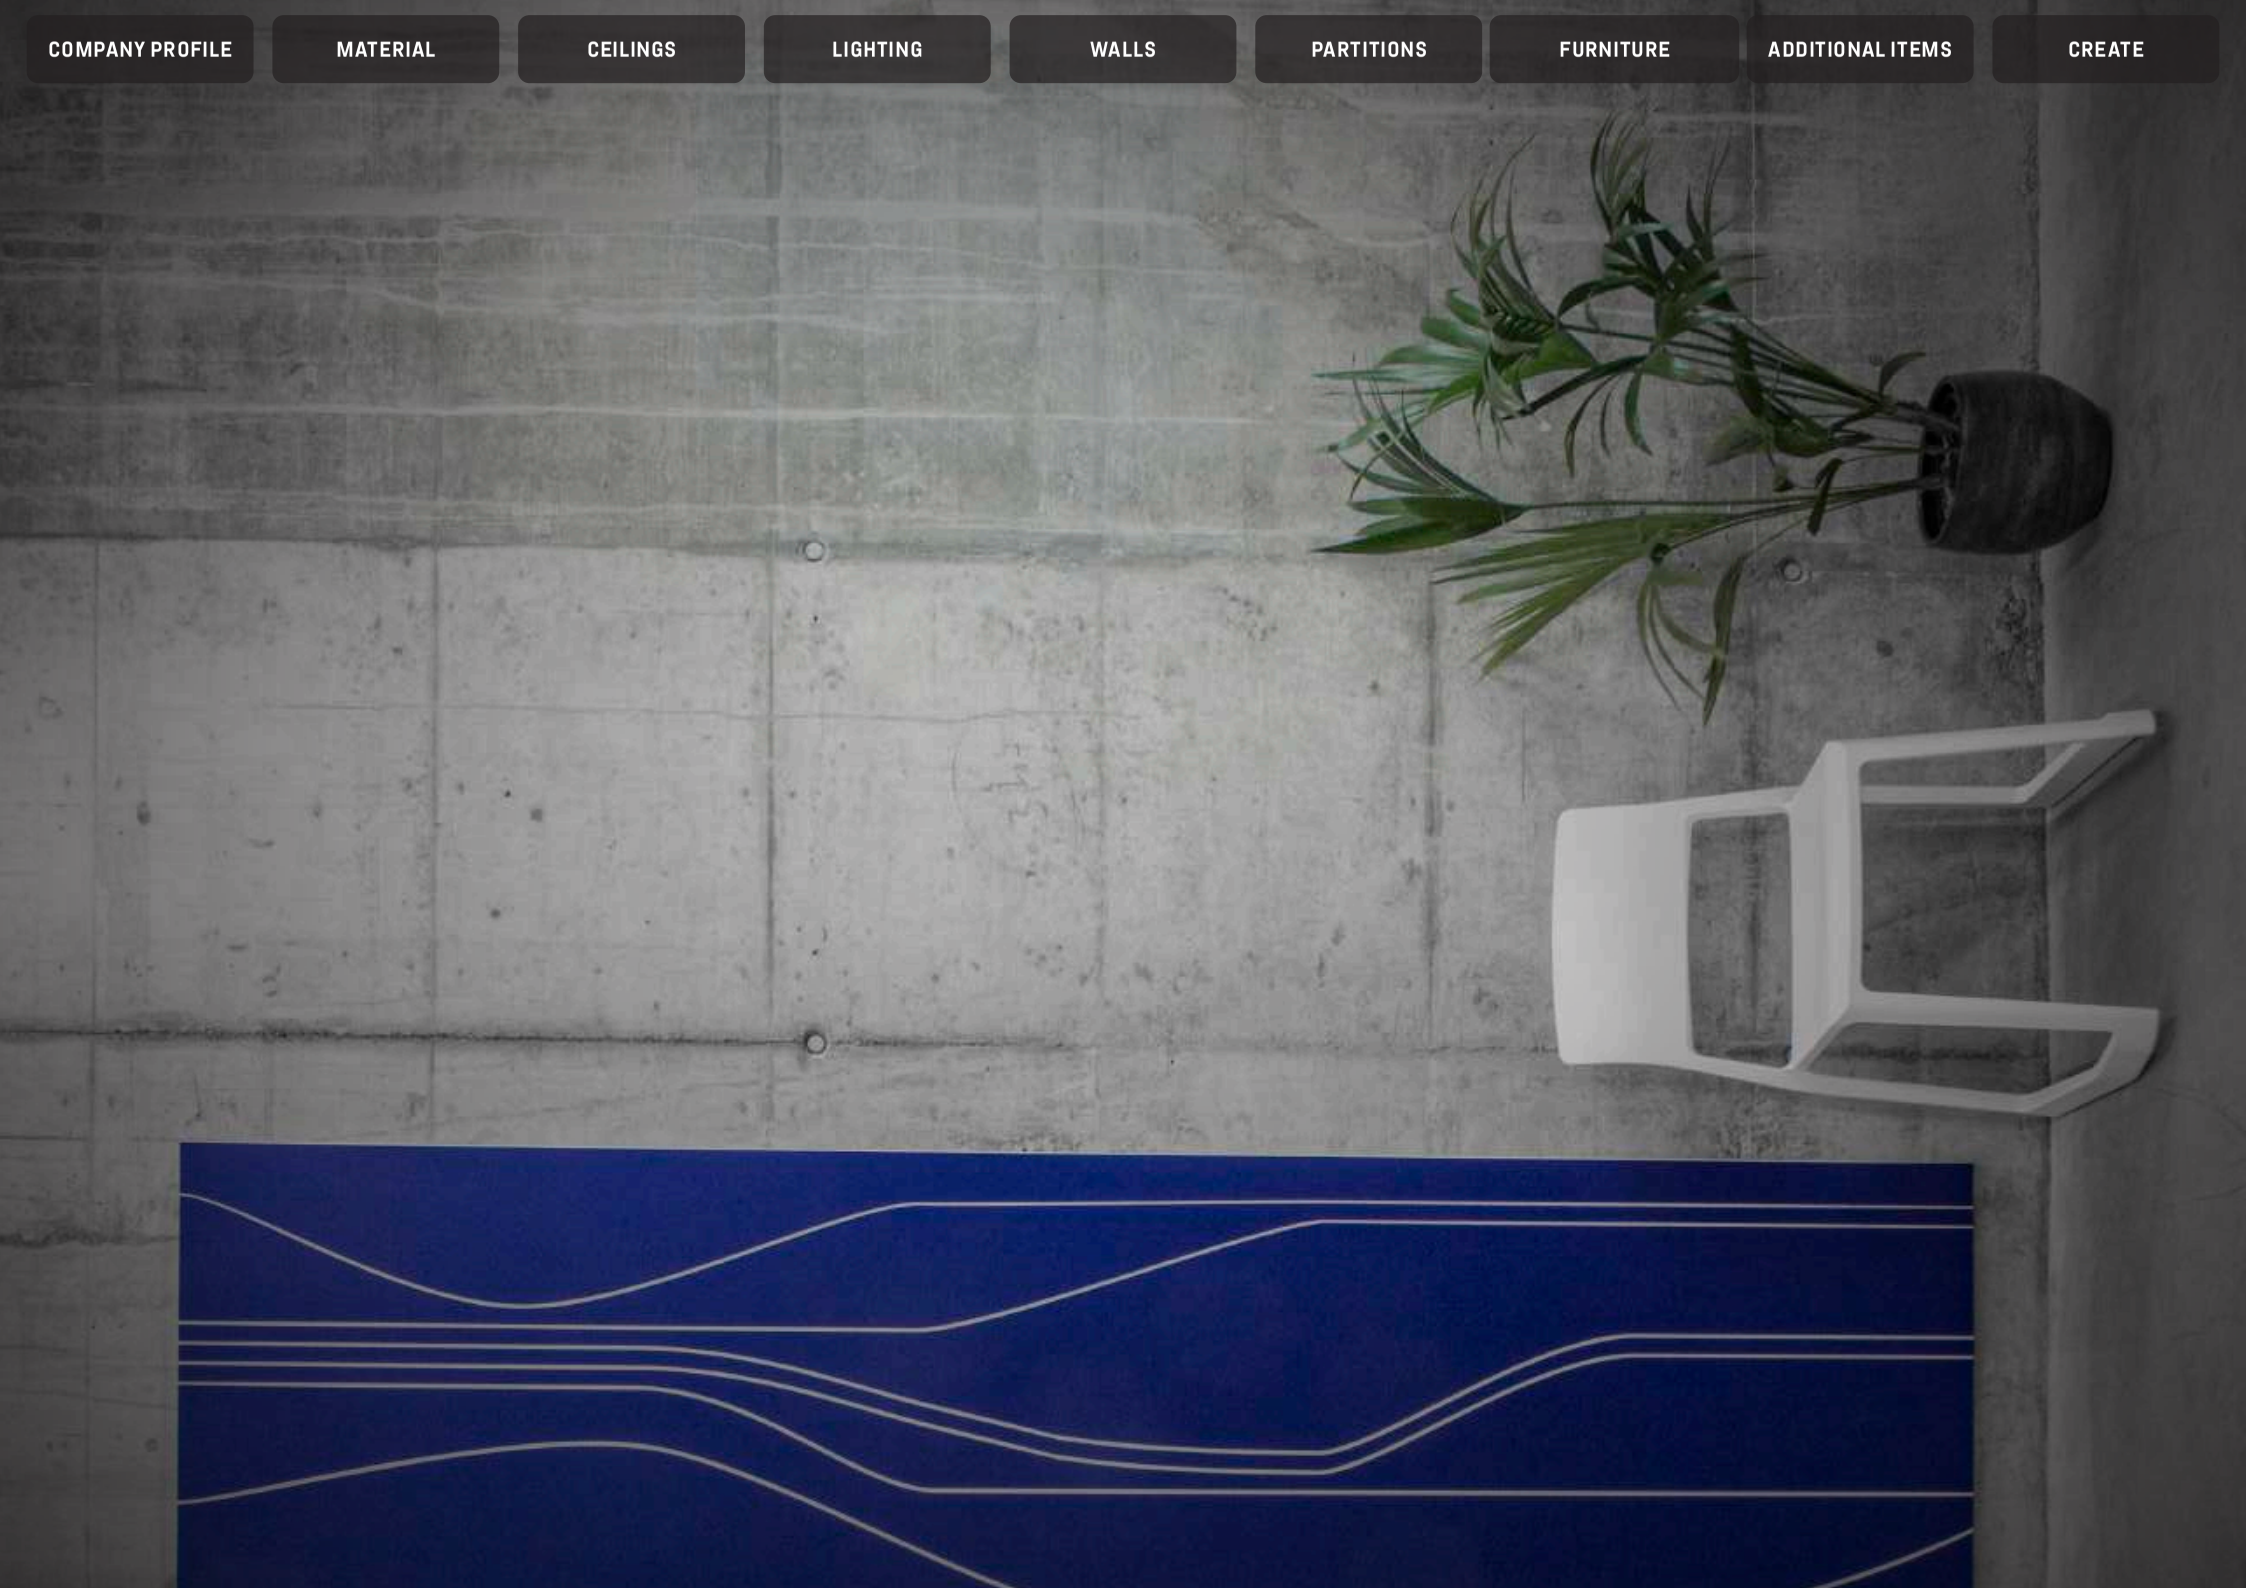
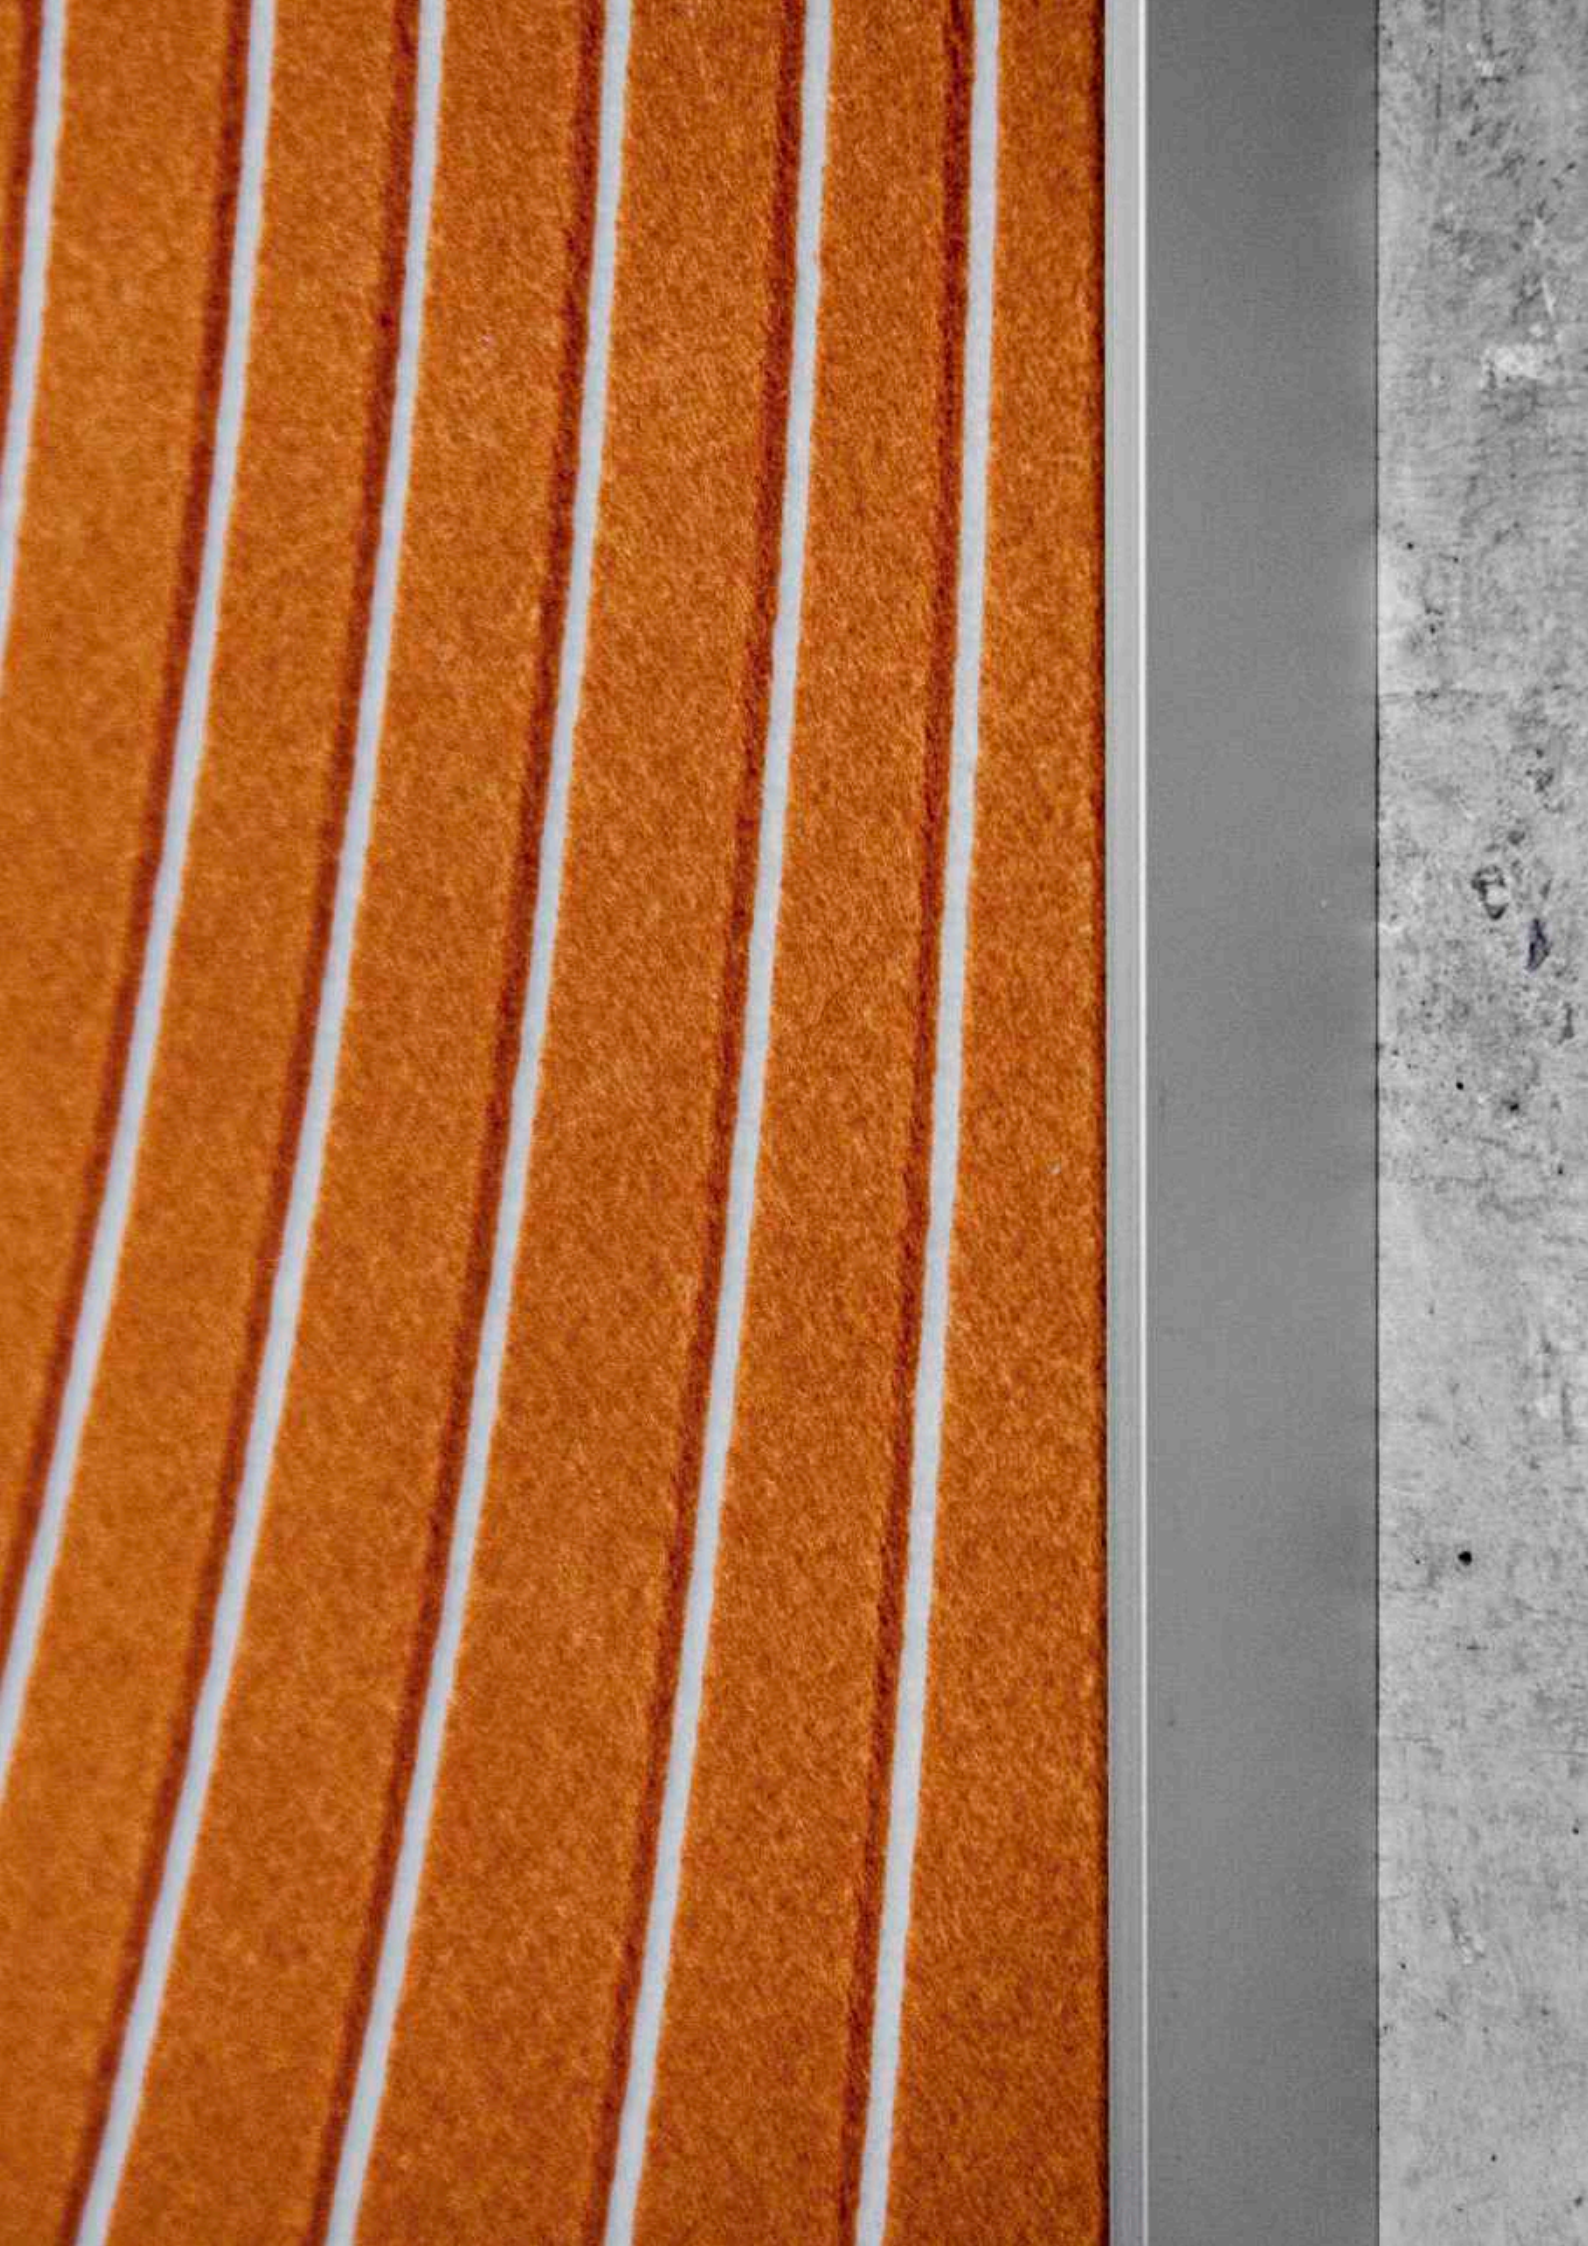
ECHO**COUSTIC® ACCENT**

EchoCoustic® with V-shaped cuts makes the white high-performance absorption layer visible. This creates special line designs and thus accentuates in the truest sense of the word. The special EchoCoustic® absorber is the ideal material for direct application to walls or ceilings without spacing or substructure. With its three layers, it achieves an excellent absorption coefficient of aw 0.80 and NRC 0.85 with a thickness of only 25mm. The absorber made of recycled PET is extremely robust and suitable for regular cleaning and disinfection. Installation is quick and easy with EchoGlue® contact spray adhesive.

The design of large-area acoustic walls takes on a new dimension. The high-contrast recesses allow for spectacular patterns, from existing designs to completely customised creations.





ECHO**COUSTIC® 25MM ACCENT**

Acoustic wall panels with bevelling. Installation by means of biodegradable EchoGlue® spray adhesive (included).
Absorption coefficient: aw 0.80, class B

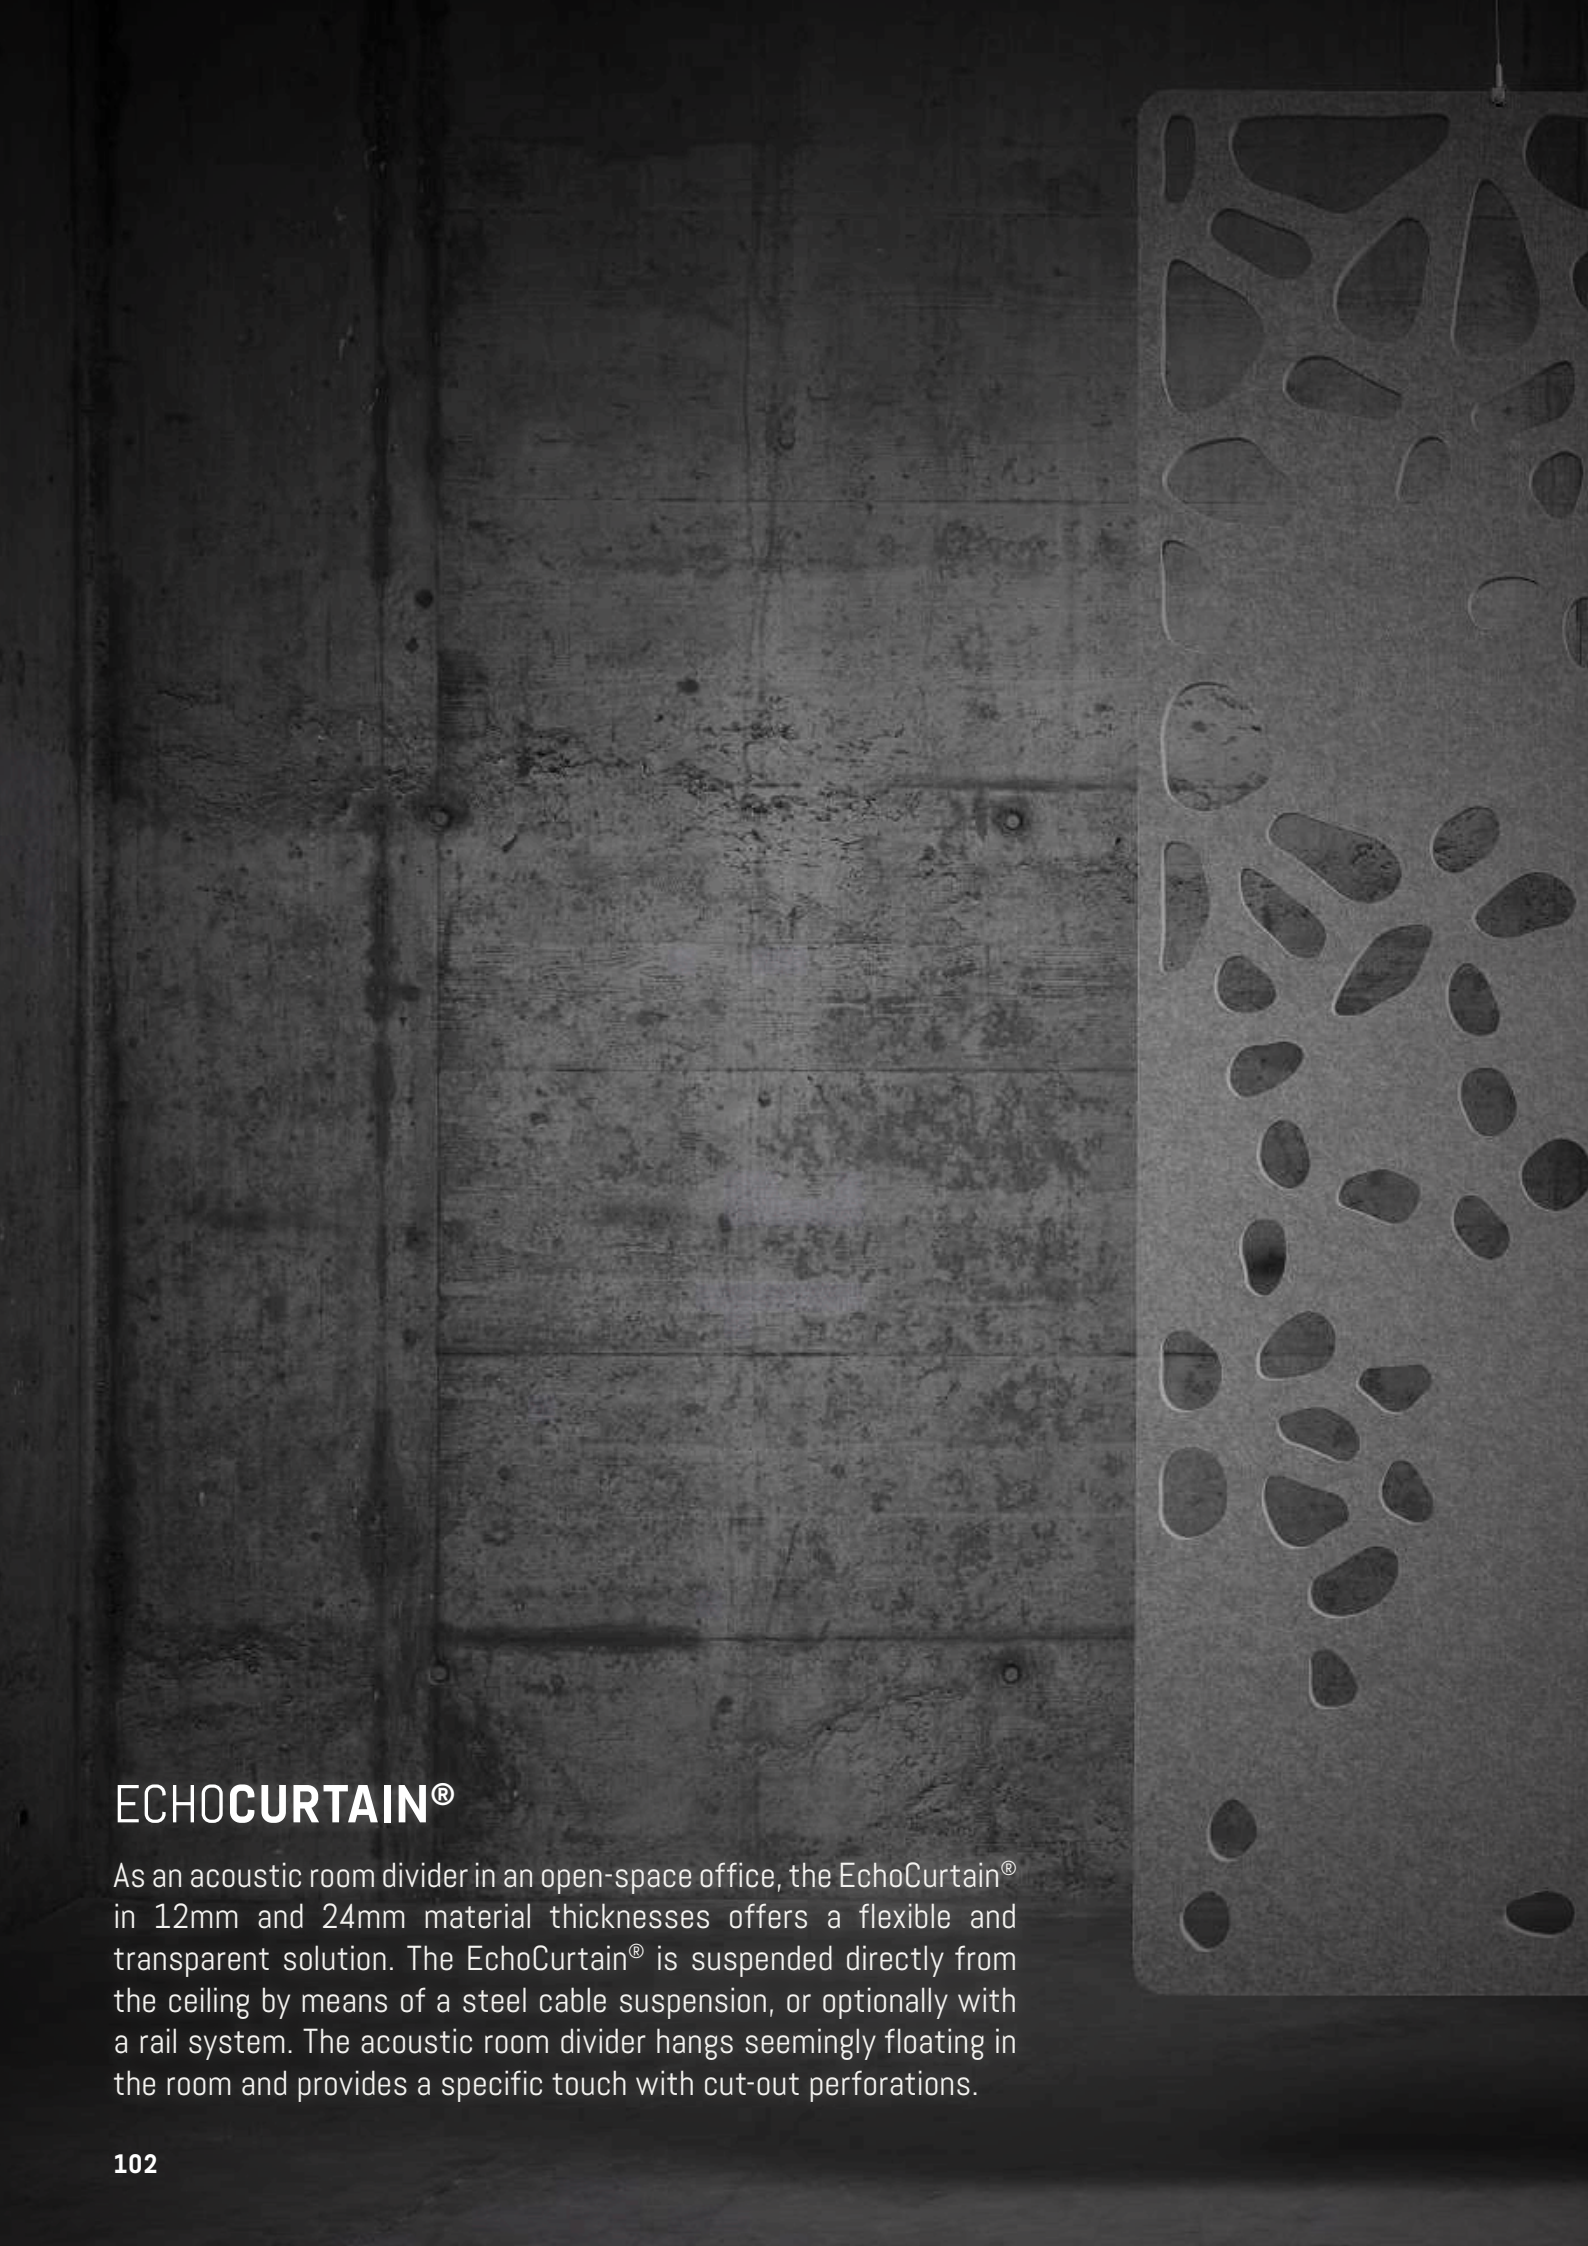
ECHO JAZZ

ACOUSTIC-PARTITIONS

Partition walls with sound insulation make it easy to divide rooms and optimise room acoustics in offices as well as in all other living and working environments. Available as mobile or permanently installed elements, they offer countless possibilities for room design.



ECHO**CURTAIN®**

As an acoustic room divider in an open-space office, the EchoCurtain® in 12mm and 24mm material thicknesses offers a flexible and transparent solution. The EchoCurtain® is suspended directly from the ceiling by means of a steel cable suspension, or optionally with a rail system. The acoustic room divider hangs seemingly floating in the room and provides a specific touch with cut-out perforations.

ECHO**TORRENT®**

The EchoTorrent® acoustic partitions were specially developed for high rooms with a ceiling height of up to four metres, whereby the high-performance acoustic absorbers can be positioned at individual heights. The clamping elements are firmly screwed to the ceiling and floor. The acoustic elements are clamped to the connecting cables.

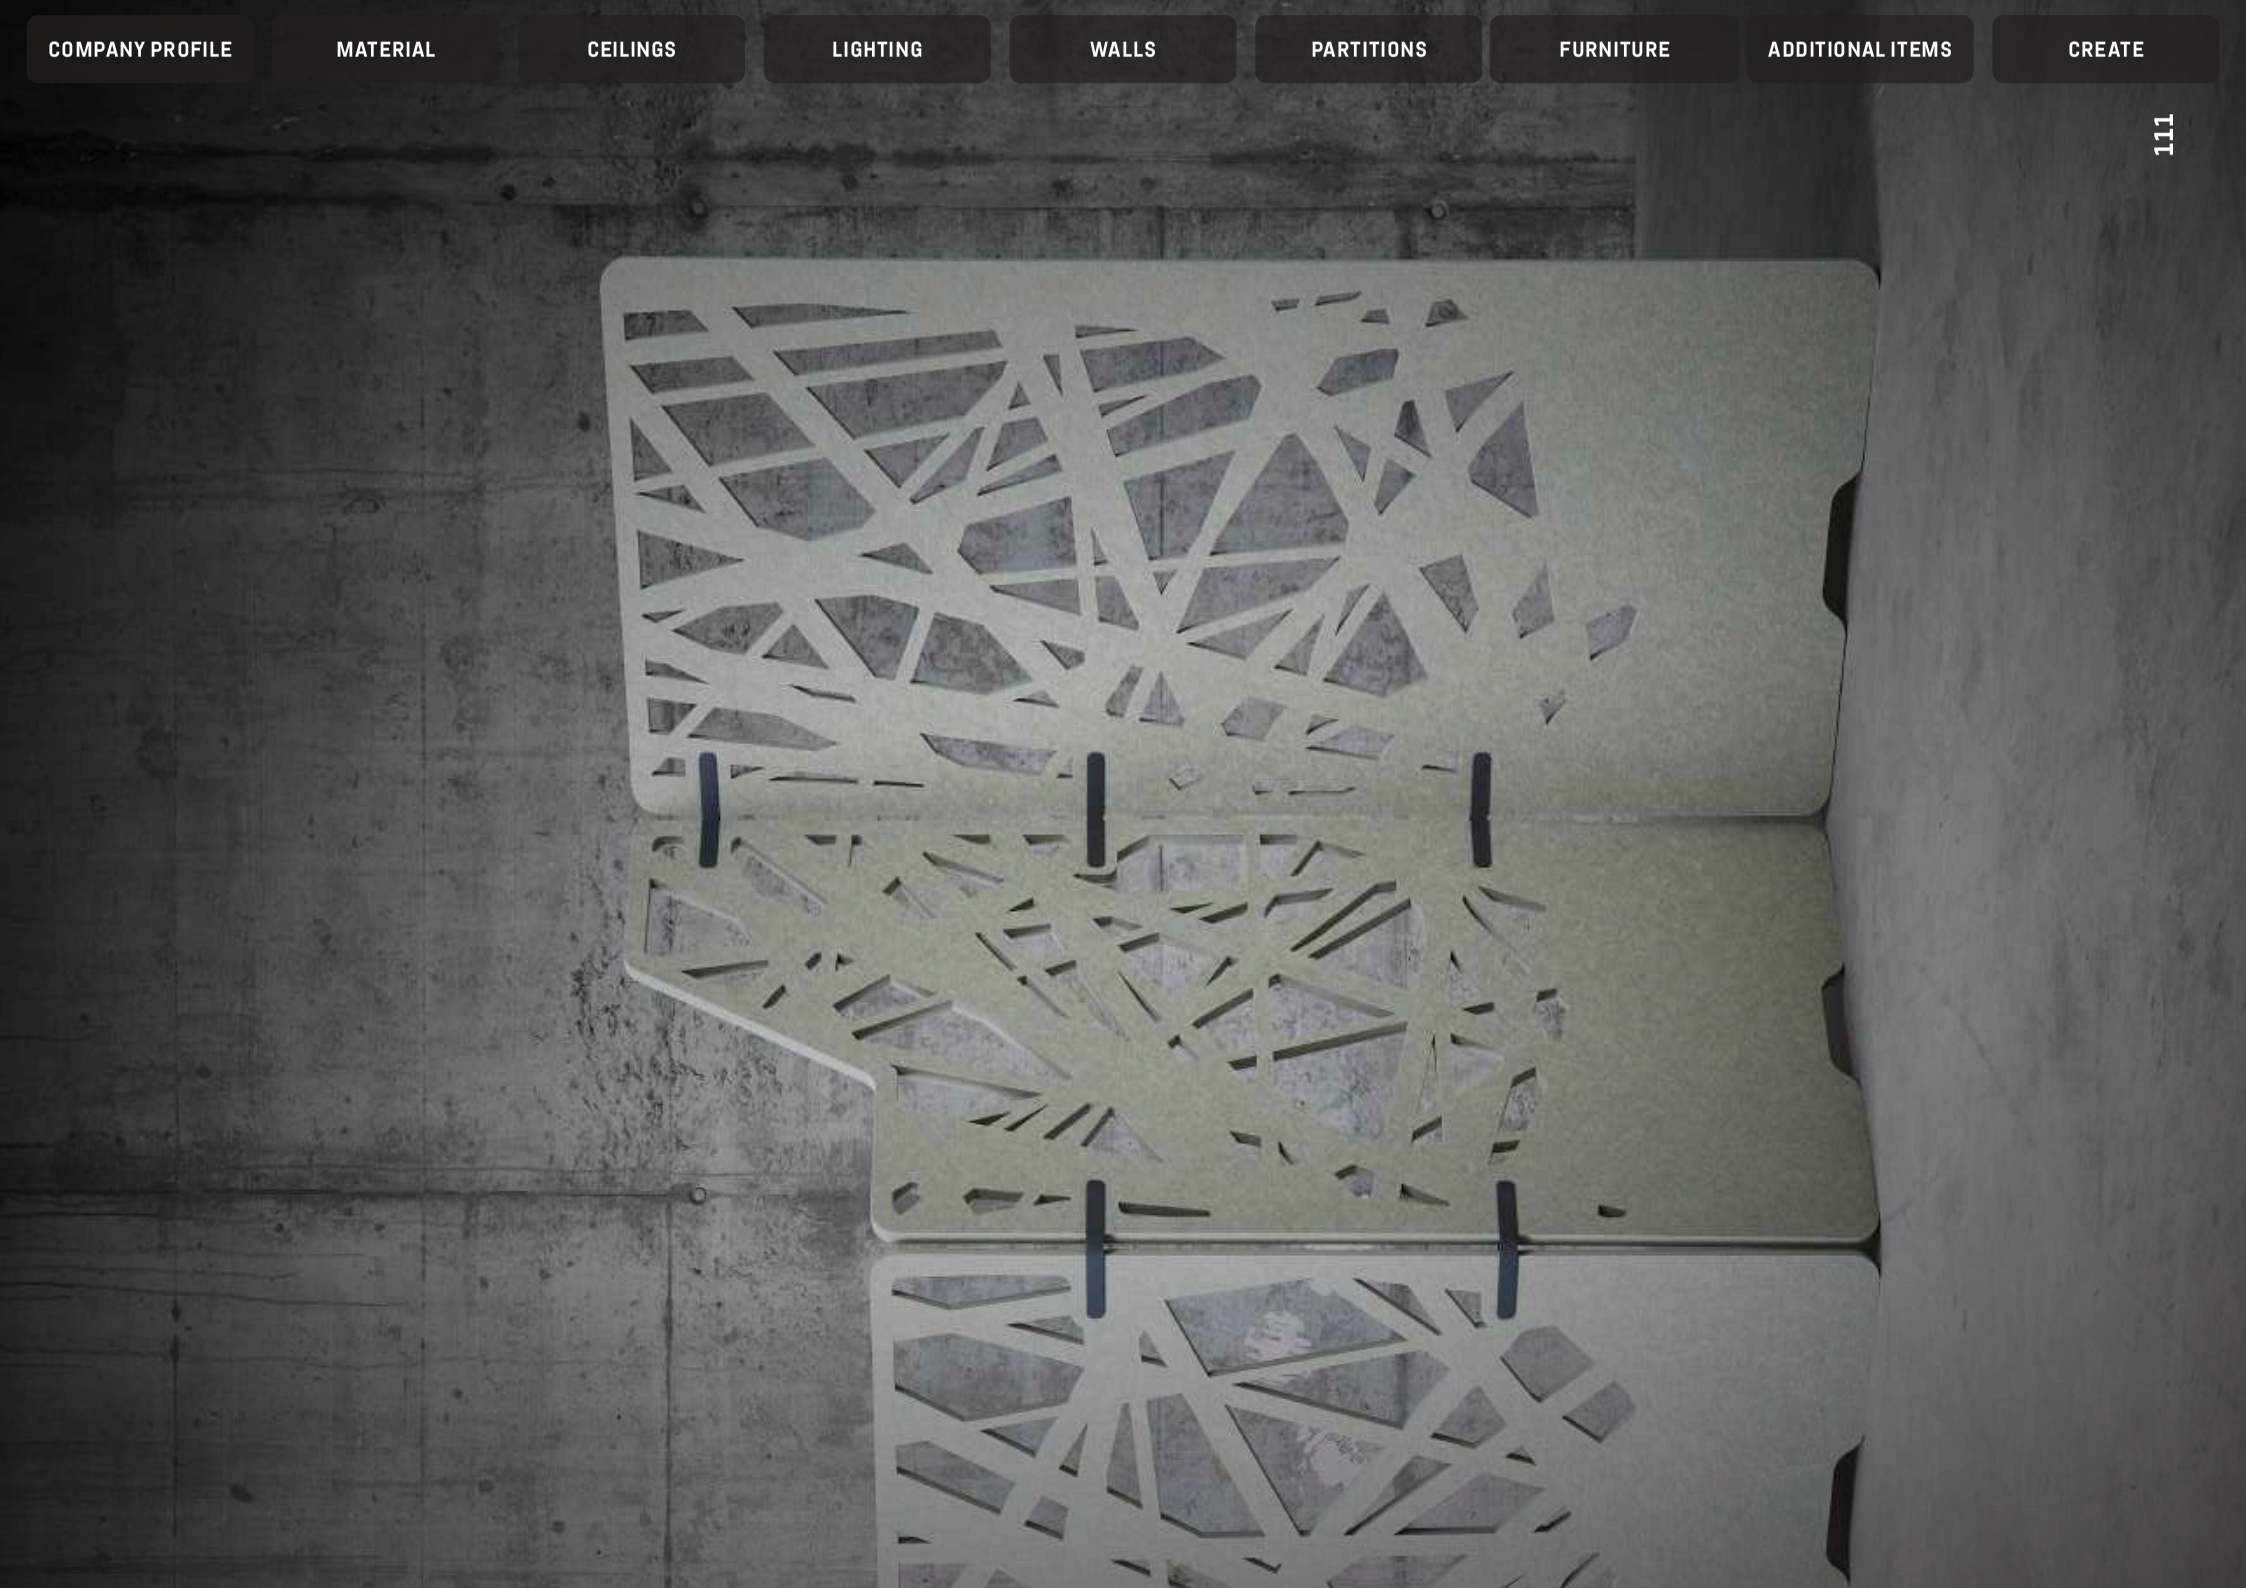
ECHO**COVE® ECO**

Thanks to a plug-in system, the EchoCove® ECO and PALING movable walls offer endless combination possibilities. They can be assembled and reconfigured without tools. The high density of the lightweight material of these acoustic partitions allows for a frameless construction. The perforations create the desired degree of permeability and attention with sophisticated details.



ECHO**COVE® 24MM ECO 79**

Frameless acoustic partition for installation on the floor (tool-free) excl. EchoCove® JOINER connectors.

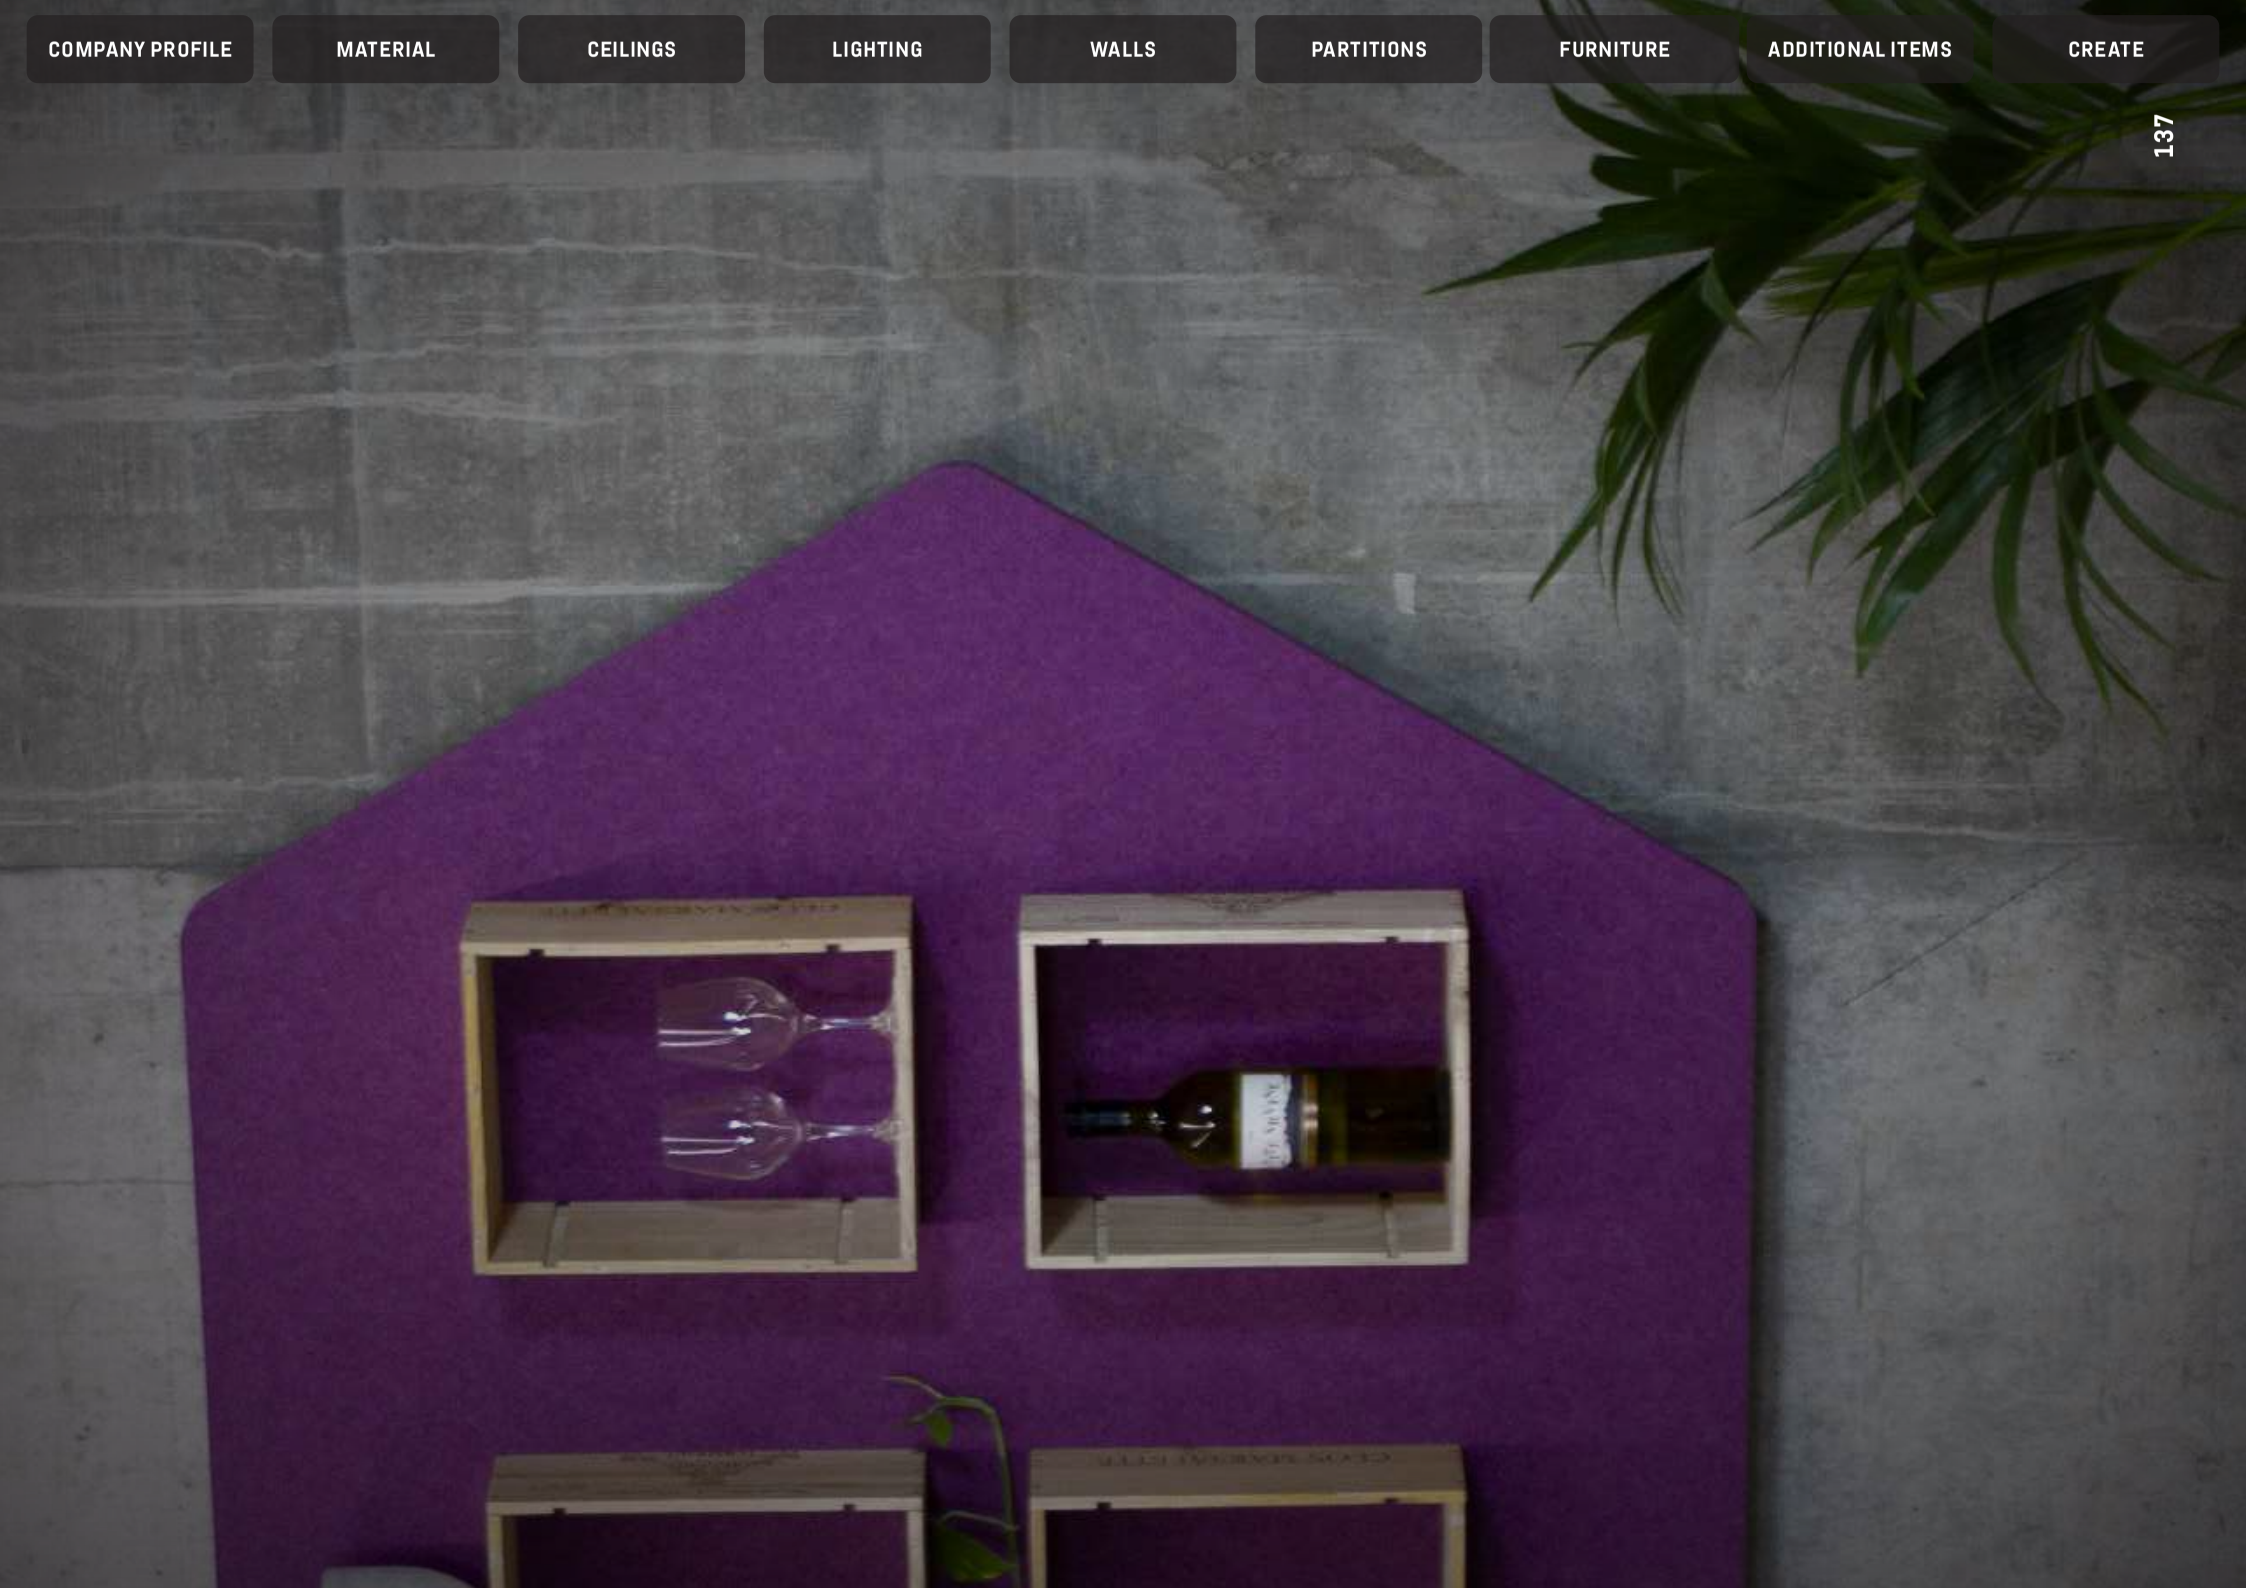
ACOUSTIC-FURNITURE

Design and function combined in one: acoustic furniture are utility and design elements made of EchoBoard® for improving the sound environment in rooms of all kinds.

ECHO**CRATE®**

EchoCrate® is the elegant acoustic solution for storage space in a small area. The EchoBoard® wall panel can be configured in any colour and shape and can be used in a wide variety of areas. The seemingly floating wall shelf is mounted on a powder-coated metal frame or a customised solution.

For the first time, the design combines two recycling concepts of beverage packaging, PET bottles and wine crates. Recycled PET was used to produce the decorative acoustic board and the practical shelves are made from upcycled wooden crates.



ECHO**CRATE® 24MM**

Acoustic panels in various shapes and surface designs combined with storage made out of wooden crates incl. wall suspension.
Absorption coefficient: aw 0.90, class A
Corner radius: 40mm
When ordering EchoCrate® RECTANGLE M & L items (ECR24REC079180- & ECR24REC120180-), please specify the type of suspension profile. (Page 179)

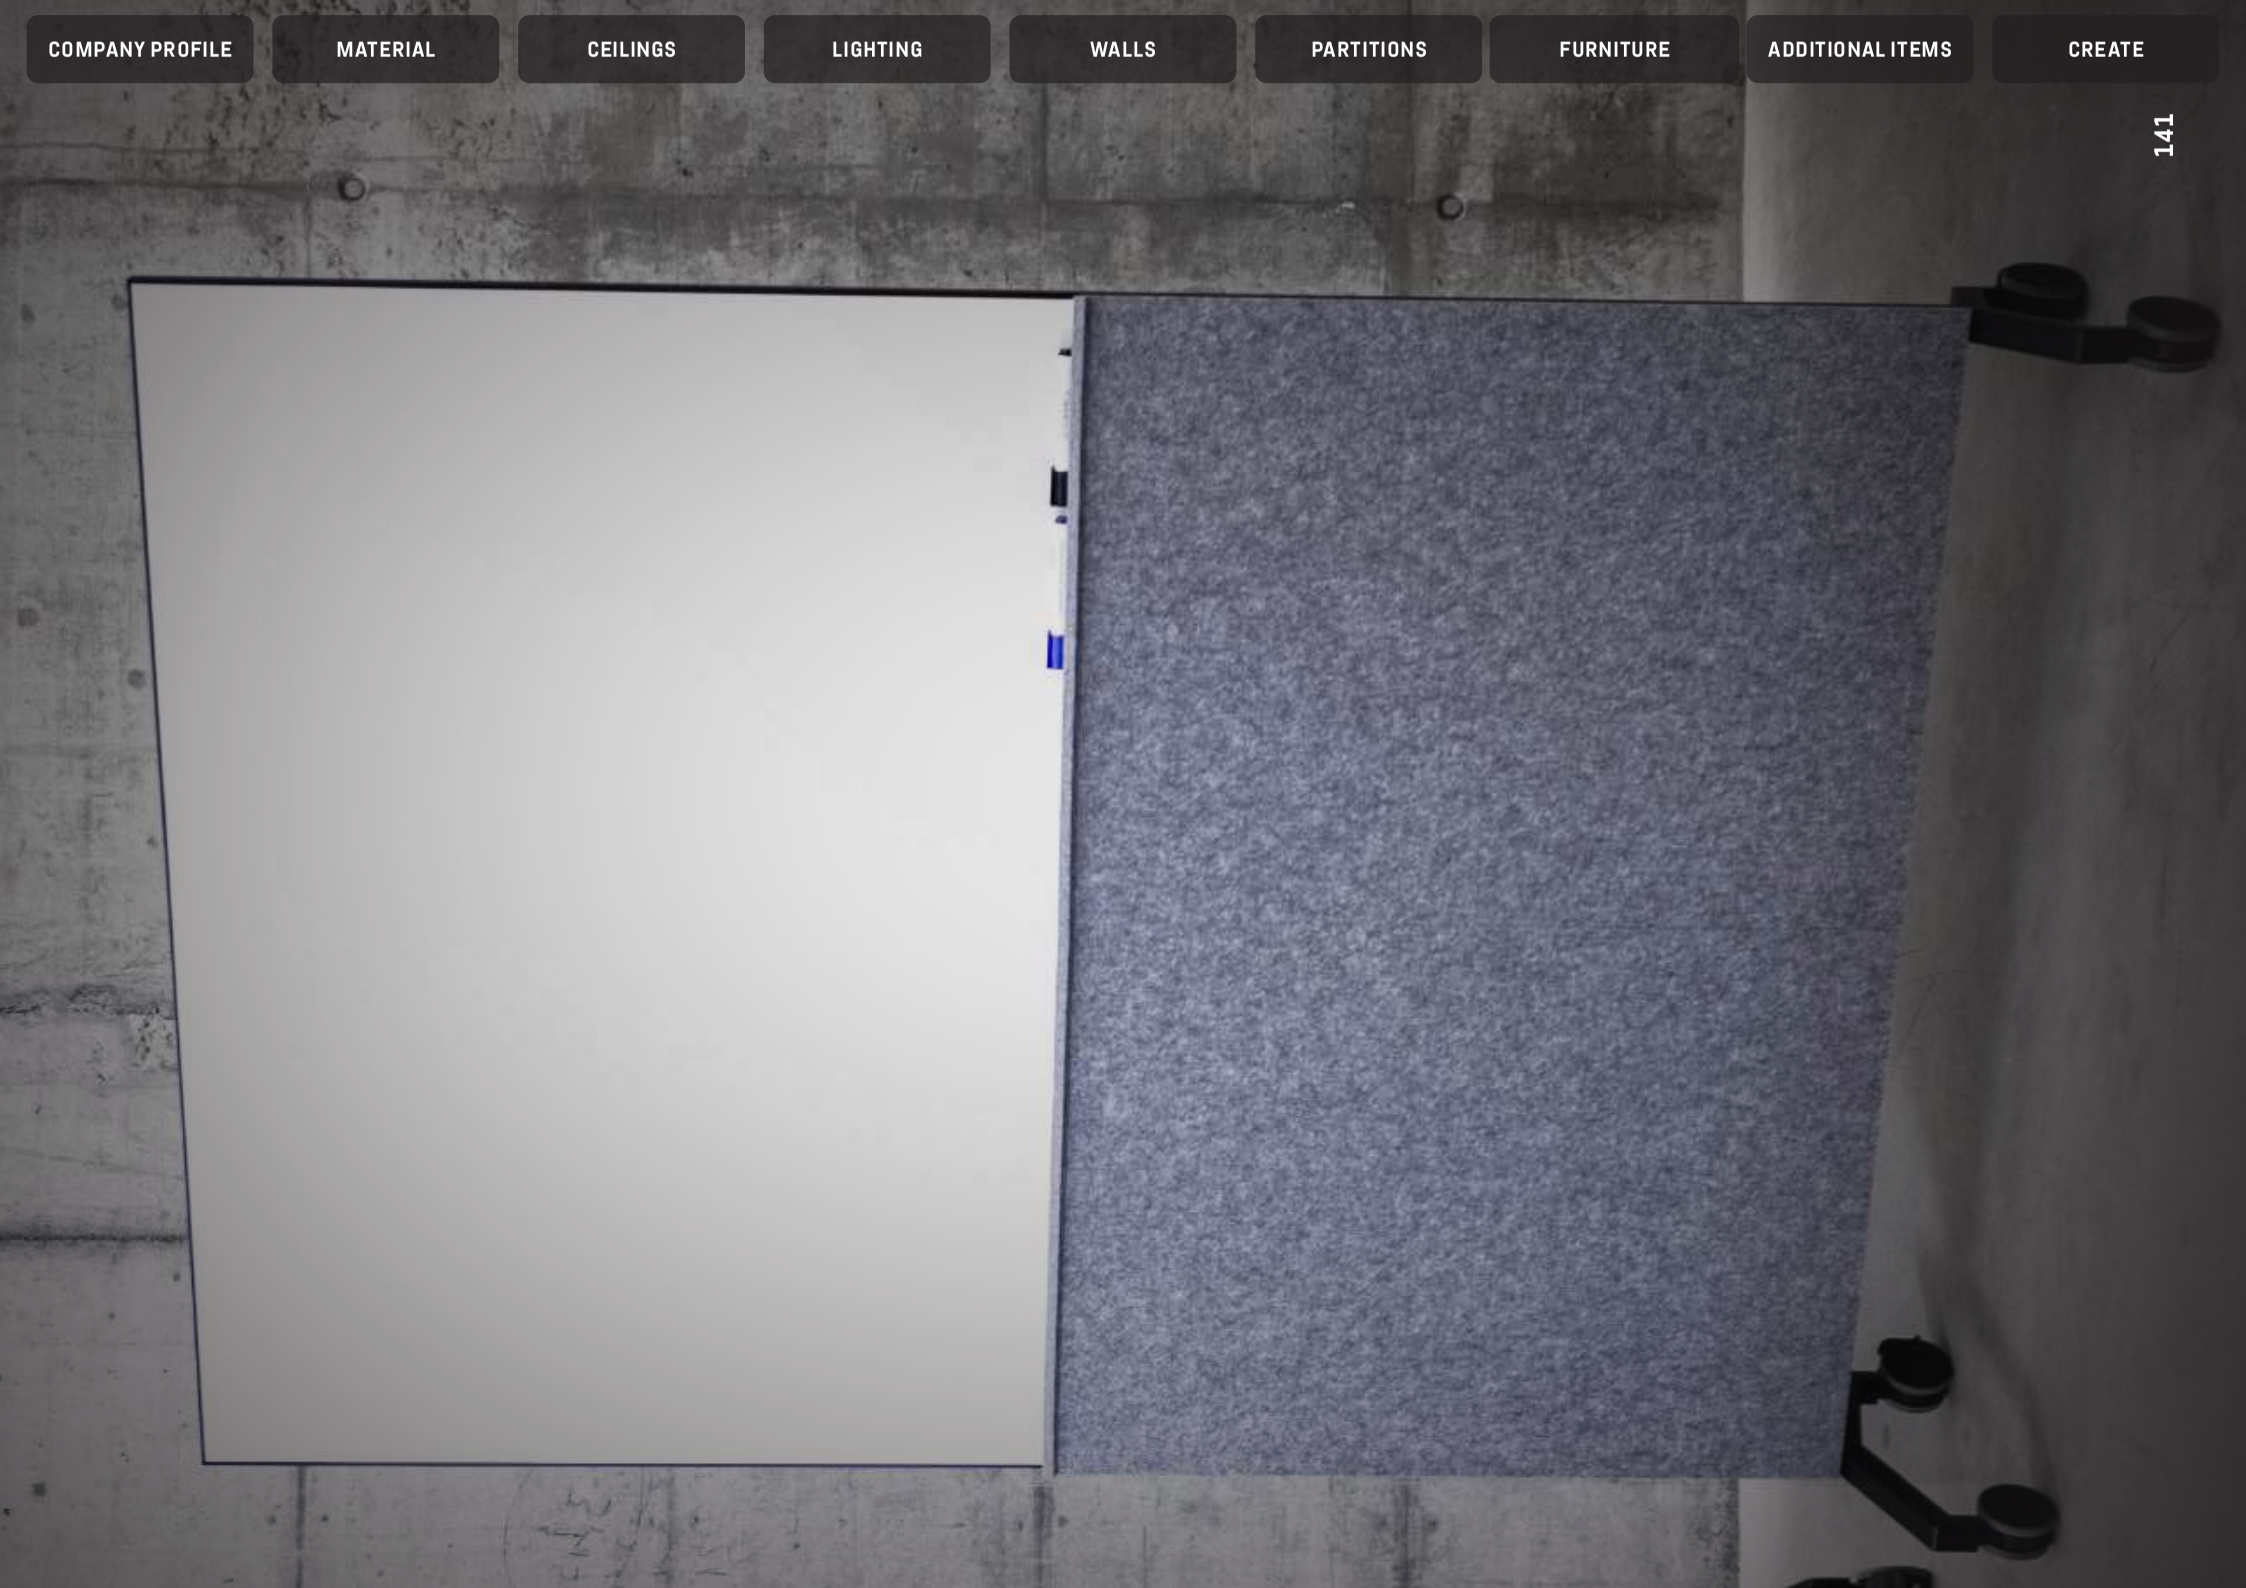
ECHO**NOTE®**

EchoNote® is a high-quality whiteboard with a pinboard on the back. It also serves as a functional, movable and sound-absorbing room divider. The magnetic board and the EchoBoard® acoustic panel are embedded in a minimalist frame made of powder-coated steel, the elegant feet are on castors.

EchoNote® cleverly adapts to the layout needs of offices, training rooms or meeting rooms. The large display area supports collaborative work



ECHO**NOTE® 12MM**

High-performance acoustic whiteboard consisting of a pin board with textile surface made of 100% PET and a classic whiteboard surface. Optionally available with cover plates.
Absorption coefficient: aw 0.30
This product is optionally available with our magnetic cover plates. (Page 181)

ECHO**TOWER® SQUARE**

The EchoTower® is the pioneering product in zero noise and zero waste for any space. The acoustic column is cut from a sheet of EchoBoard®, the high-performance absorber made from recycled PET bottles. But that's not all. With a Zero Waste goal, ECHO**JAZZ** products are taken back and shredded into EchoFlakes® along with offcuts. Filled with these flakes, the EchoTower® increases acoustic well-being and closes the material cycle. The EchoTower® requires no assembly. A base, with or without castors, made of powder-coated sheet steel is optional.

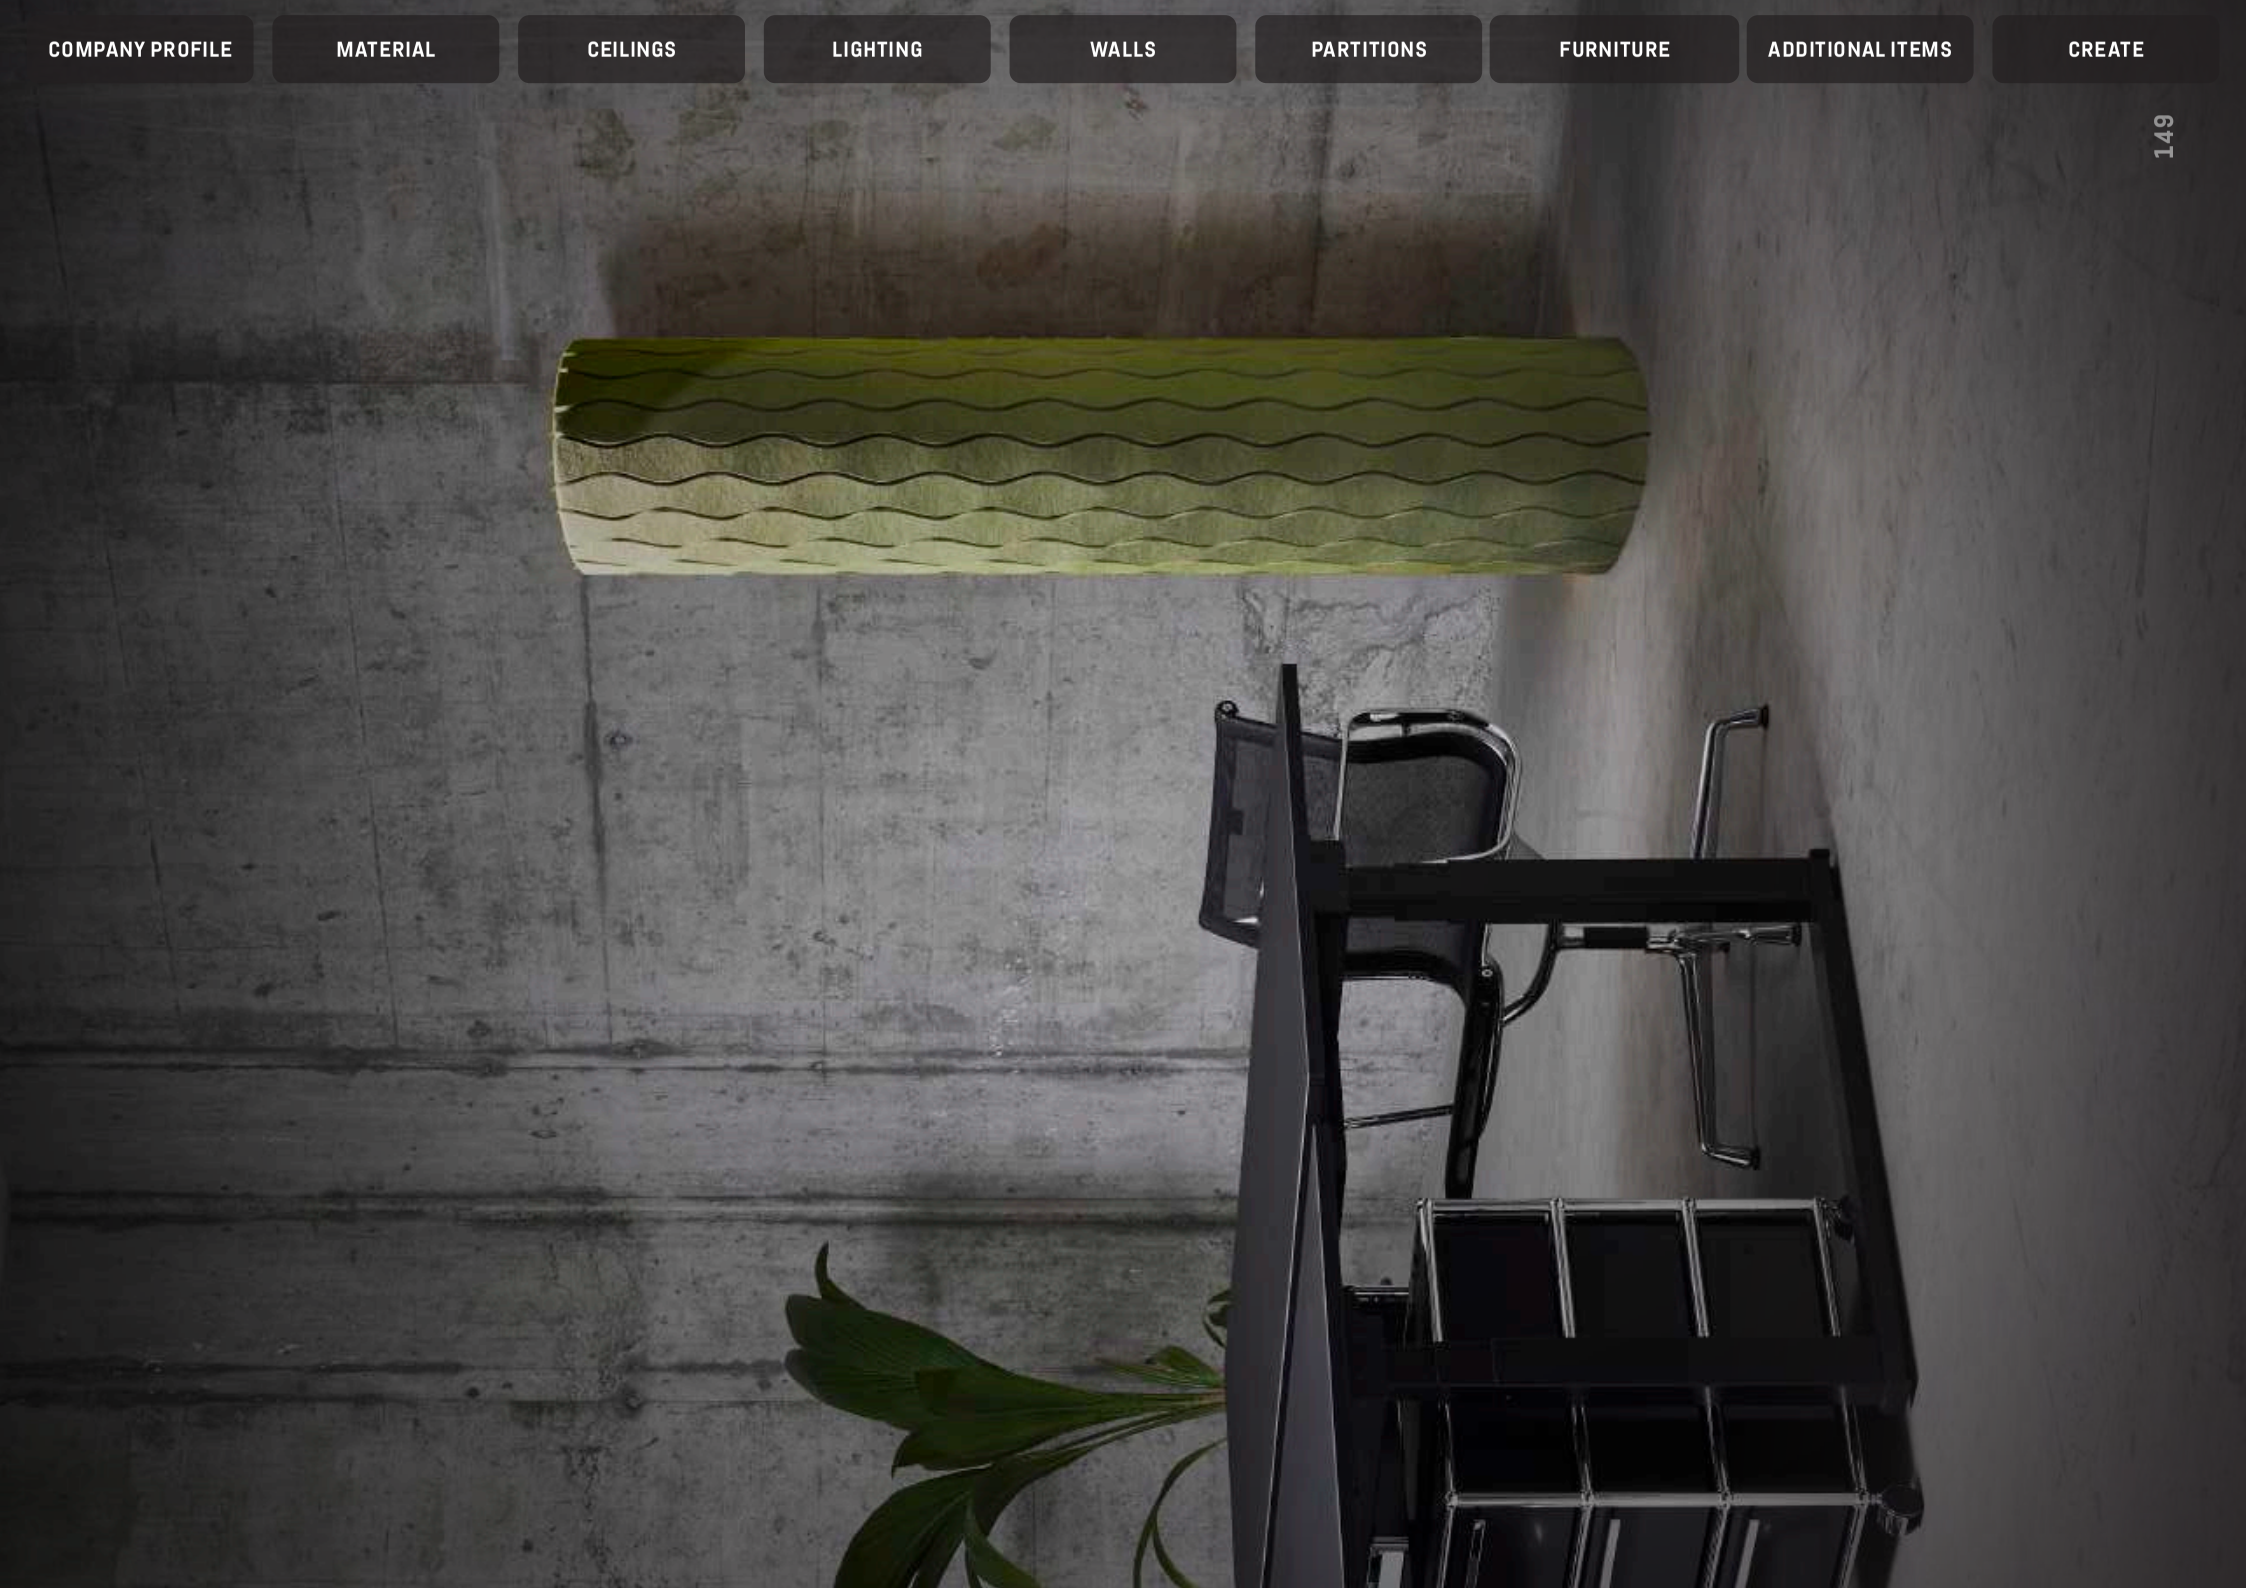
ECHO**TOWER® ROUND**

The EchoTower® is the leading product in zero noise and zero waste for every room. The acoustic column is cut from a single piece of EchoBoard®, the high-performance absorber made from recycled PET bottles. But that is not all, with a zero waste target, ECHO**JAZZ** products are taken back and shredded together with offcuts to produce EchoFlakes®. Filled with these flakes, the EchoTower® increases the acoustic comfort and closes the material cycle. The EchoTower® is freestanding. A stand base, with or without wheels, made of powder-coated steel is optional.

The acoustic column with relief structure is an eye-catcher that achieves outstanding absorption values and ensures well-being. The recyclable EchoTower® stands for sustainability by design without compromise - with more than 465 recycled PET bottles per tower.



ECHO**TOWER® 24MM ROUND**

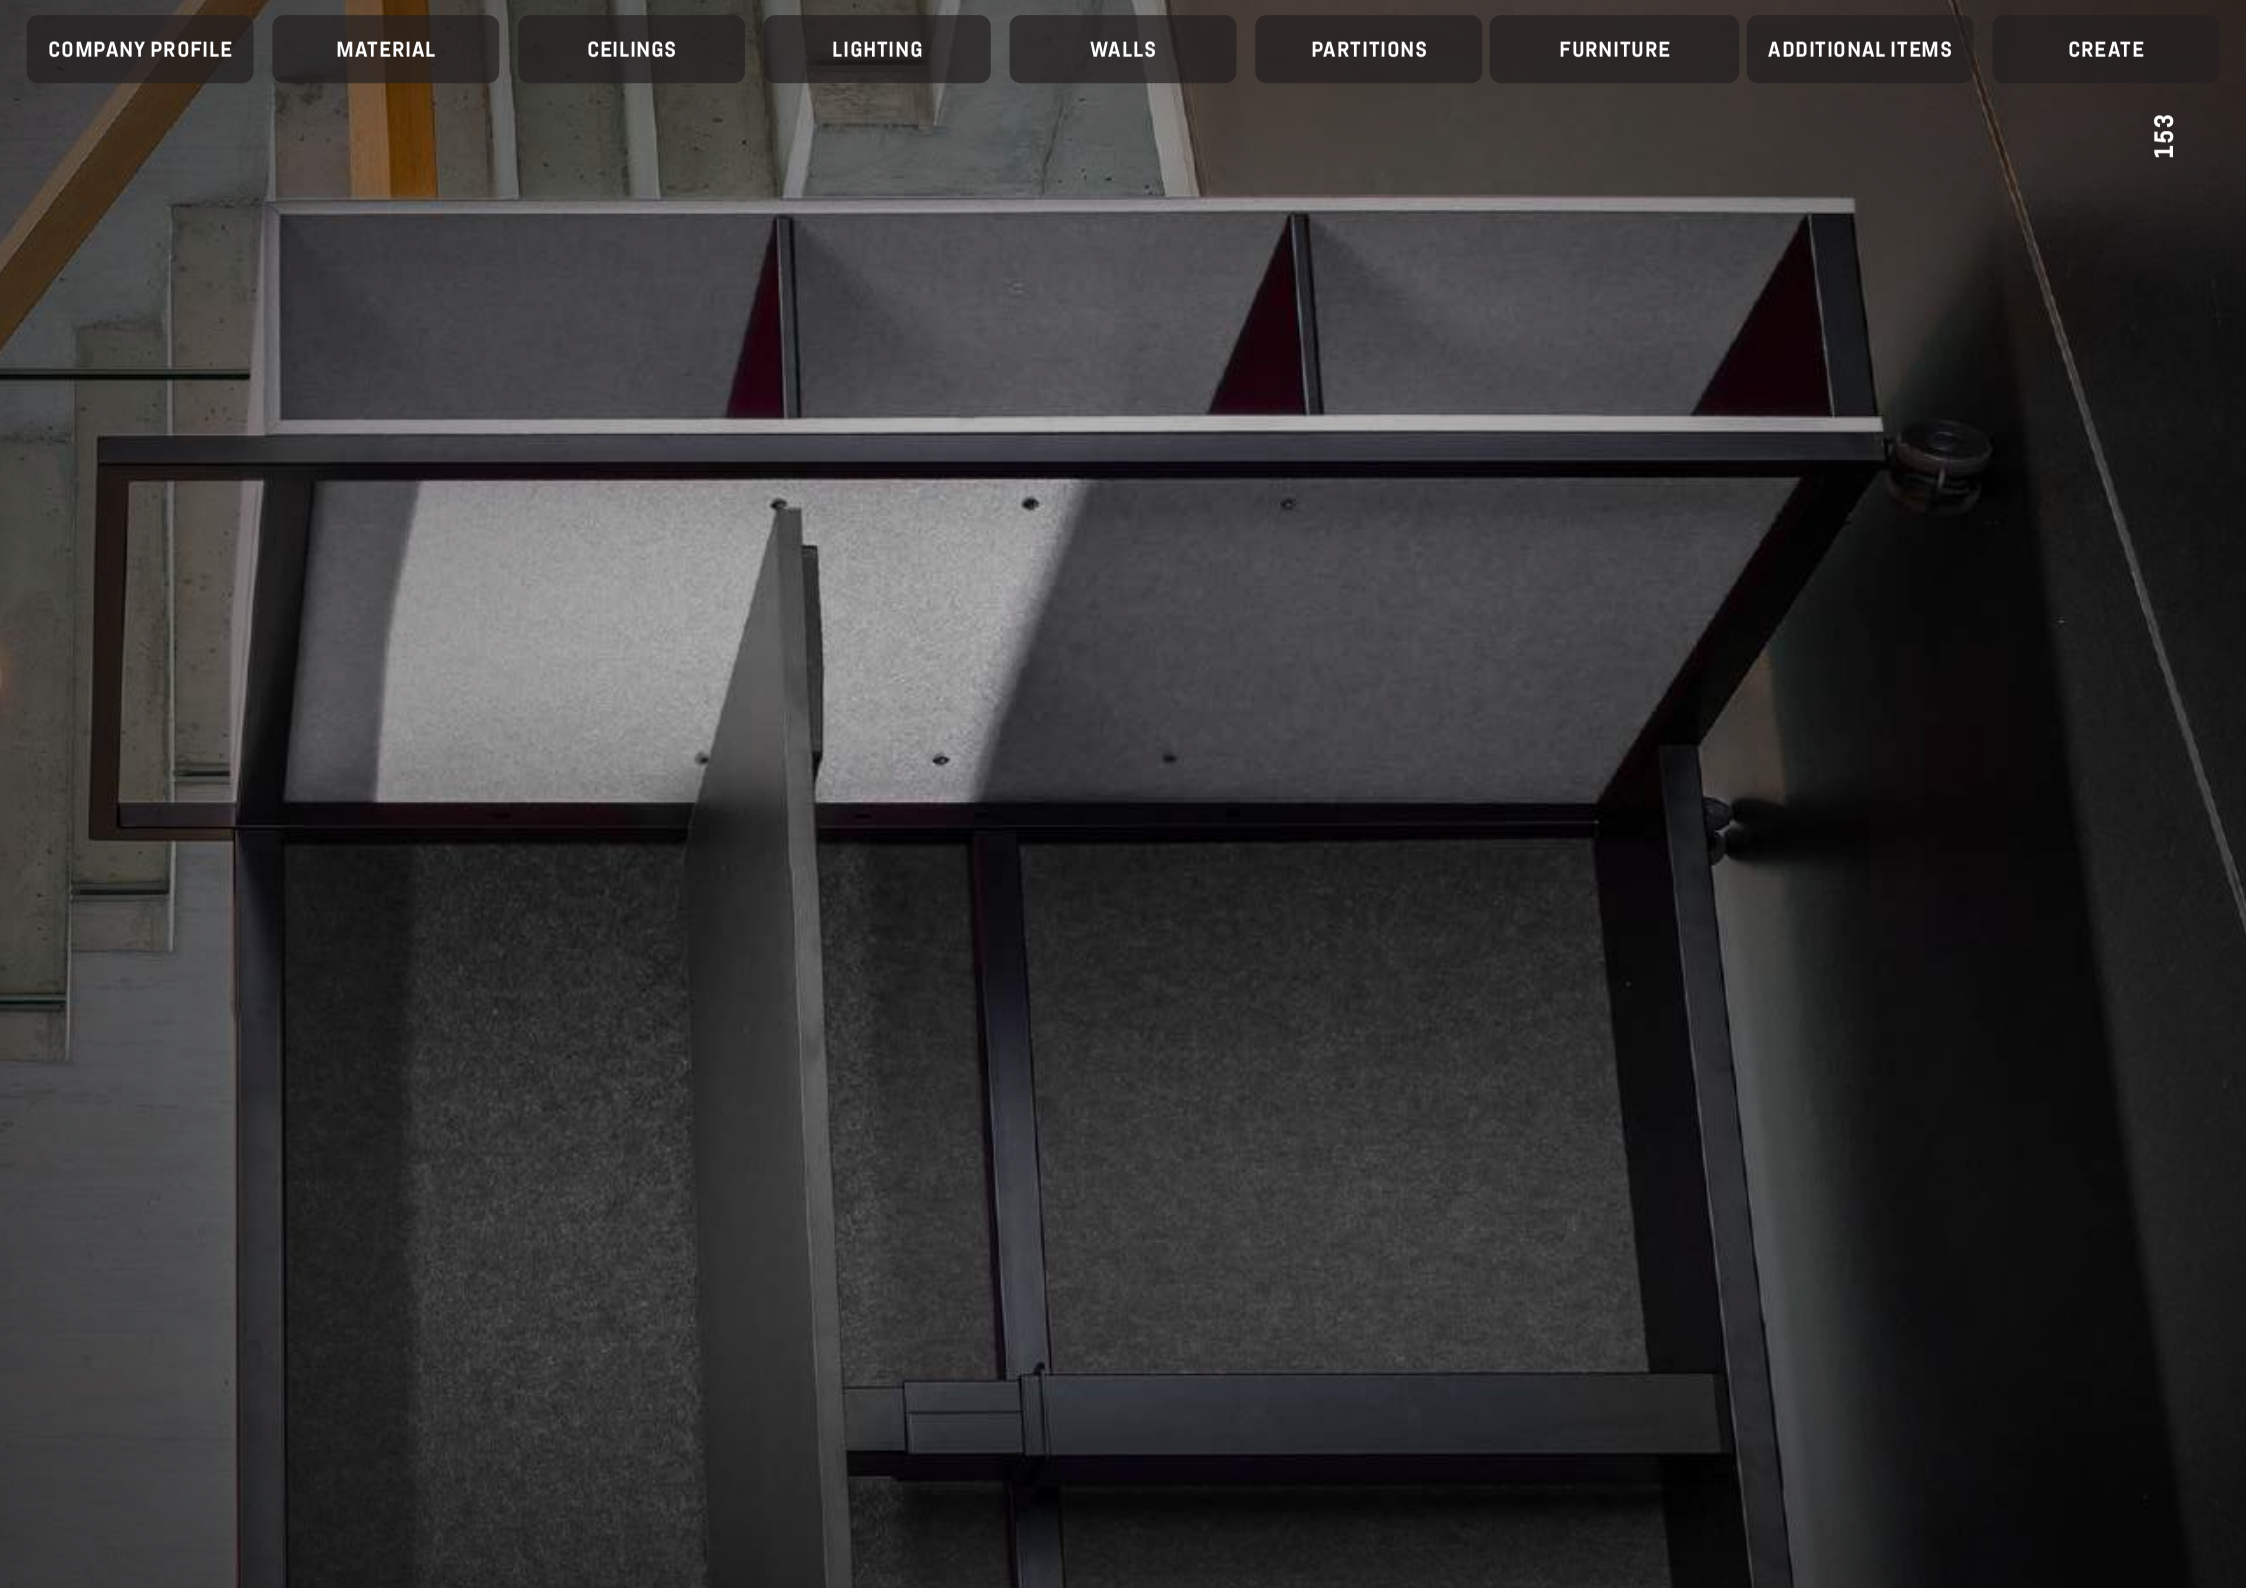
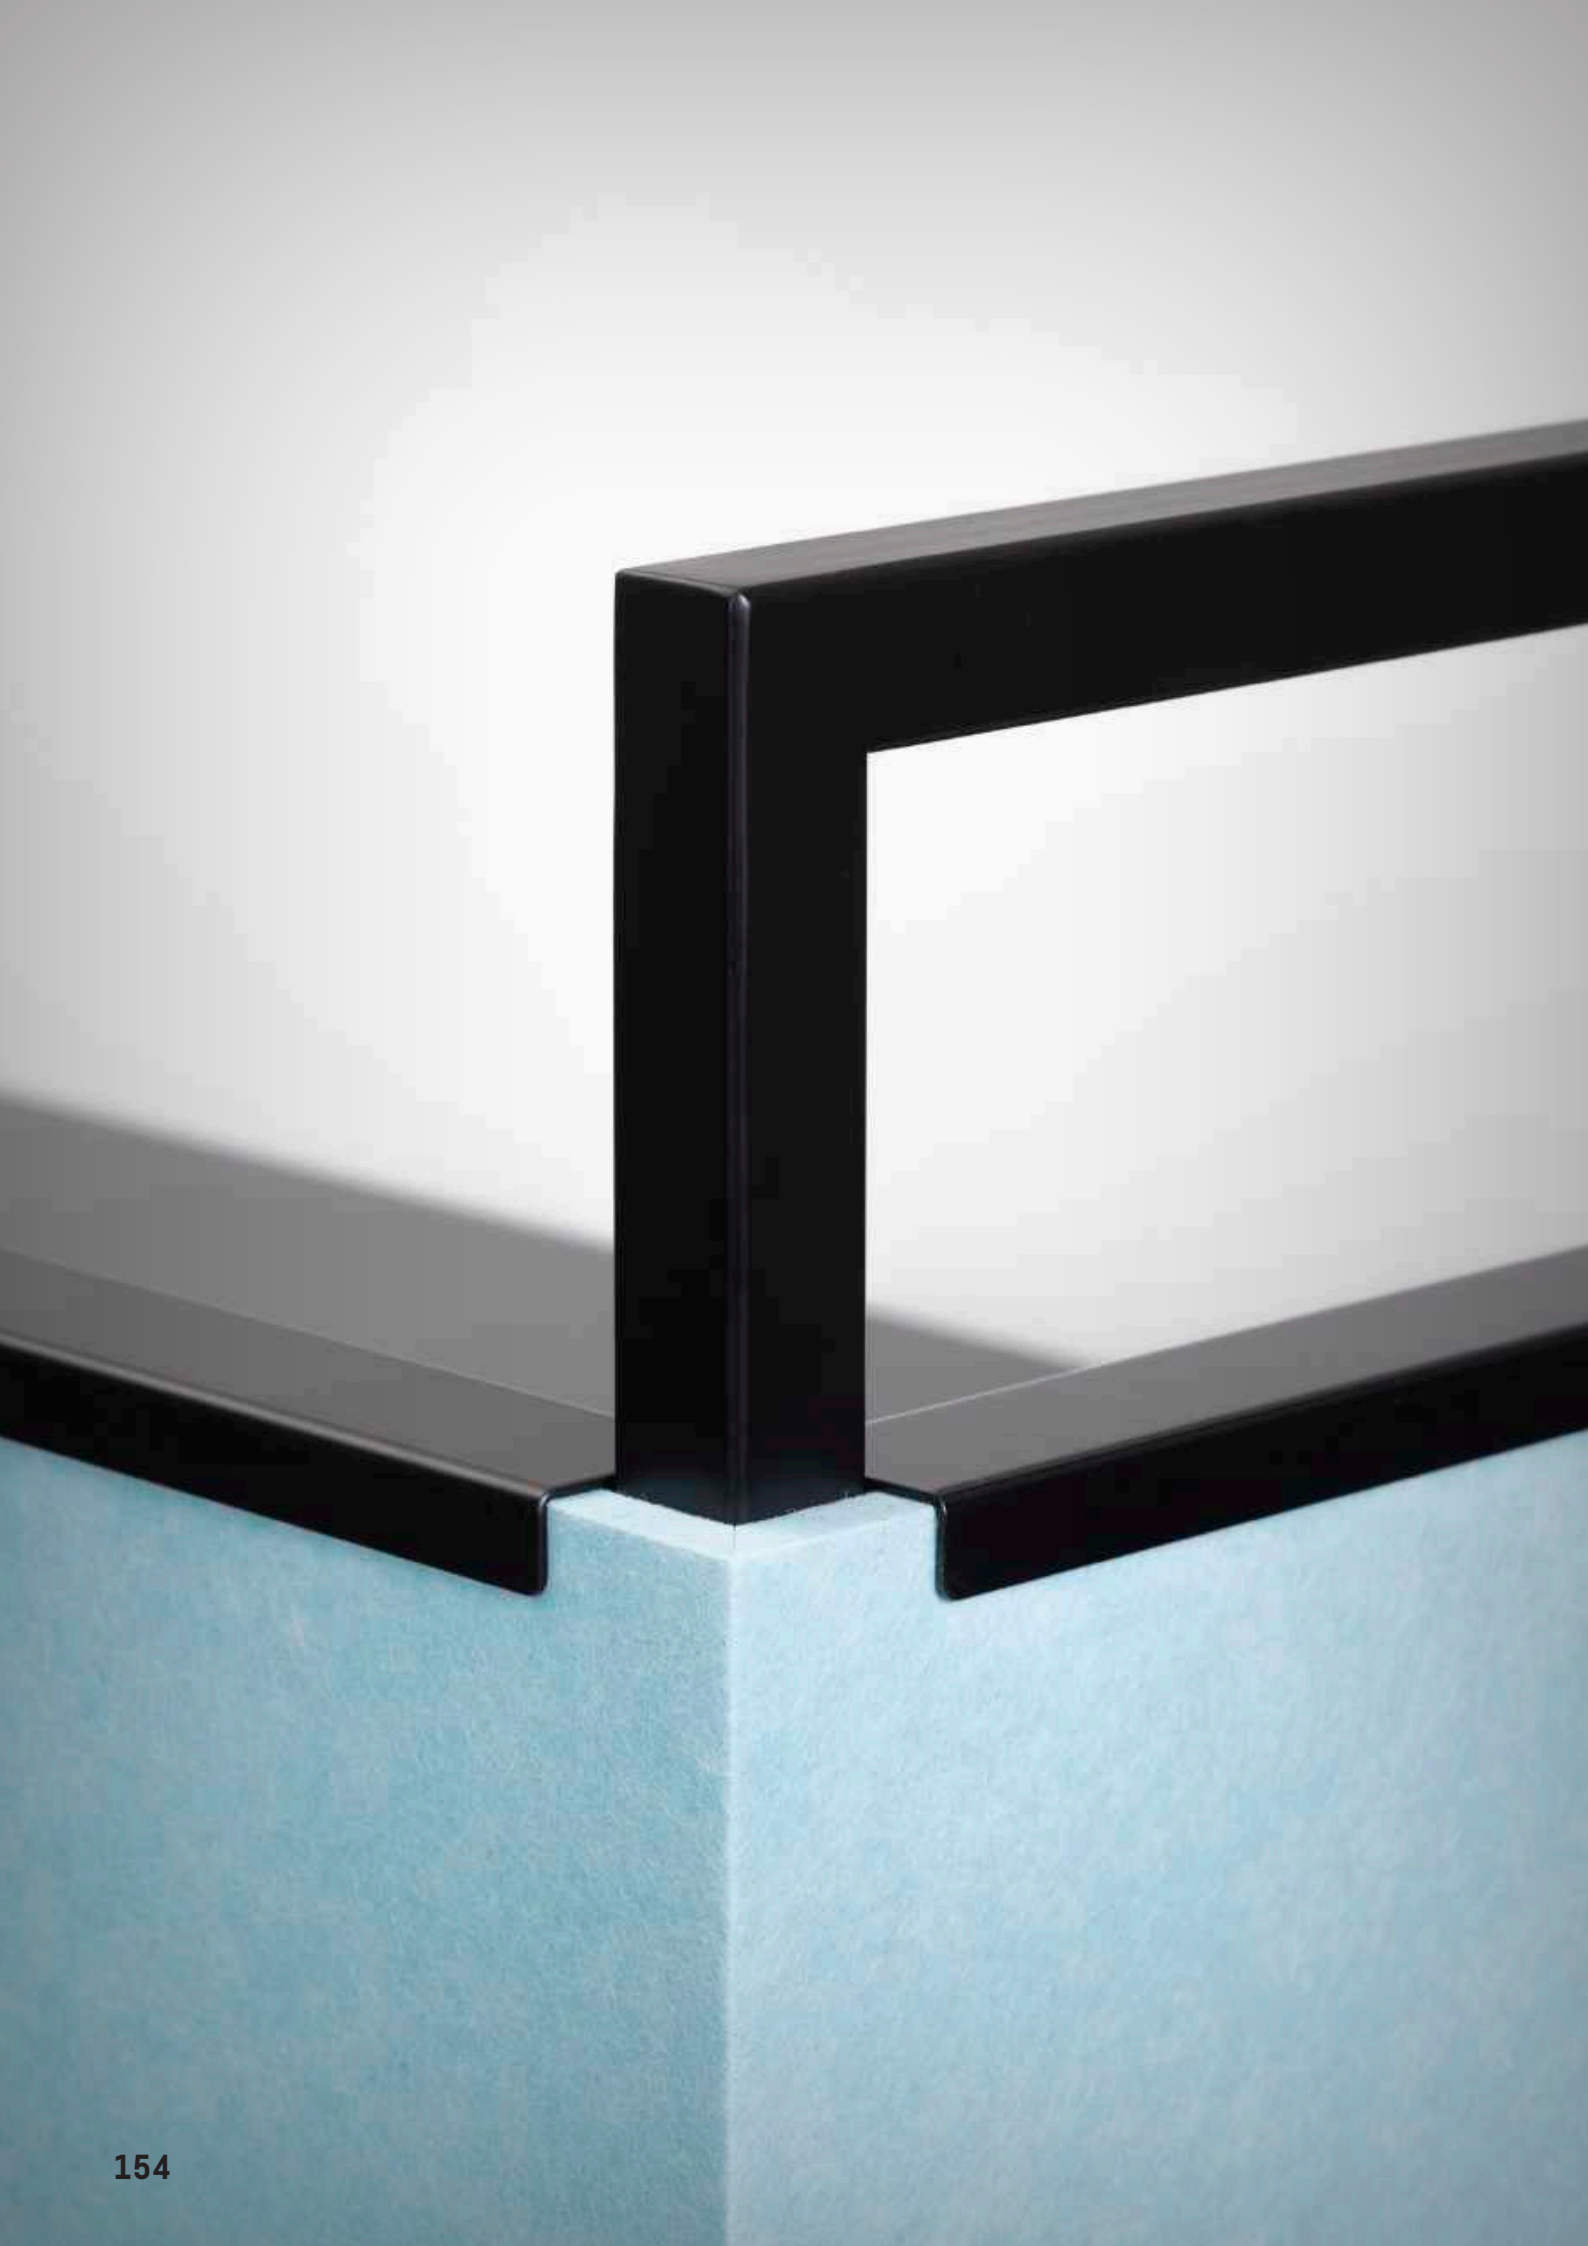
M**CART**

The **MCart** workstation offers the combination of personal focus space with mobile adaptability. Its compact dimensions make it suitable for working in an open office as well as a home office. The starting point for the design is an open steel frame. ECHO**JAZZ** panels define a semi-enclosed workspace with optimal sound insulation, simple body and colour accent. The acoustics in the overall space are also significantly improved. A gas lift column allows the height of the worktop to be adjusted from 70 to 112 cm in a matter of seconds. From standing to sitting and vice versa in real time.





MCART 12MM

Mobile acoustic workstation on wheels with integrated plug-in bar and hydraulically height-adjustable table top.

ECHO**CARRY**

The EchoCarry is an office organiser for personal equipment. At the workplace, laptop, accessories, office materials and private things are always well tidied and easily at hand thanks to two storage positions. The integrated handle allows the toolbox to be quickly stored in a compartment or cupboard at the end of the working day.

The elegant office companion is made of the acoustic absorber EchoBoard® around a stable wooden board made of European birch. In use, it is very quiet and muffles ambient noise. The EchoCarry symbolises the focus on ergonomics in the modern mobile working environment.

ECHO**BOX®**

In the Open Office, telephone calls and video calls at the workplace can be disturbing. The sound-protected EchoBox® ensures privacy and less disruptive noise. A room within a room for short and focused conversations, while standing or sitting. Thanks to the integrated height-adjustable shelf, there is also room for documents or a laptop. The conversation booth can be assembled in no time without tools. Its 7 parts weigh only 42kg.

The EchoBox® is a Swiss product that resulted from an intensive development cooperation between SYMA Profile and Fastening Technology and ECHO**JAZZ** Acoustic Absorbers.

We build Acoustic Inspiration.

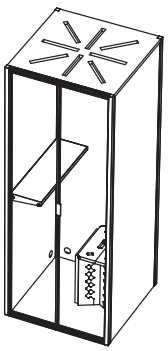
ECHO**BOX® 24MM + GLASS DOOR**



ADDITIONAL ITEMS

The installation should be from a single source and perfectly matched to the acoustic product. That is why ECHO**JAZZ** has developed its own installation kits and accessories that can be ordered as well. For optimal and seamless project support.

ECHO**COUSTIC® 25MM PROFILE**

EchoCoustic® can optionally be installed with EchoProfile® aluminium profiles. With EchoCoustic® 25mm PROFILE profiles, installation is also possible without adhesive. An EchoCoustic® panel can be easily clamped between two profiles.
This article is part of the product EchoCoustic®. (Page 26)

ECHO**NOTE® 12MM COVER**

Our material can be very well customised. The large selection of colours is just the beginning. The surface can be cut, perforated or even printed on. Are you inspired by the EchoBoard® or another of our products? Don't hesitate to ask and maybe our design department already has a solution ready.

ECHO JAZZ

CREATE

COLOURS

Let yourself be inspired by our colourful selection of colours. The fibres dyed in a liquid state do not fade and are very colourfast. For larger projects, we will even be happy to create your personal colour shade.

COLOURS

Due to the nature of the material, surface and colour deviations are possible.
You can always find the latest colour moods online at www.echo**jazz**.com/colours
